| Approval for maintaining the current non-independent non-executive directors at one | Zustimmung | The dissident, Align Partners, appears to be focused on trying to get Korean banks to pare back their lending growth and shore up their balance sheets, and only after achieving the relevant targets related to those goals, return excess capital to shareholders through share repurchases. | Accounts and Reports; Remuneration Report | Ablehnung | The Company's disclosure of its remuneration policies and procedures is in line with policy and applicable legislation. The report gives the impression of having been properly prepared. However:<br><br>The Company has failed to implement executive stock ownership guidelines. However, it should be noticed that the CEO is a member of the Soares dos Santos family, which beneficially owns 56% of the Company's issued share capital.<br>The proposed remuneration policy lacks bonus-malus and/ or any recovery provisions.<br>The Company has failed to implement a long-term incentive plan.<br>The report does not provide transparency on chosen benchmarks.<br>Fixed salary increased by more than 10% within one year without a valid reason.<br>Focus on Opaque Qualitative Metrics: A significant portion of the bonus incentive plan (50% for the CEO) is based on qualitative metrics that have not been clearly defined and disclosed by the Company. Due to the nature of these metrics and the lack of transparency on their assessment process, this portion of the award does not appear to be linked to any pre-determined targets, but rather assessed ex-post by the board through an evaluation of the Company's individual executive's contributions to achievements in the selected areas.<br>Although the Company states it has introduced ESG metrics under the annual bonus scheme, it has not disclosed detailed information on the nature or measurement of these indicators.<br>As this is not entirely in line with policy, we are voting against this proposal. |
| Allocation of Profits/ Dividends | Zustimmung | A proposed dividend allocation should be comparable to industry peers and should mirror the financial health of the company. In principle, an acceptable pay-out ratio should be above 20 percent and below 100 percent. The company's aggregate pay-out ratio for the fiscal year is in an acceptable range. Given this, we are voting for this proposal. |
| Ratification of Board Acts | Ablehnung | There is no indication of any investigations or pending court cases pertaining to current member of the Board of Directors and the Chief Executive Officer at the company. However, several governance and transparency requirements have not been met:<br><br>The positions of Chair and CEO are combined.<br>The board of directors is not sufficiently independent.<br>The remuneration committee is not sufficiently independent.<br>As this is contrary to policy, we are voting against this proposal. |

| Shareholder Proposal Regarding Report on Compensation and Health Benefit Gaps | Ablehnung | It should be noted that the proponent of this proposal is the National Legal and Policy Center ("NLPC"), which has submitted shareholder proposals that, upon first impression, appear to be consistent with environmental and social proposals that call for information or action on enhancing companies' approaches to environmental and social factors but, upon further review, appear to be designed to inhibit companies' actions in such areas. The NLPC describes itself as a 501(c)(3) that "promotes ethics in public life through research, investigation, education, and legal action," and believes "the best way to promote ethics is to reduce the size of government." As part of the corporate integrity project on its website, the NLPC shares its concerns regarding "woke" corporate executives, for instance posting articles about inclusive content "devaluing" the Pixar franchise or about how the NLPC has reported Visa`s chair and CEO to the SEC for ongoing "wokeness." The project also examines a supposed pushback against ESG initiatives, featuring pieces such as one describing corporate America`s anti-racism programs as racist against white people and another promoting the NLPC`s efforts to nominate a fossil-fuel-supporting director candidate to the board of Exxon Mobil Corporation.<br><br>Given the Company's existing disclosures, the proponent has failed to provide convincing rationale that adoption of this proposal would meaningfully add to shareholders' understanding of how the Company is ensuring equitable compensation or that the proposed disclosure would help to mitigate potential risks associated with this matter. Moreover, this proposal has been labeled as "Anti-ESG" due to the shareholder proponent. Consequently, we are voting against this proposal. |

Given this, we are voting for this proposal. |

| Remuneration Report | Ablehnung | The Company's disclosure of its remuneration policies and procedures is in line with policy and applicable legislation. The report gives the impression of having been properly prepared. However:<br><br>The board can grant discretionary bonuses. Specifically, the CEO was granted an additional incentive of up to 50,000 Company class B shares, payable by the end of 2024 based on the achievement of specific performance metrics. It is worth noting that the Company reported the resignation of Henrik Ehrnrooth as CEO and the appointment of Philippe Delorme as new CEO since January 1, 2024. The early payment of LTI 2022 and LTI 2023 together with the additional share-based incentive replaces the contractual notice of termination and severance payments.<br>The Company has not provided details of the performance metrics or performance targets under the STI or LTI plans. Rather, the Company disclosed the total performance achievement under each incentive plan. The information that the Company has failed to disclose is important in order for shareholders to properly evaluate whether executive remuneration aligns with Company performance.<br>As this is against policy, we are voting against this proposal. |
| Remuneration Policy | Ablehnung | The Company's disclosure of its remuneration policies and procedures is in line with policy and applicable legislation. The report gives the impression of having been properly prepared. However:<br><br>The board can grant discretionary bonuses.<br>The Company has not provided details of the performance metrics or performance targets under the STI or LTI plans.<br>The report does not provide transparency on chosen benchmark used for pay setting.<br>ESG metrics are not disclosed in detail. The determination of this portion of award appears opaque and virtually based on the board's discretion.<br>While the board has set a cap on payouts relative to target bonuses, the target bonuses are not disclosed as a quantifiable monetary amount or any correlation to base salary or a quantifiable monetary amount. As a result of the discretionary nature of bonus targets and caps in the Company's incentive plan, management may receive excessive compensation that is not strictly tied to Company performance.<br>As this is not entirely in line with policy, we are voting against this proposal. |
| Directors' Fees | Zustimmung | The proposed fees are reasonable and in line with those paid by the Company`s peers. Therefore, we are voting for this proposal. |

| Shareholder Proposal Regarding Pesticide Reporting | Zustimmung | Although the Company provides detailed disclosure regarding its responsible sourcing efforts, including in regard to its supplier engagement and verification process and its EHS policy, it currently provides few details about its approach to pesticide use, or pest management more broadly, in its supply chain. However, it should be noted that the Company has recently completed the separation of its North American cereal business, resulting in two independent companies, the Company and WK Kellogg Co (2023 10-K, p.3). The Company has also committed to providing its initial social and environmental report detailing 2024 progress toward its goals in 2025, and has also stated its intention to report against the GRI, SASB, and TCFD indices, as well as to annually report environmental data to CDP. | Shareholder Proposal Regarding Report on Carbon Reduction Commitments | Ablehnung | In this case, the proponent of this proposal is the National Center for Public Policy Research ("NCPPR). The NCPPR describes itself as a "communications and research foundation supportive of a strong national defense and dedicated to providing free-market solutions to today's public policy problems" that believes "the principles of a free market, individual liberty and personal responsibility provide the greatest hope for meeting the challenges facing America in the 21st century." A division of the NCPPR, the Free Enterprise Project ("FEP") describes itself as "the conservative movement's only full-service shareholder activism and education program: It files shareholder resolutions, engages corporate CEOs and board members at shareholder meetings, petitions the Securities and Exchange Commission (SEC) for interpretative guidance, and sponsors effective media campaigns to create the incentives for corporations to stay focused on their missions." This proponent has generally submitted proposals that appear to be focused on E&S issues on their face but are designed to frustrate the company's actions around ESG performance. In this case, the proponent notes in its submission under this shareholder proposal that "voluntary commitments to reduce carbon emissions create unnecessary risk for the Company because of the lack of scientific consensus over the ability to achieve net zero emissions". Therefore, we are voting against this proposal. |

| Ratification of Supervisory Board Acts | Ablehnung | There is no indication of any investigations or pending court cases pertaining to current member of the Supervisory Board at the company. However, several governance and transparency requirements have not been met:<br><br>The supervisory board continues to review and investigate the matters relating to the Respironics recall, quality and regulatory compliance (including FDA inspections), as well as enterprise risk management. There are no supervisory board members involved in a legal investigation in connection with the recall. However, shareholders should be mindful of the several ongoing legal proceedings and investigations the Company is currently exposed to, the potential outcome and impact of which are somewhat unclear. In addition, while the Company has taken steps to address issues surrounding the recall through the proposed consent decree, resulting in charges amounting to ¬363 million during the year, the necessity of the consent decree highlights previous challenges in the oversight responsibility of the supervisory board.<br>As this is not in line with policy, we are voting against this proposal. |

| Beschlussfassung über die Verwendung des Bilanzgewinns für das Geschäftsjahr 2023 | Zustimmung | Die Dividende sollte angemessen sein und der finanziellen Lage des Unternehmens entsprechen. In der Regel liegt eine akzeptable Ausschüttungsquote zwischen 20 und 100 Prozent. In diesem Fall wird trotz negativen EPS eine Dividende ausgeschüttet. Zwar dürfte eine Dividende zunächst erfreulich sein und es ist auch begrüßenswert, dass das Unternehmen die Dividende stabil halten will. Zudem wird die Dividendenpolitik begründet. Auch wenn eine Dividende, die den Jahresgewinn übersteigt, nicht den Richtlinien entspricht, stimmen wir aufgrund der außerordentlichen Situation in der Branche im vergangenen Jahr in diesem Fall, auch nach Rücksprache mit dem Sektorexperten und Abwägung der Argumente, für den Dividendenantrag. |

| Allocation of Profits/ Dividends | Zustimmung | A proposed dividend allocation should be comparable to industry peers and should mirror the financial health of the company. Given this, we are voting for this proposal. |

While the majority of the amendments proposed are in line with policy, some are problematic.<br><br>The board seeks shareholder approval to remove certain articles which deem holders of domestic shares and overseas listed foreign-invested shares to be shareholders of different classes of shares. The removal of the requirement to hold separate class meetings is detrimental to the rights of the minority class of shareholders as they will lose their veto power to block the passing of unfavorable proposals in the class shareholder meetings. Shareholders, in particular shareholders of the minority class, should not support the deletion of articles that confirm the class shareholder distinction and afford class shareholders the right to vote separately on matters that could vary or abrogate their rights.<br><br>Further, as a consequence of the amendments, the class distinctions in calculating issuance limits will also be removed. The current issuance limit of 20% of each class is already excessive. Therefore, the removal of class distinctions when calculating issuance limits poses a higher risk of dilution to shareholders in both classes.<br><br>As this is not in line with policy, we are voting against this proposal. |

| Accounts and Reports; Non Tax-Deductible Expenses | Zustimmung | The Company's audited annual and consolidated accounts were available for review in advance of this shareholder meeting. As no evidence has been presented that would question the accuracy of these reports, one should consider this item as routine. Further, as for the approval of non tax-deductible expenses, this is a routine matter that will not have a negative effect on the Company's shareholders. Therefore, we are voting for this proposal. |
| Consolidated Accounts and Reports | Zustimmung | The Company's audited annual and consolidated accounts were available for review in advance of this shareholder meeting. As no evidence has been presented that would question the accuracy of these reports, one should consider this item as routine. Therefore, we are voting for this proposal. |
| Allocation of Profits/ Dividends | Zustimmung | A proposed dividend allocation should be comparable to industry peers and should mirror the financial health of the company. In principle, an acceptable pay-out ratio should be above 20 percent and below 100 percent. The company's aggregate pay-out ratio for the fiscal year is in an acceptable range. Given this, we are voting for this proposal. |
| Appointment of  Auditor for Sustainability Reporting (Mazars) | Zustimmung | There is no indication of any investigations or pending court cases pertaining to the auditor for sustainability reporting (Mazars) . Moreover, fees paid to the auditor are appropriate, the auditor tenure is in line with policy, and all necessary information regarding the auditor have been provided in the Company's filings. Therefore, we are voting for this proposal. |
| Appointment of  Auditor for Sustainability Reporting (PwC) | Ablehnung | There is no indication of any investigations or pending court cases pertaining to the auditor for sustainability reporting (PwC). Moreover, the fees paid to the auditor are appropriate and are clearly disclosed by the Company. However, the same firm has audited the Company for more than 10 years, which is not in line with policy. Consequently, we are voting against this proposal. |

| Elect Jean-Marc Chéry | Ablehnung | There are no evident reasons to doubt the qualifications of nominee Jean-Marc Chéry. However, this director serves as chair of the E&S committee and the Company has no biodiversity policy, which is not in line with policy. Consequently, we are opposing this director`s election. |
| Authority to Repurchase and Reissue Shares | Ablehnung | At this time, there is no evidence of any past abuse of this type of authority at the company. | Authority to Cancel Shares and Reduce Capital | Zustimmung | This is a routine request in France. Consequently, we are voting for this proposal. |
| Authority to Issue Performance Shares | Ablehnung | Remuneration plans should be adequately disclosed and should reward executives for good performance. | Authority to Issue Shares and Convertible Debt w/ Preemptive Rights | Zustimmung | In this case, the board will be authorised to issue up to 19.1% of the Company`s current issued share capital with preemptive rights, which is in line with policy. Consequently, we are voting for this proposal. |
| Authority to Issue Shares and Convertible Debt w/o Preemptive Rights | Zustimmung | In this case, the board will be authorised to potentially issue up to 9.5% of the Company`s current issued share capital without preemptive rights, subject to a limit of 9.5% of share capital for all share issuances without preemptive rights and a cumulative limit of 19.1% of share capital for all the Company's capital increases. As this is in line with policy, we are voting for this proposal. |
| Authority to Issue Shares and Convertible Debt Through Private Placement | Zustimmung | In this case, the board will be authorised to potentially issue up to 9.5% of the Company`s current issued share capital without preemptive rights, subject to a limit of 9.5% of share capital for all share issuances without preemptive rights and a cumulative limit of 19.1% of share capital for all the Company's capital increases. As this is in line with policy, we are voting for this proposal. |
| Greenshoe | Zustimmung | This authority grants the Company the flexibility to increase an over-subscribed issuance by up to 15%, so long as such increase takes place on the same terms and within thirty days of the initial issuance. In this case, the proposed greenshoe is subject to a cumulative limit of 19.1% of share capital for all share issuances, which is in line with policy. Consequently, we are voting against this proposal. |
| Authority to Increase Capital Through Capitalisations | Zustimmung | The successive or simultaneous capitalisation of reserves, retained earnings or additional paid-in capital would benefit shareholders by allowing the Company to increase paid-in capital through a series of alternatives, above and beyond the issuance of shares. Moreover, when companies capitalize reserves, retained earnings or paid-in capital, there is no risk of dilution. This procedure merely transfers wealth to shareholders and does not impact share value. Consequently, we are voting for this proposal. |
| Employee Stock Purchase Plan | Zustimmung | Currently, employees do not hold a significant portion of the Company`s share capital. Therefore, if the proposed plan is fully implemented, employee shareholdings would remain reasonable and in line with policy. Consequently, we are voting for this proposal. |
| Authority to Increase Capital in Consideration for Contributions In Kind | Zustimmung | In this case, the board will be authorised to potentially issue up to 5% of the Company`s current issued share capital without preemptive rights, subject to a limit of 9.5% of share capital for all share issuances without preemptive rights and a cumulative limit of 19.1% of share capital for all the Company's capital increases. | Global Ceiling on Capital Increases and Debt Issuances | Zustimmung | In general, the setting of global limits for issuances should be viewed in a positive fashion, as it serves as an additional level of protection for shareholders' interests, by minimizing the potentially significant dilution of a series of issuance requests to a fixed level. If approved this authority would represent a potential cumulative increase for share issuances of 19.1%, which is in line with policy. Consequently, we are voting for this proposal. |
| Amendments to Articles Regarding Staggered Board | Zustimmung | In this case, the entire board is currently elected for three-year terms. Allowing some directors to be elected each year or every two years does not violate policy and may raise board accountability by increasing the frequency at which shareholders can vote on the composition of the board. Therefore, we are supporting this proposal. |
| Amendments to Articles | Zustimmung | The proposed changes are primarily technical in nature and are intended to update the Company's articles of association to reflect current corporate governance standards and recommendations. Therefore, we are supporting this proposal. |
| Authorisation of Legal Formalities | Zustimmung | This is a routine legal formality in France. Consequently, we are voting for this proposal. |

| Authority to Give Guarantees | Zustimmung | In this case, the aggregate amount of guarantees provided by the Company and its subsidiaries, including the proposed guarantees discussed in this proposal, would be approximately RMB 4,764,346,300, accounting for approximately 67.58% of the net assets of the Company. As such, the proposed guarantees are within a reasonable range. Also the ability to offer guarantees will provide the Company and its subsidiary with the flexibility to access finance capital at a lower rate of interest. This proposal does not violate policy. Consequently, we are voting for this proposal. |
| Approve Conclusion of Projects and Utilization of Remaining Proceeds | Zustimmung | The management and the board should be in the best position to determine what operational decisions are best in the context of the business. | Appointment of Auditor and Authority to Set Fees | Zustimmung | As per Canadian market practice, the lead auditor`s name and tenure has not been disclosed in the company's proxy materials or annual report. However, the auditor has served for less than five years and the law requires rotation of the lead auditor every seven years. Moreover, there is no indication of any investigations or pending court cases pertaining to the auditor and the fees paid to the auditor in the last year were reasonable. Consequently, we are voting for this proposal. |
| Advisory Vote on Executive Compensation | Ablehnung | The Company's disclosure of its remuneration policies and procedures is in line with policy and applicable legislation. The report gives the impression of having been properly prepared. However:<br><br>The LTI does not include ESG criteria.<br>The board can grant discretionary bonuses. Specifically, Richard Dufresne received an award comprised of stock options in recognition of his role in supporting the senior management transition, valued at $4,000,009.<br>The Company has granted excessive sign-on bonuses. Specifically, Per Bank received a one-time make-whole sign on award, comprised of both RSUs and Cash, with a total value of $18,000,044. It is worth noting that Mr. Banks' awards are significantly in excess of the annual compensation generally received by the Company's former president, Galen G. Weston, during his period of service.<br>As this is against policy, we are voting against this proposal. |
| Shareholder Proposal Regarding In-Person Shareholder Meetings | Zustimmung | In this case, the proponent is requesting that the Company's annual meetings of the corporation be held in person, with virtual meetings being complementary and not replacing in-person meetings. An in-person meeting, complemented by a virtual option, is in line with policy, especially considering that virtual-only meetings have the potential to curb the ability of a company's shareholders to meaningfully communicate with a company's management. Consequently, we are voting for this proposal. |

| Accounts and Reports | Zustimmung | The Company's audited annual and consolidated accounts were available for review in advance of this shareholder meeting. As no evidence has been presented that would question the accuracy of these reports, one should consider this item as routine. Therefore, we are voting for this proposal. |
| Remuneration Report | Ablehnung | The Company's disclosure of its remuneration policies and procedures is in line with policy and applicable legislation. The report gives the impression of having been properly prepared. However:<br><br>The Company has failed to link pay with performance. Specifically, the CEO received remuneration that outpaced the compensation given to chief executives at both country and industry peers as a result of one-off incentive plan (the "enhanced delivery plan") awards that were granted in July 2021. It is worth noting that approximately 29.89% and 29.97% of shareholders voted against the Company's remuneration policy and the enhanced delivery plan proposal at the 2021 AGM, highlighting the significant shareholder opposition to the plan at the time of its introduction.<br>As this is against policy, we are voting against this proposal. |
| Remuneration Policy | Zustimmung | The Company's disclosure of its remuneration policies and procedures is in line with policy and applicable legislation. The report gives the impression of having been properly prepared. In addition, the remuneration paid to the executive board is not excessive and is comparable with industry peers. Consequently, we are voting for this proposal. |
| Amendment to Long-Term Incentive Plan | Zustimmung | The proposed amendments do not violate policy. Moreover, it is worth noting that while the maximum opportunity has increased under the LTIP, it is a one-off increase that will only apply for the CEO in FY2025. Further, the CEO will also not receive awards in respect of FY2026 and FY2027 and as such, their overall maximum opportunity under the long-term incentive plan remains unchanged for the three-year policy period.<br><br>Consequently we are voting for this proposal. |
| Final Dividend | Zustimmung | A proposed dividend allocation should be comparable to industry peers and should mirror the financial health of the company. In principle, an acceptable pay-out ratio should be above 20 percent and below 100 percent. The company's aggregate pay-out ratio for the fiscal year is in an acceptable range. Given this, we are voting for this proposal. |
| Elect Derek Mapp | Zustimmung | There are no evident reasons to doubt the qualification and suitability of nominee Derek Mapp. Consequently, we are supporting this director`s election. |
| Elect Phil Bentley | Zustimmung | There are no evident reasons to doubt the qualification and suitability of nominee Phil Bentley. Consequently, we are supporting this director`s election. |

| Allocation of Profits/ Dividends | Zustimmung | A proposed dividend allocation should be comparable to industry peers and should mirror the financial health of the company. In principle, an acceptable pay-out ratio should be above 20 percent and below 100 percent. The company's aggregate pay-out ratio for the fiscal year is in an acceptable range. Given this, we are voting for this proposal. |

| Accounts and Reports | Zustimmung | The Company's audited annual and consolidated accounts were available for review in advance of this shareholder meeting. As no evidence has been presented that would question the accuracy of these reports, one should consider this item as routine. Therefore, we are voting for this proposal. |

| Remuneration Policy | Ablehnung | The Company's disclosure of its remuneration policies and procedures is in line with policy and applicable legislation. The report gives the impression of having been properly prepared. However:<br><br>The Company has failed to implement executive stock ownership guidelines.<br>The board can grant discretionary bonuses. Under the 2024 policy, the board is proposing the implementation of a restricted and matching shares plan for the CEO only. The CEO received an exceptional award of ¬1,000,000 in FY2023 due to his extraordinary contribution to the successful outcome of the new industrial plan and other material initiatives. While the first tranche of the award, equal to ¬750,000, was paid during FY2023, the board proposed to pay the remainder ¬250,000 by converting them into rights to receive shares, as 'base quote' of the restricted and matching shares plan.In this case, particularly concerning is the fact that the base quota of the plan will be the deferred portion of a significant discretionary bonus, equal to 100% of the CEO's base salary, awarded in FY2023 with no performance conditions attached. As such, the board's decision to pay matching shares in addition to the portion of the extraordinary award converted into restricted shares ('base quota') should be questioned here. Further, the matching shares award will be tied to a single, absolute performance target.<br><br>As this is not entirely in line with policy, we are voting against this proposal. |

The report gives the impression of having been properly prepared. However:<br><br>The Company has failed to implement executive stock ownership guidelines.<br>The board granted discretionary bonuses. The CEO received an exceptional award amounting to ¬1,000,000 in the past fiscal year, due to his extraordinary contribution to the successful outcome of the new industrial plan and the launching of some important initiatives aimed at strengthening the internal structures of the organisation, through the acquisition of new skills useful for the execution of the Group's backlog. The first tranche of the award, equal to ¬750,000, was paid during FY2023, while the remainder ¬250,000 will be paid the end of mandate of the CEO, with the approval of the financial statements at the forthcoming AGM. Further, subject to shareholder approval of Proposal 0070, the second tranche will be converted into rights to receive shares, as 'base quote' of the restricted and matching shares plan.In this case, particularly concerning is the size of the award, which represents 100% of the CEO's annualised base salary. Having reviewed the proposed external auditors, there are no significant cause for concern with regard to the appointment of any of the options. Therefore, we are voting for this proposal. |
| Amendments to Articles | Ablehnung | Virtual-only meetings are not in line with policy. Unfortunately, in this case, the Company has bundled several amendments. Consequently, we are voting against this proposal. |
| Deliberations on Possible Legal Action Against Directors if Presented by Shareholders | Zustimmung | Where there is a violation of directors' duties, a solvent joint stock company can bring a liability action against the directors under Article 2393 of the Civil Code. Although any damages that the court awards are paid to the company rather than to the shareholders that have brought the action, it appears to be in shareholders' best interest to hold a director liable for a breach of his duties. As a result, it is recommended to view this item in a non-critical fashion should it occur.<br><br>Therefore, we are voting for this proposal. |

| Remuneration Report | Ablehnung | The Company's disclosure of its remuneration policies and procedures is in line with policy and applicable legislation. The report gives the impression of having been properly prepared. However:<br><br>The Company has failed to implement a formal LTI structure. As a result, variable remuneration consists solely of participation in the Management Incentive Plan ("MIP"), under which all awards are based upon one-year retrospective performance, which risks encouraging executives to place undue emphasis on short-term performance. | Ratification of Auditor | Ablehnung | There is no indication of any investigations or pending court cases pertaining to the auditor. | Shareholder Proposal Regarding Lobbying Report | Zustimmung | It should be noted that the Company provides disclosure of its direct and indirect political contributions, including an annually updated, itemized list of U.S. trade associations of which it is a member whose annual membership dues were $25,000 or higher and the percentage of dues spent on lobbying. It also restricts its funds from being used for election-related activities for all 501(c)(4) organization payments, and maintains board-level oversight of corporate political expenditures. Nevertheless, requests for increased transparency around a company's lobbying activities are in line with policy. Therefore, we are voting for this proposal. |
| Shareholder Proposal Regarding Mandatory Director Resignation Policy | Zustimmung | In the extremely small sample of directors who fail to receive majority support in any given year, boards have commonly chosen not to accept these resignations. Therefore, adoption of the proposed policy could benefit shareholders by promoting board accountability and ensuring responsiveness to shareholder concerns. Consequently, we are voting for this proposal. |
| Shareholder Proposal Regarding Congruency Report on Human Rights Policies | Ablehnung | It should be noted that the proponent of this proposal is the National Legal and Policy Center (NLPC), which has submitted shareholder proposals that, upon first impression, appear to be consistent with environmental and social proposals that call for information or action on enhancing companies' approaches to environmental and social factors but, upon further review, appear to be designed to inhibit companies' actions in such areas. The NLPC describes itself as a 501(c)(3) that 'promotes ethics in public life through research, investigation, education, and legal action,' and believes 'the best way to promote ethics is to reduce the size of government.' As part of the corporate integrity project on its website, the NLPC shares its concerns regarding 'woke' corporate executives, for instance posting articles about inclusive content 'devaluing' the Pixar franchise or about how the NLPC has reported Visa`s chair and CEO to the SEC for ongoing 'wokeness.' The project also examines a supposed pushback against ESG initiatives, featuring pieces such as one describing corporate America`s anti-racism programs as racist against white people and another promoting the NLPC`s efforts to nominate a fossil-fuel-supporting director candidate to the board of Exxon Mobil Corporation. Consequently, we are voting against this proposal. |

| Shareholder Proposal Regarding Charitable Contributions and Human Rights Congruency Report | Ablehnung | In this case, the proponent of this proposal is the National Center for Public Policy Research (NCPPR). The NCPPR describes itself as a 'communications and research foundation supportive of a strong national defense and dedicated to providing free-market solutions to today's public policy problems' that believes 'the principles of a free market, individual liberty and personal responsibility provide the greatest hope for meeting the challenges facing America in the 21st century.' A division of the NCPPR, the Free Enterprise Project ('FEP') describes itself as 'the conservative movement's only full-service shareholder activism and education program: It files shareholder resolutions, engages corporate CEOs and board members at shareholder meetings, petitions the Securities and Exchange Commission (SEC) for interpretative guidance, and sponsors effective media campaigns to create the incentives for corporations to stay focused on their missions.' This proponent has generally submitted proposals that appear to be focused on E&S issues on their face but are designed to frustrate the company's actions around ESG performance. Therefore, we are voting against this proposal. |
| Shareholder Proposal Regarding Report on Median Compensation and Benefits Related to Reproductive and Gender Dysphoria Care | Ablehnung | This proposal is requesting that the Company report on compensation and health benefits gaps, including how the Company addresses reproductive and gender dysphoria care, including associated policy, reputational, competitive, operational and litigative risks, and risks related to recruiting and retaining diverse talent. Moreover, the Company notes that it offers comprehensive health and wellbeing benefits for families, such as a hybrid work environment, paid vacation, paid sick leave, paid time off for new parents regardless of gender, sexual orientation, or caregiver status, financial support for adoption, surrogacy, and fertility treatments, back-up child care, and full or part-time child care services. In addition, the proponent, Stephen Caton, is designated as an anti-ESG proponent. Therefore, we are voting against this proposal. |

| Shareholder Proposal Regarding Government Censorship Transparency Report | Ablehnung | It should be noted that the proponent of this proposal is the National Legal and Policy Center ("NLPC"), which has submitted shareholder proposals that, upon first impression, appear to be consistent with environmental and social proposals that call for information or action on enhancing companies' approaches to environmental and social factors but, upon further review, appear to be designed to inhibit companies' actions in such areas. The NLPC describes itself as a 501(c)(3) that "promotes ethics in public life through research, investigation, education, and legal action," and believes "the best way to promote ethics is to reduce the size of government." As part of the corporate integrity project on its website, the NLPC shares its concerns regarding "woke" corporate executives, for instance posting articles about inclusive content "devaluing" the Pixar franchise or about how the NLPC has reported Visa's chair and CEO to the SEC for ongoing "wokeness." The project also examines a supposed pushback against ESG initiatives, featuring pieces such as one describing corporate America's anti-racism programs as racist against white people and another promoting the NLPC's efforts to nominate a fossil-fuel-supporting director candidate to the board of Exxon Mobil Corporation.<br><br>Currently, the Company states its ERM process, among other things, seeks to identify emerging risks in business operations and address them appropriately to limit negative consequences to the Company and the data it maintains. Further, it meets all requirements for accurate, timely reporting and documentation that may be required and cooperates with inspections and investigations, and when asked for information or records or to verify data that it has submitted to them, it is truthful and transparent<br><br>Finally, this proposal has also been labeled as "Anti-ESG" due to the shareholder proponent. These proponents have generally submitted proposals that address environmental and social issues and their aims are fairly clearly articulated in their supporting statements. Support for this resolution could buoy the proponents arguments and would advance a narrative that may contradict that of investors concerned about companies ESG performance. As a result, we are voting against this proposal. |
| Shareholder Proposal Regarding Report on Civil Rights and Non-Discrimination | Zustimmung | It is necessary that a concerted effort is made to ensure the Company has thoroughly assessed its potential adverse or discriminatory impacts on stakeholders, including its employees and prospective employees, ultimately benefits shareholders.<br><br>Moroever, as demands for increased transparency are generally in line with the basic policy requirements, we are voting for this proposal. |

| Elect Peggy Alford | Keine Zustimmung | There are no evident reasons to doubt the qualification and suitability of nominee Peggy Alford. However, the Company maintains a multi-class share structure with unequal voting rights and has not provided for a reasonable time-based sunset of the multi-class share structure (generally seven years or less). Multi-class voting structures are not in line with policy. The chair of the nominating and corporate governance committee is being held accountable for the failure to ensure that the economic stake of each shareholder matches their voting power and that no small group of shareholders, family or otherwise, has voting rights different from those of other shareholders.<br><br>Moreover, the nominee is the longest tenured director serving on the audit and risk oversight committee. According to the audit committee charter, this committee is responsible for the oversight of legal and regulatory matters. Responsibilities include reviewing the Company's program for promoting and monitoring compliance with applicable legal and regulatory requirements, and reviewing the Company's major legal compliance risk exposures, including steps management has taken to monitor and mitigate the exposures. In light of continued and ongoing concerns falling within the purview of the audit committee's responsibilities, shareholders should hold the nominee accountable for the committee and board's continued deficiency in risk oversight.<br><br>In addition, the policy requires the compensation committee chair to be independent.<br><br>Furthermore, the nominee served as a member of the compensation, nominating and governance committee during which time the board failed to implement a shareholder proposal that was approved by a majority of unaffiliated shareholders. At last year's annual meeting, a shareholder proposal requesting the Company take all practicable steps in its control to initiate and adopt a recapitalization plan for all outstanding stock to have one vote per share received the support of approximately 27.98% of votes cast (excluding abstentions and broker non-votes). Taking into account the Company's multi-class share structure, it appears that approximately 74.8% of unaffiliated shareholders supported this shareholder proposal at last year's meeting. Given this high level of unaffiliated shareholder support, the committee should have taken more steps to address the content requested by the proposal.<br><br>Consequently, we are voting against this director`s appointment. |

| Ratification of Auditor | Ablehnung | There is no indication of any investigations or pending court cases pertaining to the auditor. | Amendment to Certificate of Incorporation to Limit the Liability of Certain Officers | Ablehnung | Directors should be held to the highest standard when carrying out their duties to shareholders. The proposed amendment essentially removes liability for an officer's breach of his or her duty of care. In this case, the board has not persuasively demonstrated the need for the proposed provisions, which are not in line with best practice or policy. Consequently, we are voting against this proposal. |

| Amendment to the 2012 Equity Incentive Plan | Ablehnung | Remuneration plans should be adequately disclosed and should reward executives for good performance. According to policy, dilution for all compensation plans should be no higher than 10% of share capital. While the level of dilution is in line with policy, the plan contains a so-called "evergreen" provision that has the effect of reducing or eliminating the need for management to come back to shareholders to authorize additional stock for the equity-based compensation program.<br><br>In addition, the proposed plan permits the administrator to grant restricted stocks or other full-value awards in place of options. However, the plan does not have a multiplier in place to increase the reduction of shares with each restricted share granted under the plan. In delivering an equity compensation package, the Company would most likely use a lesser number of restricted shares than options to achieve the same monetary value. When the Company elects to use full-value grants but chooses not to account for the difference in share usage, the proposed plan lasts longer than it otherwise would and the total cost of the plan is greater.<br><br>Moreover, the proposed program gives the administrators the express right to reprice options that become significantly underwater. All plans that contain express repricing provisions like this one are not in line with best practice or policy. Consequently, we are voting against this proposal. |
| Shareholder Proposal Regarding Recapitalization | Zustimmung | Allowing one vote per share is in line with policy and generally operates as a safeguard for common shareholders by ensuring that those who hold a significant minority of shares are able to weigh in on issues set forth by the board, especially in regard to the director election process. Therefore, we are supporting this proposal. |
| Shareholder Proposal Regarding Report on AI Misinformation and Disinformation | Zustimmung | This proposal specifically requests that the board prepare a report assessing the risks to the Company's operations and finances, and to public welfare, presented by the Company's role in facilitating misinformation and disinformation disseminated or generated via generative artificial intelligence, as well as what steps the Company plans to take to remediate those harms and how it will measure the effectiveness of such efforts. While the Company provides Responsible AI Principles and disclosure of its policies and practices related to AI, its increased investment in and implementation of AI across its business, as well as its use of open source AI, expose the Company and its shareholders to a variety of risk factors, particularly if insufficient attention is paid to preventing issues like fabricating or promoting misinformation and disinformation. Moreover, such disclosure will better allow shareholders to fully consider and understand this evolving issue and incorporate these considerations into their investment decisions. Therefore, we are supporting this proposal. |

| Shareholder Proposal Regarding Disclosure of Vote Results by Share Class | Zustimmung | The Company has two classes of common stock outstanding, Class A common stock which entitles holders to one vote per share and Class B common stock which entitles holders to ten votes per share. Mark Zuckerberg, the Company's founder, chair and CEO, beneficially owns approximately 99.7% of the Class B common stock, representing approximately 61% of the total voting power. Separating the voting results of the subordinate shares and multiple voting shares may provide shareholders with more clarity concerning how subordinate shareholders have cast their votes with respect to certain voting items. Given that such disclosure is in line with policy, we are supporting this proposal. |
| Shareholder Proposal Regarding Report on Human Rights Risks in Non-U.S. Markets | Zustimmung | Although the Company has provided some disclosure and has taken some action with respect to the issues raised by the proponent, undertaking the requested reporting is in line with policy and would provide more assurance to shareholders that these human rights risks have been mitigated to the best extent possible. Therefore, we are supporting this proposal. |
| Shareholder Proposal Regarding  Allowing Lead Independent Director to Set Agenda | Zustimmung | This proposal specifically requests that the board amend its Corporate Governance Guidelines to provide that both the chair and the lead independent director have the ability to include items on the agenda independently of the other.Currently, the guidelines specify that the agenda is set in coordination between the chair and the independent directors. The ability to add items to the agenda, independent of the chair, is an important duty of a lead independent director. Moreover, the Company does not appear to provide any meaningful argument as to why adoption of this proposal would not serve shareholder interests. Therefore, we are supporting this proposal. |

| Shareholder Proposal Regarding Human Rights Impact Assessment of AI Used in Targeted Advertising | Zustimmung | The Company has provided enhanced disclosure by publishing its second Human Rights Report with findings from its internal human rights risk assessment. It has also taken steps to use those findings to adjust some of its targeted advertising practices, and it has established a new subscription service for users in the EU, European Economic Area, and Switzerland in an attempt to comply with the Digital Markets Act. Despite this, the Company has received several large fines in the past few months regarding data privacy violations, and it now faces multiple actions in the EU over data privacy concerns relating to its use of data for personalized ads and its new subscription service. Therefore, it is not clear that the steps the Company is taking to address these issues are sufficiently addressing the risks raised by this proposal. A more focused and independent assessment of the Company's impacts on human rights as a result of its targeted advertising is warranted, and commissioning the requested report is in line with policy and could help the Company better identify and mitigate risks and the associated disclosure would allow shareholders a more sufficient basis to understand how the Company is managing this matter. Therefore, we are supporting this proposal. |
| Shareholder Proposal Regarding Targets and Report on Child Safety Impacts | Zustimmung | Numerous investigations by the media have demonstrated the wide extent of problems related to child safety and the distribution of child exploitative content on the platforms maintained by the largest tech companies, including the Company. As such, management of this issue is of critical importance for companies involved in the distribution of digital media and messaging over the internet. The Company has not provided sufficient disclosure to demonstrate to shareholders that these risks will be managed by the Company, nor is there any reason to be assured that the Company will act proactively rather than reactively, as demonstrated by numerous controversies related to the distribution of high-risk content on its platform and messaging services. As such, the requested report and the adoption and reporting of targets is in line with policy and will provide shareholders with valuable information, so they can better understand this sensitive issue in the context of the Company's efforts to minimize harmful content on its platforms. Therefore, we are supporting this proposal. |

| Shareholder Proposal Regarding Report and Advisory Vote on Minimum Age for Social Media | Ablehnung | It should be noted that the proponent of this proposal is the National Legal and Policy Center (NLPC), which has submitted shareholder proposals that, upon first impression, appear to be consistent with environmental and social proposals that call for information or action on enhancing companies' approaches to environmental and social factors but, upon further review, appear to be designed to inhibit companies' actions in such areas. The NLPC describes itself as a 501(c)(3) that 'promotes ethics in public life through research, investigation, education, and legal action,' and believes 'the best way to promote ethics is to reduce the size of government.' As part of the corporate integrity project on its website, the NLPC shares its concerns regarding 'woke' corporate executives, for instance posting articles about inclusive content 'devaluing' the Pixar franchise or about how the NLPC has reported Visa`s chair and CEO to the SEC for ongoing 'wokeness.' The project also examines a supposed pushback against ESG initiatives, featuring pieces such as one describing corporate America`s anti-racism programs as racist against white people and another promoting the NLPC`s efforts to nominate a fossil-fuel-supporting director candidate to the board of Exxon Mobil Corporation. Consequently, we are voting against this proposal. |
| Shareholder Proposal Regarding Report on Prohibiting Political Advertising and Restoring Enhanced Actions | Zustimmung | This proposal is solely seeking disclosure of the impact of prohibiting all political advertising on its platforms and restoring the type of enhanced actions put in place during the 2020 election cycle to reduce false and divisive information. Given the Company's preeminent role in the social media landscape, the Company has an especially important role in ensuring the integrity of the information of its platform. As has been seen at the Company and elsewhere, allowing for election interference or the spread of misinformation and disinformation on its platforms or via its advertising could lead to significant legal, reputational, regulatory, and operational risks. Given that increased transparency in relation to how a company is managing such risks is in line with policy, we are supporting this proposal. |
| Shareholder Proposal Regarding Lobbying Activity Alignment with Net Zero Emissions Commitment | Zustimmung | The Company does not have particularly robust disclosure with regard to the alignment between its lobbying and the goals of the Paris Agreement and its own net zero climate commitments. Given that increased transparency in relation to how a company's activities align with net zero emissions committments is in line with policy, we are supporting this proposal. |

| Accounts and Reports | Zustimmung | The Company's audited annual and consolidated accounts were available for review in advance of this shareholder meeting. As no evidence has been presented that would question the accuracy of these reports, one should consider this item as routine. Therefore, we are voting for this proposal. |
| Allocation of Profits/ Dividends | Zustimmung | A proposed dividend allocation should be comparable to industry peers and should mirror the financial health of the company. In principle, an acceptable pay-out ratio should be above 20 percent and below 100 percent. The company's aggregate pay-out ratio for the fiscal year is in an acceptable range. Given this, we are voting for this proposal. |
| Consolidated Accounts and Reports | Zustimmung | The Company's audited annual and consolidated accounts were available for review in advance of this shareholder meeting. As no evidence has been presented that would question the accuracy of these reports, one should consider this item as routine. Therefore, we are voting for this proposal. |
| Special Auditors Report on Regulated Agreements | Zustimmung | The audit report states that there are no new agreements of this type to be submitted for shareholder approval. Consequently, we are voting for this proposal. |
| Authority to Repurchase and Reissue Shares | Ablehnung | At this time, there is no evidence of any past abuse of this type of authority at the company. However, the maximum price has been disclosed in monetary value only, instead of 10% premium or discount of market price. As this is against policy, we are voting against this proposal. |
| 2024 Remuneration Policy (Managers) | Ablehnung | The Company's disclosure of its remuneration policies and procedures is in line with policy and applicable legislation. The report gives the impression of having been properly prepared. However:<br><br>The proposed remuneration policy lacks bonus-malus and/ or any recovery provisions.<br>The report does not provide transparency on chosen indices, benchmarks or peer-groups.<br>As this is against policy, we are voting against this proposal. |

| Authority to Issue Shares and Convertible Debt w/o Preemptive Rights | Ablehnung | In this case, the board will be authorised to potentially issue up to 9.8% of the Company`s current issued share capital without preemptive rights, which is in line with policy. However, the share issuances proposed by the Company are subject to a cumulative limit of 35% for all share issuances. As the global ceiling exceeds the cumulative limit for all share issuances set by policy, we are voting against this proposal. |
| Authority to Issue Shares and Convertible Debt Through Private Placement | Ablehnung | In this case, the board will be authorised to potentially issue up to 9.8% of the Company`s current issued share capital without preemptive rights, which is in line with policy. However, the share issuances proposed by the Company are subject to a cumulative limit of 35% for all share issuances. As the global ceiling exceeds the cumulative limit for all share issuances set by policy, we are voting against this proposal. |
| Authority to Set Offering Price of Shares | Ablehnung | This proposal seeks shareholder authority French companies to issue securities without preemptive rights at a 10% discount, so long as the increases do not exceed 10% of their share capital in any 24-month period. In this case, the proposed discount specifically applies to proposals 18 and 19, which seek authority to potentially issue up to 9.8% of the Company`s current issued share capital without preemptive rights, which is line with the limit for share issuances without preemptive rights set by policy. However, in total, the Company's proposed capital increases are subject to a cumulative limit of 35% of share capital, which exceeds the cumulative limit set by policy. Consequently, we are voting against this proposal. |
| Greenshoe | Ablehnung | This authority grants the Company the flexibility to increase an over-subscribed issuance by up to 15%, so long as such increase takes place on the same terms and within thirty days of the initial issuance. In this case, the proposed greenshoe is subject to a cumulative limit of 35% of share capital for all share issuances, which exceeds the cumulative limit set by policy. Consequently, we are voting against this proposal. |
| Authority to Increase Capital Through Capitalisations | Zustimmung | The successive or simultaneous capitalisation of reserves, retained earnings or additional paid-in capital would benefit shareholders by allowing the Company to increase paid-in capital through a series of alternatives, above and beyond the issuance of shares. Moreover, when companies capitalize reserves, retained earnings or paid-in capital, there is no risk of dilution. This procedure merely transfers wealth to shareholders and does not impact share value. Consequently, we are voting for this proposal. |

| Authority to Increase Capital in Consideration for Contributions in Kind and in Case of Exchange Offer | Ablehnung | In this case, the board will be authorised to potentially issue up to 9.8% of the Company`s current issued share capital without preemptive rights, which is in line with policy. However, the share issuances proposed by the Company are subject to a cumulative limit of 35% for all share issuances. As the global ceiling exceeds the cumulative limit for all share issuances set by policy, we are voting against this proposal. |
| Employee Stock Purchase Plan | Zustimmung | Currently, employees do not hold a significant portion of the Company`s share capital. Therefore, if the proposed plan is fully implemented, employee shareholdings would remain reasonable and in line with policy. Consequently, we are voting for this proposal. |
| Global Ceiling on Capital Increases and Debt Issuances | Ablehnung | In general, the setting of global limits for issuances should be viewed in a positive fashion, as it serves as an additional level of protection for shareholders' interests, by minimizing the potentially significant dilution of a series of issuance requests to a fixed level. However, if approved this authority would represent a potential cumulative capital increase of 35% of share capital, which exceeds the cumulative limit set by policy. Consequently, we are voting against this proposal. |
| Authority to Cancel Shares and Reduce Capital | Zustimmung | This is a routine request in France. Consequently, we are voting for this proposal. |
| Authorisation of Legal Formalities | Zustimmung | This is a routine legal formality in France. Consequently, we are voting for this proposal. |

The NLPC describes itself as a 501(c)(3) that "promotes ethics in public life through research, investigation, education, and legal action," and believes "the best way to promote ethics is to reduce the size of government." However, as the board of directors does not have sufficient gender diversity, we are voting against all male directors.<br><br>Moreover, as the board of directors does not comprise an adequate number of independent members, we are voting against all insider and affiliated directors.<br><br>Nominee Christopher Carvalho received SEK 889,000 from MTGx Gaming Holding, a group company, for consulting services during the most recently completed fiscal year. The need for the Company to engage in consulting relationships with its directors should be questioned. Such relationships can potentially create conflicts for directors, as they may be forced to weigh their own interests in relation to shareholder interests when making board decisions. In addition, the Company`s decision regarding where to turn for the best professional services may be compromised when doing business with a professional services firm represented by the Company`s directors. Consequently, we are opposing the election of this nominee. |

| Billigung des Vergütungsberichts | Zustimmung | Über das Vergütungssystem wurde zuletzt im Jahr 2021 abgestimmt und erlangte eine Zustimmungsquote von 86,25%.<br>Das System ist noch in Einklang mit den Richtlinien, auch wenn manche Komponenten in einem grenzwertigen Bereich sind. Beispielsweise ist es marktüblich, dass Fokus und Gewichtung weniger auf der fixen und deutlich stärker auf der variablen Komponente basieren. Zudem sollten sowohl STI als auch LTI mindestens jeweils zwei jeweils unterschiedliche, klar vordefinierte Leistungskriterien umfassen. Anpassungen durch weitere Faktoren um beispielsweise +/-10 Prozent sollten hierzu lediglich ergänzend sein. Da bereits feststeht, dass das System in diesem Jahr geprüft und 2025 erneut zur Billigung vorgelegt wird, kann der Antrag jedoch noch unkritisch betrachet werden. Somit stimmen wir für den Antrag. |
| Beschlussfassung über die Wahl von Aufsichtsratsmitgliedern: Nikolaus von Bomhard | Zustimmung | Es ergeben sich keine Anhaltspunkte, welche Zweifel an der Qualifikation und Eignung von Nikolaus von Bomhard begründen könnten. Zwar waren die Ausschüsse bislang nicht mehrheitlich unabhängig besetzt, weshalb die Wiederwahl nicht unabhängiger Aufsichtsratsmitglieder kritisch gesehen werden sollte. Da sonst jedoch keine weiteren als abhängig klassifizierten Mitglieder gewählt werden sollen, dann dies zumindest in den nächsten beiden Jahren nicht mehr der Fall sein. Daher kann diese Wahl in den Aufsichtsrat unkritisch gesehen werden. Somit stimmen wir für den Antrag. |

| Beschlussfassung über die Ermächtigung zum Erwerb und zur Verwendung eigener Aktien, zur Möglichkeit des Andienungs- und Bezugsrechtsausschlusses, zur Einziehung erworbener eigener Aktien sowie über die Aufhebung der bestehenden Ermächtigung | Zustimmung | In diesem Fall schlägt die Gesellschaft eine Laufzeit von 3 Jahren vor. Dies entspricht nicht den Richtlinien, welche eine maximale Laufzeit von 2 Jahren vorsehen. Aufgrund des hervorragenden Geschäftsverlauf im vergangenen Geschäftsjahr und der umfangreichen Kapitalausstattung stimmen wir nach interner Absprache mit dem Aktienanalysten in diesem Einzelfall ausnahmsweise für den Aktienrückkauf. |

| Accounts and Reports | Zustimmung | The Company's audited annual and consolidated accounts were available for review in advance of this shareholder meeting. As no evidence has been presented that would question the accuracy of these reports, one should consider this item as routine. Therefore, we are voting for this proposal. |
| Remuneration Report | Ablehnung | The Company's disclosure of its remuneration policies and procedures is in line with policy and applicable legislation. The report gives the impression of having been properly prepared. However:<br><br>The Company has failed to implement executive stock ownership guidelines.<br>Compensation is not linked to materially significant ESG indicator.<br>Less than at least 2 KPIs are used as performance STI criteria, which is solely based on Pre-tax EPS, and less than at least 2 KPIs are used as performance LTI criteria, which is solely based on relative TSR.<br>As this is against policy, we are voting against this proposal. |
| Final Dividend | Zustimmung | A proposed dividend allocation should be comparable to industry peers and should mirror the financial health of the company. In principle, an acceptable pay-out ratio should be above 20 percent and below 100 percent. The company's aggregate pay-out ratio for the fiscal year is in an acceptable range. Given this, we are voting for this proposal. |
| Elect Venetia Butterfield | Zustimmung | There are no evident reasons to doubt the qualification and suitability of nominee Venetia Butterfield. Consequently, we are supporting this director`s election. |

| Issuance of Preference Shares for Acquisition | Ablehnung | This proposal would allow the board to issue 4 million preference shares to Poularde AB in connection with the share transfer agreement as disclosed in detail in Proposal 8.<br><br>However, as any issuance of preference shares is not in line with policy, we are voting against this proposal. |
| Acquisition of Frösö Park Fastighets AB and a 29.6% stake in Cibola Holding AB | Ablehnung | Proposals 7 and 8 are inter-conditional.<br><br>In this case, the Company seeks to acquire the ownership stakes in two entities from one of its major shareholders and board member Mia Bäckvall Juhlin. The board states Mia Bäckvall Juhlin has not and will not be involved in the board's preparation of and decision-making regarding the proposed acquisition. This, coupled with the requirement for the transaction to be approved by the majority of disinterested shareholders, indicates  that adequate safeguards for the rights of disinterested shareholders are in place in the proposed transaction. Moreover, it is believed that the proposed arrangement is strategically reasonable.<br>Overall, the proposal appears to be transparent and as such, there are no immediate goverance concerns which could be linked to a violation of the guidelines. It needs to be noted though, that the Company will issue preference shares in connection with the aforementioned share transfer agreement, which is not in line with policy. We are therefore opposing this proposal. |

| Elect Lawrence S. Coben | Zustimmung | There are no evident reasons to doubt the qualifications and suitability of nominee Lawrence S. Coben. It should be noted that given the information provided, the candidate currently holds too many mandates to be in line with policy (Interim Chair/CEO - NRG Energy, Inc; Director - Freshpet, Inc). Moreover, this director is serving as the combined Chair/CEO, which is against policy. However, the nominee only assumed the role of interim CEO of the Company in November 2023 following the departure of the previous CEO. Moreover, the Company has stated that it plans to return to separate roles of Chair and CEO upon the appointment of a permanent CEO. Given the relatively recent nature of his appointment to an interim CEO position, his mandates and combined Chair/CEO role are not deemed critical. Consequently, we are supporting this director`s election. |

| Advisory Vote on Executive Compensation | Ablehnung | The Company's disclosure of its remuneration policies and procedures is in line with policy and applicable legislation. The report gives the impression of having been properly prepared. However:<br><br>The Company has failed to link pay with performance. However, it is worth noting that equity awards granted to the former CEO were forfeited upon his departure and the interim CEO RSUs granted to Mr. Coben will be prorated based on the time he serves in this current position.<br>Severance package payments are not limited to a maximum of two-years` salary.<br>Less than at least 2 KPIs are used as performance LTI criteria, which is based solely on relative TSR.<br>The LTI does not include ESG criteria.<br>The board can grant discretionary bonuses. Specifically, Lawrence S. Coben received an RSU award, valued at $11,924,989, following his appointment as interim CEO. In addition, Alberto Fornaro received a cash severance payment of $1,139,839. Lastly, Rasesh Patel received a cash payment of $850,000 in connection with the terms of his employment agreement with Vivint.<br>As this is against policy, we are voting against this proposal. |

| Authority to Repurchase and Pledge Shares | Ablehnung | At this time, there is no evidence of any past abuse of this type of authority at the company. However, the Company would be authorised to repurchase up to 20% of the Company's share capital, which is not in line with policy. Moreover, the maximum price exceeds the limits set by policy. Consequently, we are voting against this proposal. |
| Issuance of Treasury Shares | Ablehnung | In this case, the Company is seeking to renew the authorisation of the board of directors to reissue its treasury shares on or outside the stock market. However, the Company has failed to outline if such an authority would allow this to be used in the case of an anti-takeover device as it was outlined at the 2022 AGM. As a result, we are voting against this proposal. |
| Increase in Authorised Capital | Ablehnung | This authority would represent a potential increase of approximately 100% over currently issued capital, which exceeds the policy threshold for this type of issuance request. As a result, we are voting against this proposal. |

| Accounts and Reports; Allocation of Dividends | Zustimmung | A proposed dividend allocation should be comparable to industry peers and should mirror the financial health of the company. In principle, an acceptable pay-out ratio should be above 20 percent and below 100 percent. The company's aggregate pay-out ratio for the fiscal year is in an acceptable range. Given this, we are voting for this proposal. |
| Ratification of Board Acts | Ablehnung | There is no indication of any investigations or pending court cases pertaining to current member of the Board of Directors and the Chief Executive Officer at the company. However, several governance and transparency requirements have not been met:<br><br>The board of directors is not sufficiently independent.<br>As this is contrary to policy, we are voting against this proposal. |
| Ratification of Auditor's Acts | Zustimmung | This ratification will not be valid if the financial statements contain any omission or false statement on behalf of management with regards to the Company's financial performance.<br><br>There is no indication of any investigations or pending court cases pertaining to the Company`s auditors. In the absence of any specific concerns one should consider this request as routine. Consequently, we are voting for this proposal. |

| Shareholder Proposal Regarding Simple Majority Vote | Zustimmung | If approved, amendments to the Company's bylaws and certificate of incorporation will be effective upon the affirmative vote of the holders of a majority of votes cast. The removal of supermajority vote requirements are generally considered market best practice in the US, as they may act as impediments to takeover proposals and impede shareholders' ability to approve ballot items that are in their interests. It should be noted that during the 2023 proxy season, shareholder proposals regarding simple majority voting received an average of 61% shareholder support, excluding abstentions and broker non-votes, indicating strong shareholder interest in instituting this standard in U.S. companies. It is also worth noting that this proposal is advisory only, and the board does not recommend a vote either for or against this proposal. The board states that it is interested in considering the viewpoints of all the Company's shareholders and will evaluate the voting results of this proposal, together with additional input received in the course of its regular shareholder engagement program. Therefore, we are voting for this proposal. |

| Authority to Issue Shares w/o Preemptive Rights | Ablehnung | In this case, the board will be authorised to potentially issue up to 20% of the Company`s current issued share capital without preemptive rights. | Authority to Issue Repurchased Shares | Ablehnung | This proposal is conditional upon the passing of the Proposals 5A and 5B, which we opposed. In addition, the Company has not provided the maximum discount rate in its disclosures, which is against policy. Consequently, we are voting against this proposal. |
| Termination of the 2018 Share Option Scheme | Zustimmung | This proposal seeks shareholder approval to terminate the 2018 Share Option Scheme, which does not violate policy. Consequently, we are voting for this proposal. |

| Advisory Vote on Executive Compensation | Ablehnung | The Company's disclosure of its remuneration policies and procedures is in line with policy and applicable legislation. The report gives the impression of having been properly prepared. However:<br><br>The Company has failed to link pay with performance.<br>Compensation is not linked to materially significant ESG indicator.<br>Less than at least 2 KPIs are used as performance STI criteria.<br>There is no performance-based long-term incentive for executives other than CEO Safra A. Catz and Chariman and CTO Lawrence J.Ellison (who both hold outstanding front-loaded performance stock options). The Company continues to cite concerns that awarding performance-based long-term incentive compensation to these particular executive officers could create undesirable incentives, though the Company does not elaborate on these concerns. It should be noted that Vice Chairman Jeffrey O. Henley and EVP, Chief Corporate Architect Edward Screven, who both received RSU grants during the year in review, do participate in the performance-based short-term incentive. It is unclear from the Company's disclosure why it believes that participation in a performance-based long-term incentive program would create perverse incentives that participation in a short-term performance-based program does not.<br>The Company received approximately 73% support for its advisory vote on executive compensation at last year's annual meeting.  The Company continued to provide no improvements, opting instead for much of the same rationalizing of its pay program that has been provided in prior years and reiterating previously made commitments.<br>Chariman and CTO Lawrence J.Ellison received approximately $3.0 million in perquisites from the Company, which largely consisted of security services. The Company discloses that the $3.0 million budget that was approved for Mr. Ellison's security services in FY2024 was based on a review of the actual and credible threats made against the Company's senior executives during the last completed fiscal year. While any amount not used would be refunded to the Company, it should be noted that Mr. Ellison appeared to use nearly his entire budget, with $2,999,264 being reported in the Summary Compensation Table related to security expenses for Mr. Ellison. Shareholders should question the nature of the perquisites and consider whether they represent the best use of the Company's capital as excessive perquisites can underscore broader concerns with the structure and/or quantum of a compensation program.<br>As this is not entirely in line with policy, we are voting against this proposal. |

| Shareholder Proposal Regarding Report on Portfolio Risk in Employee Retirement Options | Ablehnung | This proposal requests that the Company report on how it is protecting plan beneficiaries, especially those with a longer investment time horizon, from increased future portfolio risk created by present-day investments in high-carbon companies. Employees have significant discretion as to where their investments are directed and should retain such discretion. This proposal appears to be implicitly asking the Company to influence the manner in which these employees invest their retirement savings, which arguably could cause greater risk to the Company should it be seen as pushing an agenda that is not necessarily shared by all employees or one that could potentially result in lower returns than a more traditional retirement account. Although higher transparency is in many cases desirable, we ultimately find the proponents' argument to be weak and do not view reporting on the Company's retirement plan options in the manner suggested by this proposal to be a prudent use of Company resources. We also do not believe the proponent has successfully articulated any kind of meaningful risk that the Company faces on account of this matter. Accordingly, we do not believe support for this proposal is warranted or that it serves the interests of shareholders. |

The proposed amendment is an improvement over the Company's current provisions which do not allow shareholders to call a special meeting at any ownership threshold.<br><br>Consequently, we are voting for this proposal. |

| Shareholder Proposal Regarding Severance Approval Policy | Ablehnung | In this case, the Company has adopted a policy, under which it states that the Company will not enter into any new agreement that provides, or amend any existing agreement to provide, any Section 16 officer the right to any cash severance payment that would exceed 2.99 times the sum of such officer's base salary plus target bonus without shareholder approval. This demonstrates appropriate responsiveness to the matter. Accordingly, we are voting against this proposal. |
| Shareholder Proposal Regarding Report on Compensation and Health Benefit Gaps | Ablehnung | It should be noted that the proponent of this proposal is the National Legal and Policy Center ("NLPC"), which has submitted shareholder proposals that, upon first impression, appear to be consistent with environmental and social proposals that call for information or action on enhancing companies' approaches to environmental and social factors but, upon further review, appear to be designed to inhibit companies' actions in such areas. The NLPC describes itself as a 501(c)(3) that "promotes ethics in public life through research, investigation, education, and legal action," and believes "the best way to promote ethics is to reduce the size of government." As part of the corporate integrity project on its website, the NLPC shares its concerns regarding "woke" corporate executives, for instance posting articles about inclusive content "devaluing" the Pixar franchise or about how the NLPC has reported Visa`s chair and CEO to the SEC for ongoing "wokeness." The project also examines a supposed pushback against ESG initiatives, featuring pieces such as one describing corporate America`s anti-racism programs as racist against white people and another promoting the NLPC`s efforts to nominate a fossil-fuel-supporting director candidate to the board of Exxon Mobil Corporation.<br><br>Given the Company's existing disclosures, the proponent has failed to provide convincing rationale that adoption of this proposal would meaningfully add to shareholders' understanding of how the Company is ensuring equitable compensation or that the proposed disclosure would help to mitigate potential risks associated with this matter. Moreover, this proposal has been labeled as "Anti-ESG" due to the shareholder proponent. Consequently, we are voting against this proposal. |
| Shareholder Proposal Regarding Mandatory Director Resignation Policy | Zustimmung | Adoption of the proposed policy would improve shareholders' rights by promoting board accountability and ensuring responsiveness to shareholder concerns. Moreover, the terms of this proposal are reasonable and could be adopted in such a manner that prevents a worst-case scenario should a director be required to depart from the board. Therefore, we are voting for this proposal. |

| Shareholder Proposal Regarding Report on Biodiversity Loss | Zustimmung | Generally speaking, it is prudent for management to assess its potential exposure to all risks, including environmental and social concerns and regulations pertaining thereto in order to incorporate this information into its overall business risk profile. The Company publicly discloses its sustainability goals for itself and its suppliers, including those related to deforestation, and provides its stewardship of forests and natural ecosystems policy and global policy on sustainable palm oil, among other things.<br><br>Nonetheless, as demands for increased transparency around biodiversity concerns are generally in line with the basic policy requirements, we are voting for this proposal. |
| Shareholder Proposal Regarding Racial Equity Audit | Zustimmung | It appears the Company provides reasonable disclosure regarding its efforts, commitments, and policies concerning racial equity, and provides board oversight of the matter. The Company further states it has engaged an independent third party to assess its policies and practices across the pillars of representation, compensation, workplace culture, business practices, and contributions and investments as it relates to Black and Hispanic cohorts.<br><br>Nonetheless, production of the requested disclosure could better allow shareholders to understand how the Company was identifying and mitigating potentially significant risks. Moreover, as demands for increased transparency are generally in line with the basic policy requirements, we are voting for this proposal. |

| Shareholder Proposal Regarding Diversity and Inclusion Report | Ablehnung | While increased disclosure around diversity is typically in line with policy, in this case, the proponent of this proposal is the National Center for Public Policy Research ("NCPPR). The NCPPR describes itself as a 'communications and research foundation supportive of a strong national defense and dedicated to providing free-market solutions to today's public policy problems' that believes 'the principles of a free market, individual liberty and personal responsibility provide the greatest hope for meeting the challenges facing America in the 21st century.' A division of the NCPPR, the Free Enterprise Project ('FEP') describes itself as 'the conservative movement's only full-service shareholder activism and education program: It files shareholder resolutions, engages corporate CEOs and board members at shareholder meetings, petitions the Securities and Exchange Commission (SEC) for interpretative guidance, and sponsors effective media campaigns to create the incentives for corporations to stay focused on their missions.' This proponent has generally submitted proposals that appear to be focused on E&S issues on their face but are designed to frustrate the company's actions around ESG performance.<br><br>Further, the Company provides disclosure of its diversity initiatives, including its U.S. employee racial and ethnic diversity and global gender data. It also maintains board-level oversight of DEI issues. Therefore, we are voting against this proposal. |
| Shareholder Proposal Regarding Transparency Report on Global Public Policy and Political Influence | Zustimmung | Companies should provide sufficient disclosure of the use of company funds for political purposes, including grants made to politically active trade associations, in order to allow shareholders to evaluate the use of such grants as well as the oversight provided over the making of such grants. Shareholders should evaluate whether the benefits of the additional disclosure outweigh the burden to the company.<br><br>As demands for increased transparency are generally in line with the basic policy requirements, we are voting for this proposal. |

| Elect Ronald E. Blaylock | Zustimmung | There are no evident reasons to doubt the qualification and suitability of nominee Ronald E. Blaylock. Consequently, we are supporting this director`s election. |

However, this director will be serving as the combined Chair/CEO in the upcoming year, which is against policy.<br><br>In addition, the Company has failed to disclose its biodiversity policy, which is not in line with policy. As such, we are voting against the re-election of this director as the board chair.<br><br>Consequently, we are opposing this director`s election. |

| Elect Shantanu Narayen | Ablehnung | There are no evident reasons to doubt the qualification and suitability of nominee Shantanu Narayen. However, given the information provided, the candidate holds too many mandates to be in line with policy (Director - Pfizer Inc.; CEO/Chair - Adobe Inc.). Consequently, we are opposing this director`s election. |
| Elect Suzanne Nora Johnson | Ablehnung | There are no evident reasons to doubt the qualification and suitability of nominee Suzanne Nora Johnson. However, the nominee has already been a non-executive member of the board for more than 15 years, which is against policy.<br><br>In addition, the policy requires the audit committee chair to be independent. Consequently, we are opposing this director`s election. |

| Elect James Quincey | Ablehnung | There are no evident reasons to doubt the qualification and suitability of nominee James Quincey. However, given the information provided, the candidate holds too many mandates to be in line with policy (Director - Pfizer Inc.; CEO/Chair - The Coca-Cola Company). Consequently, we are opposing this director`s election. |
| Elect James C. Smith | Ablehnung | The policy requires the compensation committee chair to be independent. As nominee James C. Smith is not considered independent, we are opposing this director`s election. |
| Ratification of Auditor | Ablehnung | There is no indication of any investigations or pending court cases pertaining to the auditor. Moreover, the fees paid to the auditor are appropriate and are clearly disclosed by the Company. However, the same firm has audited the Company for more than 10 years, which is not in line with policy.<br><br>Moreover, as per US market practice, the lead auditor`s name and tenure has not been disclosed in the company's proxy materials or annual report.<br><br>Consequently, we are voting against this proposal. |
| Amendment to the 2019 Stock Plan | Zustimmung | According to policy, dilution for all compensation plans should be no higher than 10% of share capital.<br>Given that the company`s plan is fully compliant with policy and, in the absence of any evidence of past abuse by the company of this type of authority, we are supporting this proposal. |
| Advisory Vote on Executive Compensation | Ablehnung | The Company's disclosure of its remuneration policies and procedures is in line with policy and applicable legislation. The report gives the impression of having been properly prepared. However:<br><br>The Company has failed to link pay with performance.<br>The board can grant discretionary bonuses.<br>The remuneration structure allows for adjusted awards.<br>The LTI does not include ESG criteria.<br>The STI payouts are largely discretionary.<br>As this is against policy, we are voting against this proposal. |
| Shareholder Proposal Regarding Independent Chair | Zustimmung | Although policy does not require that the board chair be an independent director, this proposal is largely focused on the seperation of the roles of chair and CEO. Currently, the Company has a combined chair/CEO, which is not in line with policy. Moreover, the shareholder proponent has put forth adequate justification for their proposal. Therefore, we support the shareholder proposal after carefully weighing the arguments. |

| Shareholder Proposal Regarding Report on Political Expenditures and Values Congruency | Zustimmung | Companies should provide sufficient disclosure of the use of company funds for political purposes, including grants made to politically active trade associations, in order to allow shareholders to evaluate the use of such grants as well as the oversight provided over the making of such grants. Shareholders should evaluate whether the benefits of the additional disclosure outweigh the burden to the company.<br><br>Although the Company provides disclosure regarding its direct and indirect political contributions and lobbying expenditures, demands for increased transparency are generally in line with the basic policy requirements. As a result, we are voting for this proposal. |
| Shareholder Proposal Regarding Director Resignation Policy | Keine Stimmabgabe | This proposal has been withdrawn. As a result, this can be treated as a non-voting proposal. |
| Shareholder Proposal Regarding Corporate Contributions Disclosure | Ablehnung | It should be noted that the proponent of this proposal is the National Center for Public Policy Research ("NCPPR"). NCPPR has a history of submitting shareholder proposals that, upon first impression, appear consistent with environmental and social proposals that call for information or action on enhancing companies' approaches to environmental and social factors but, upon further review, appear to be designed to inhibit companies' actions in such areas. The NCPPR describes itself as a "communications and research foundation supportive of a strong national defense and dedicated to providing free-market solutions to today's public policy problems" that believes "the principles of a free market, individual liberty and personal responsibility provide the greatest hope for meeting the challenges facing America in the 21st century." A division of the NCPPR, the Free Enterprise Project, routinely engages companies on issues such as healthcare, immigration, gun rights, energy, taxes, religious freedom, media bias, corporate free speech, and ideological diversity, among other issues, often by questioning executives at annual meetings or through the submission of shareholder proposals.<br><br>This proposal has been labeled as "Anti-ESG" due to the shareholder proponent. These proponents have generally submitted proposals that address environmental and social issues and their aims are fairly clearly articulated in their supporting statements. We are concerned that support for this resolution would buoy the proponents arguments and would advance a narrative that may contradict that of investors concerned about companies ESG performance. As a result, we are voting against this proposal. |

| Adoption of New Articles (Adoption of One-Tier Board Structure) | Ablehnung | Having reviewed the proposed amendments, it should be noted that the change in board structure would bring with it mostly positive improvements to the Company's current structure and better align the Company with international best practice.<br><br>Unfortunately, in this case, the Company has bundled several amendments, some of which are not in line with policy.<br><br>However, if approved, shareholders' meetings may be held exclusively through telecommunication means. Moreover, if approved, the Company may appoint a shareholder representative allowed to vote by proxy and determine that at the shareholders' meetings participation and voting rights can be exercised exclusively through the designated representative, according to legal provisions in place at any given time.<br><br>As such, the proposed amendments are not in line with policy. Consequently, we are voting against this proposal. |
| Accounts and Reports | Zustimmung | The Company's audited annual and consolidated accounts were available for review in advance of this shareholder meeting. As no evidence has been presented that would question the accuracy of these reports, one should consider this item as routine. Therefore, we are voting for this proposal. |
| Allocation of Dividends | Zustimmung | A proposed dividend allocation should be comparable to industry peers and should mirror the financial health of the company. In principle, an acceptable pay-out ratio should be above 20 percent and below 100 percent. The company's aggregate pay-out ratio for the fiscal year is in an acceptable range. Given this, we are voting for this proposal. |

| Authority to Repurchase and Reissue Shares | Ablehnung | At this time, there is no evidence of any past abuse of this type of authority at the company. | Directors' liability action | Zustimmung | Where there is a violation of directors' duties, a solvent joint stock company can bring a liability action against the directors under Article 2393 of the Civil Code. Although any damages that the court awards are paid to the company rather than to the shareholders that have brought the action, it appears to be in shareholders' best interest to hold a director liable for a breach of his duties. However, the Company has not published this director`s CV (age) as is required by policy.<br><br>Moreover, the Company has failed to disclose its biodiversity policy, which is not in line with policy. In this case, the Company notes that the dissent was driven, in part, by shareholder concerns about ESG-related matters, with director Baldwin targeted due to his position as chair of the Company's ESG committee. While the Company states that it significantly extended the level of disclosure provided around its environmental footprint in the 2022 annual report, no further detail is provided on the specific concerns raised by shareholders. | Reverse Merger (with Triton Water Parent, Inc.) | Zustimmung | Based on the disclosure presented in the Company's merger proxy statement, it's unclear how extensive of an outreach the Company undertook in prior years, as the Company did not specify the exact number of third parties it engaged with. That being said, it should be acknowledged that the Company's strategic review spanned multiple years and seemingly involved the consideration of a wide range of potential alternatives, as evidenced by the Company's sale of a significant portion of its international business in late 2023. It should be also recognized that the Company operates in a relatively consolidated industry, which may limit the number of industry players with the strategic interest and financial wherewithal to pursue a transaction with the Company as a whole. Furthermore, in the months preceding the execution of the Arrangement Agreement, no third party other than BlueTriton made an offer for the Company as a whole, and no third party has emerged since the announcement of the deal with a competing offer.<br>Overall, it is believed the proposed transaction is supported by a compelling strategic and financial rationale. The proposed transaction should enable the Company to expand its scale and geographic reach, as well as realize meaningful cost synergies. Furthermore, based on the findings from BMO's and BofA Securities' respective valuation analyses, it is believed the terms of the merger consideration are largely favorable, from the perspective of the Company and its shareholders.<br>Overall, the proposal appears to be transparent and as such, there are no immediate goverance concerns which could be linked to a violation of the guidelines. It needs to be noted though, that after the transaction and subject to the "Stockholders Agreement" certain governance and other rights set forth in the Stockholders Agreement and NewCo's certificate of incorporation will be specific to the Sponsor Stockholders who are affiliated with ORCP. Moreover, the NewCo Class A Shares and NewCo Class B Shares will have diferrent voting and conversion rights. Lastly, the termination fee should be carefully scrutinized.<br>After carefully weighing all the above provided arguments, we are voting for this proposal. |

| Shareholder Proposal Regarding Diversity and Inclusion Report | Ablehnung | It should be noted that the proponent of this proposal is the National Center for Public Policy Research ("NCPPR"). NCPPR has a history of submitting shareholder proposals that, upon first impression, appear consistent with environmental and social proposals that call for information or action on enhancing companies' approaches to environmental and social factors but, upon further review, appear to be designed to inhibit companies' actions in such areas. The NCPPR describes itself as a "communications and research foundation supportive of a strong national defense and dedicated to providing free-market solutions to today's public policy problems" that believes "the principles of a free market, individual liberty and personal responsibility provide the greatest hope for meeting the challenges facing America in the 21st century." A division of the NCPPR, the Free Enterprise Project, routinely engages companies on issues such as healthcare, immigration, gun rights, energy, taxes, religious freedom, media bias, corporate free speech, and ideological diversity, among other issues, often by questioning executives at annual meetings or through the submission of shareholder proposals.<br><br>While increased disclosure around diversity is typically in line with policy, in this case, the proponent of this proposal is the National Center for Public Policy Research ("NCPPR). The NCPPR describes itself as a 'communications and research foundation supportive of a strong national defense and dedicated to providing free-market solutions to today's public policy problems' that believes 'the principles of a free market, individual liberty and personal responsibility provide the greatest hope for meeting the challenges facing America in the 21st century.' A division of the NCPPR, the Free Enterprise Project ('FEP') describes itself as 'the conservative movement's only full-service shareholder activism and education program: It files shareholder resolutions, engages corporate CEOs and board members at shareholder meetings, petitions the Securities and Exchange Commission (SEC) for interpretative guidance, and sponsors effective media campaigns to create the incentives for corporations to stay focused on their missions.' | Allocation of Dividends | Zustimmung | A proposed dividend allocation should be comparable to industry peers and should mirror the financial health of the company. In principle, an acceptable pay-out ratio should be above 20 percent and below 100 percent. The company's aggregate pay-out ratio for the fiscal year is in an acceptable range. Given this, we are voting for this proposal. |

| Directors' liability action | Zustimmung | Where there is a violation of directors' duties, a solvent joint stock company can bring a liability action against the directors under Article 2393 of the Civil Code. Although any damages that the court awards are paid to the company rather than to the shareholders that have brought the action, it appears to be in shareholders' best interest to hold a director liable for a breach of his duties. The shares linked to the withholding contract will vest on condition that the management board chair remains in office during the five-year withholding period, i.e. until December 31, 2027. In this case, Maurice Lévy's fixed fees are more than double that of the average non-executive chair at a French blue-chip company. Further, his fixed fees are higher than the average base salary of the CEOs at CAC 40 companies, thus aggravating pay concerns. Given that the proposed compensation is excessive without sufficient justification, we are voting against this proposal. |

| Authority to Issue Shares and Convertible Debt Through Private Placement | Ablehnung | In this case, the board will be authorised to potentially issue up to 8.8% of the Company`s current issued share capital without preemptive rights, subject to a cumulative limit of 29.5% for all share issuances. As the global ceiling exceeds the cumulative limit for all share issuances set by policy, we are voting against this proposal. |
| Greenshoe | Ablehnung | This authority grants the Company the flexibility to increase an over-subscribed issuance by up to 15%, so long as such increase takes place on the same terms and within thirty days of the initial issuance. In this case, the proposed greenshoe is subject to a cumulative limit of 29.5% of share capital for all share issuances, which exceeds the cumulative limit set by policy. Consequently, we are voting against this proposal. |
| Authority to Set Offering Price of Shares | Ablehnung | This proposal seeks shareholder authority to issue securities without preemptive rights at a 10% discount, so long as the increases do not exceed 10% of their share capital in any 24-month period. In this case, the proposed discount specifically applies to proposals 17 and 18, which seek authority to potentially issue up to 8.8% of the Company`s current issued share capital without preemptive rights, which is line with the limit for share issuances without preemptive rights set by policy. However, in total, the Company's proposed capital increases are subject to a cumulative limit of 29.5% of share capital, which exceeds the cumulative limit set by policy. Consequently, we are voting against this proposal. |
| Authority to Increase Capital Through Capitalisations | Zustimmung | The successive or simultaneous capitalisation of reserves, retained earnings or additional paid-in capital would benefit shareholders by allowing the Company to increase paid-in capital through a series of alternatives, above and beyond the issuance of shares. Moreover, when companies capitalize reserves, retained earnings or paid-in capital, there is no risk of dilution. This procedure merely transfers wealth to shareholders and does not impact share value. Consequently, we are voting for this proposal. |
| Authority to Increase Capital in Case of Exchange Offers | Ablehnung | In this case, the board will be authorised to potentially issue up to 8.8% of the Company`s current issued share capital without preemptive rights, subject to a cumulative limit of 29.5% for all share issuances. As the global ceiling exceeds the cumulative limit for all share issuances set by policy, we are voting against this proposal. |

| Authority to issue performance shares | Ablehnung | Remuneration plans should be adequately disclosed and should reward executives for good performance. As this is against policy, we are voting against this proposal. |

| Amendment to Governing Structure (Two-tier to One-tier) and Adoption of New Articles | Ablehnung | In this case, the Company's main rationale for the proposed amendment to the governing structure appears to be to further empower the management board chair and create a position for him as CEO/chair of the Company. Specifically, the Company states that '[The Company] has undergone a period of sustained momentum over the past years, thanks to its unique model adapted to the needs of some of the world's leading companies, its unmatched capabilities and the depth of its talent bench. To further support that dynamic, and the leadership teams behind it, and in anticipation of the end of his mandate in 2025, Maurice Lévy, Chairman of the Supervisory Board, submitted to the Group's governing bodies a proposal to change the company's governance...In this new structure, Arthur Sadoun would become Chairman and CEO of the Board...Maurice Lévy, Chairman of the Supervisory Board, would be named Chairman Emeritus in order for the Groupe to continue to benefit from his insight, experience, and leadership...The aim of this change in governance is simple: to preserve the driving forces behind the Group's success and maintain the model that has made [the Company] our industry's most valuable company in terms of market capitalization. It will also allow us to continue the duo that we have formed with Maurice Lévy since 2017, which has seen [the Company] extract itself from the pack and emerge as a clear leader in our sector." Although the Company states that it will appoint a lead director, a combined chair/CEO is not in line with policy. Moreover, it should be noted that the proposed one tier board would not be sufficiently independent and, as such, not in line with policy. Further, the proposed bylaws will allow for the appointment of censors, which is not in line with best practice. Given the above and given that the Company's rationale for the proposed amendment is not in line with policy, we are voting against this proposal. |
| Elect Arthur Sadoun | Ablehnung | It should be noted that this proposal is subject to the approval of Proposal 29. There are no evident reasons to doubt the qualifications of nominee Arthur Sadoun. However, this director will be serving as the combined Chair/CEO in the upcoming year, which is against policy. Moreover, given the information provided, the candidate holds too many mandates to be in line with policy (Chair/CEO - Publicis Groupe SA; Director - Carrefour SA). Additionally, as the board of directors does not comprise an adequate number of independent members, we are voting against all insider and affiliated directors. Consequently, we are opposing this director`s election. |

In this case, the proposed greenshoe is subject to a cumulative limit of 43.5% of share capital for all share issuances, which exceeds the cumulative limit set by policy. | Authority to Increase Capital Through Capitalisations | Zustimmung | The successive or simultaneous capitalisation of reserves, retained earnings or additional paid-in capital would benefit shareholders by allowing the Company to increase paid-in capital through a series of alternatives, above and beyond the issuance of shares. | Shareholder Proposal Regarding GHG Targets and Alignment with the Paris Agreement | Zustimmung | This proposal requests that the Company issue near and long-term science-based GHG reduction targets aligned with the Paris Agreement's ambition of limiting global temperature rise to 1.5°C and summarize plans to achieve them. | Elect WANG Pen-Tsung | Ablehnung | There are no evident reasons to doubt the qualification and suitability of nominee WANG Been-Fong. However, as the board of directors does not comprise an adequate number of independent members, we are voting against all insider and affiliated directors. Moreover, as the board of directors does not have sufficient gender diversity, we are voting against all male directors. Lastly, the nominee has already been a non-executive member of the board for more than 15 years, which is against policy. Consequently, we are opposing this director`s election. |

| Lifting of Non Complete Clause Against the Company's Newly Appointed Directors Upon Re-election | Zustimmung | Releasing the board of directors from these restrictions, which prohibit board members from conducting any activities that can be considered to be competitive with the business affairs of the Company, may lead to potential conflicts of interest for directors.<br><br>In this case, the Company proposes to release its director from non-compete obligation with respect to their directorships in Companies in an unrelated industry, wholly-owned subsidiaries, controlled subsidiaries, substantial shareholders and their subsidiaries or joint ventures. There is no indication that participation in the operations of such entities will lead to conflicts of interest for directors. Consequently, we are voting for this proposal. |
| Extraordinary Motions | Ablehnung | In Taiwan, many companies place an item for extraordinary motions on their proxy forms. However, shareholders of Taiwanese companies who vote via proxy technically may not exercise their voting rights preemptively for any extraordinary motions raised at the general meeting of shareholders. Instead, proxies have full authority to exercise their discretion in supporting or opposing any such motions.<br><br>As granting unfettered discretion is not in line with policy, we are voting against this proposal. |

| Accounts and Reports | Zustimmung | The Company's audited annual and consolidated accounts were available for review in advance of this shareholder meeting. As no evidence has been presented that would question the accuracy of these reports, one should consider this item as routine. Therefore, we are voting for this proposal. |
| Allocation of Dividends | Ablehnung | A proposed dividend allocation should be comparable to industry peers and should mirror the financial health of the company. In principle, an acceptable pay-out ratio should be above 20 percent and below 100 percent. As the proposed dividend pay-out ratio exceeds 100 percent, we are voting against this proposal. |
| Remuneration Policy | Ablehnung | The Company's disclosure of its remuneration policies and procedures is in line with policy and applicable legislation. The report gives the impression of having been properly prepared. However:<br><br>The Company has failed to implement executive stock ownership guidelines.<br>Severance package payments are not limited to a maximum of two-years` salary.<br>The board can grant discretionary bonuses. The Company's policy allows the board to have authority to award entry bonuses to managers with strategic responsibilities, limited to 10% of fixed remuneration.<br>The report does not provide transparency on chosen benchmarks.<br>The remuneration structure allows for adjusted metrics.<br>As this is not entirely in line with policy, we are voting against this proposal. |
| Remuneration Report | Ablehnung | The Company's disclosure of its remuneration policies and procedures is in line with policy and applicable legislation. The report gives the impression of having been properly prepared. However:<br><br>The Company has failed to implement executive stock ownership guidelines.<br>The outgoing CEO received a termination payment including a severance indemnity of ¬1,523,912 and a non-compete payment of ¬250,000, thus totaling ¬1,773,912, which correspond to approximately 4.9x times his base salary.<br>The 2021-2023 LTI plan foresees payments of 66.6% of relative TSR target awards to executives even when the Company's performance falls in the lowest quartile of its peer group, effectively acting as a guaranteed payout. Moreover, 100% of the award will vest for performance at median level.<br>The report does not provide transparency on chosen benchmarks.<br>The remuneration structure allows for adjusted metrics.<br>As this is not entirely in line with policy, we are voting against this proposal. |

| Directors' liability action | Zustimmung | Where there is a violation of directors' duties, a solvent joint stock company can bring a liability action against the directors under Article 2393 of the Civil Code. Although any damages that the court awards are paid to the company rather than to the shareholders that have brought the action, it appears to be in shareholders' best interest to hold a director liable for a breach of his duties. As a result, it is recommended to view this item in a non-critical fashion should it occur.<br><br>Therefore, we are voting for this proposal. |

| Wahl in den Aufsichtsrat: Martin Schaller | Ablehnung | Es ergeben sich keine Anhaltspunkte, welche Zweifel an der Qualifikation von Martin Schaller begründen könnten. Generell sollten Hauptaktionäre das Recht haben, entsprechend im Aufsichtsrat vertreten zu sein. | Election of Independent Director to Be Appointed as Audit Committee Member: LEE Jae Hoon | Ablehnung | There are no evident reasons to doubt the qualification and suitability of nominee LEE Jae Hoon. However, as the board of directors does not have sufficient gender diversity, we are voting against all male directors.<br><br>Moreover, as the board of directors and the compensation committtee do not comprise of an adequate number of independent members, we are voting against all insider and affiliated directors.<br><br>In addition, the policy requires the compensation committee chair to be independent.<br><br>Further, it is worth noting the nominee was not an audit committee member in the fiscal year under review. As such, we will not hold this nominee accountable for the Company's failure to disclose its auditor`s report or to confirm whether its financial statements presented in the meeting circular were fully audited.<br><br>The nominee is a senior advisor of Kim & Chang, which provided legal services to the Group in 2024. The transaction amount was not disclosed. The need for the Company to engage in consulting relationships with its directors should be questioned. Such relationships can potentially create conflicts for directors, as they may be forced to weigh their own interests in relation to shareholder interests when making board decisions. In addition, the Company's decision regarding where to turn for the best professional services may be compromised when doing business with a professional services firm represented by the Company's directors. Consequently, we are opposing the election of this nominee. |

| Vorlage des festgestellten Jahresabschlusses und des gebilligten Konzernabschlusses, des zusammengefassten Lageberichts und Konzernlageberichts der SAP SE, einschließlich der darinenthaltenen Erläuterungen des Vorstands zu den Angaben nach §§ 289a und 315a des Handelsgesetzbuchs (HGB), sowie des Berichts des Aufsichtsrats, jeweils für das Geschäftsjahr 2023 | Keine Stimmabgabe | Über diesen Tagesordnungspunkt wird nicht abgestimmt. |
| Beschlussfassung über die Verwendung des Bilanzgewinns aus dem Geschäftsjahr 2023 | Zustimmung | Die Dividende sollte angemessen sein und der finanziellen Lage des Unternehmens entsprechen. In der Regel liegt eine akzeptable Ausschüttungsquote zwischen 20 und 100 Prozent. Da der Antrag den Richtlinien entspricht, kann dieser Vorschlag der Verwaltung unkritisch gesehen werden. Somit stimmen wir für den Antrag. |
| Beschlussfassung über die Entlastung des Vorstands für das Geschäftsjahr 2023 | Zustimmung | Es ist nichts von anhängigen Verfahren gegen Mitglieder des Vorstands bekannt. Es ergeben sich auch keine weiteren konkreten Governance-Aspekte bzw. Richtlinienverstöße, welche einer Entlastung der Mitglieder des Vorstands entgegenstehen könnten. Daher kann die Entlastung unkritisch betrachtet werden. Somit stimmen wir für den Antrag. |
| Beschlussfassung über die Entlastung des Aufsichtsrats für das Geschäftsjahr 2023 | Zustimmung | Es ist nichts von anhängigen Verfahren gegen Mitglieder des Aufsichtsrats bekannt. Es ergeben sich auch keine weiteren konkreten Governance-Aspekte bzw. Richtlinienverstöße, welche einer Entlastung der Mitglieder des Aufsichtsrats entgegenstehen könnten. Allerdings scheidet der erst im letzten Jahr bestellte und für den Aufsichtsratsvorsitz geplante Punit Renjen bereits wieder aus seinem Amt aus. Zwar ist es schwierig, dem Aufsichtsrat anzulasten, wenn ein mit dem deutschen System nicht vertrautes Mitglied schlussendlich nicht mit seiner auch gesetzlich so festgelegten Rolle zufrieden ist. Andererseits sollte eine fundierte Nachfolgeplanung auch so gestaltet sein, dass solche Themen bereits im Vorfeld entsprechend geklärt werden. Dies ist auch insofern markant, als dass sich die Suche eines adäquaten Nachfolgers für Hasso Plattner schon über eine geraume Zeit hinzieht und bislang nicht von Erfolg zeugt. Wir haben diese Kritik an das Unternehmen herangetragen und stehen mit dem Aufsichtsrat hierzu in einem guten Austausch. Daher stimmen wir trotz der vorliegenden Kritikpunkte für die Entlastung des Aufsichtsrats. |

| Beschlussfassung über die Billigung des Vergütungsberichts für das Geschäftsjahr 2023 | Zustimmung | Über das Vergütungssystem wurde zuletzt im Jahr 2023 abgestimmt und erreichte eine Zustimmungsrate von 91,42%, der letzte Vergütungsbericht erreichte 83,93%. Das System ist überwiegend in Einklang mit den Richtlinien, allerdings gibt es eine Schwachstelle:<br><br>In diesem Fall wird eine Abweichung von G.8 DCKG erklärt, was herkömmlich kritisch zu sehen ist, da eine nachträgliche Änderung der Ziele oder der Vergleichsparameter nicht den Richtlinien entspricht. | 2024 Guarantee for Bank Credit Line of Controlled Subsidiaries | Zustimmung | In this case, the aggregate amount of guarantees provided by the Company and its subsidiaries, including the proposed guarantees discussed in this proposal, would be approximately RMB 7,817.12 million, accounting for approximately 45% of the net assets of the Company. | Connected Transactions Regarding a Financial Service Agreement to be Signed with a Company | Ablehnung | It is a common practice for Chinese companies to make deposit transactions through a financial arm of their parent company or within their groups. Such pooling of the group's cash through an unlisted financial vehicle may give the parent company control over the listed company's finances. In addition, such practices may lead to lax lending practices within the parent group, potentially exposing the shareholders of a listed company to undisclosed risks. The proposed amendment essentially removes liability for an officer's breach of his or her duty of care. | Advisory Vote on Executive Compensation | Ablehnung | The Company's disclosure of its remuneration policies and procedures is in line with policy and applicable legislation. The report gives the impression of having been properly prepared. However:<br><br>The LTI does not include ESG criteria.<br>Less than at least 2 KPIs are used as performance criteria for the LTIP, which is solely based on relative TSR.<br>The board can grant discretionary bonuses. Specifically, at the end of FY2024 (in January 2024), the Company granted Mr. Benioff an additional round of equity awards, structured largely the same as his annual long-term incentive award, with a target value of $20 million. After accounting for this additional award, Mr. Benioff's total target equity for FY2024 was approximately $35 million, or 42% greater than the value of his FY2023 awards.<br>The Company's STIP awards are largely at the discretion of the compensation committee.<br>The troubling growth in Mr. Benioff's total compensation is also seen in his perquisites. Mr. Benioff received approximately $4.6 million in perquisites from the Company in FY2024. These perquisites include security services (based on the recommendation of an outside security study) and the portions of his work-related travel on private aircraft that may be deemed to be in the nature of commuting. This compares to a total of $1.5 million in each of FY2022 and FY2023, which included just the cost of security services. Mr. Benioff's two major perquisites are excessive compared to most of those provided to the CEOs at the U.S.-based companies in the Company's self-selected peer group. Only two CEOs in this group have higher total perquisites, and their levels have received criticism in the past. Mr. Benioff's preference to work remotely is widely documented. Whether this preference is a contributing factor to the exorbitant costs tied to his travel by private aircraft that the Company is required to report as compensation is unclear.<br>Shareholders should consider the off-cycle grant to the CEO that occurred late in the fiscal year in the context of the forfeiture of the FY2021 PSUs due to relative TSR performance falling below the threshold goal tied to the award.<br>As this is against policy, we are voting against this proposal. |

| Shareholder Proposal Regarding Independent Chair | Ablehnung | It should be noted that the proponent of this proposal is the National Legal and Policy Center ("NLPC"), which has submitted shareholder proposals that, upon first impression, appear to be consistent with environmental and social proposals that call for information or action on enhancing companies' approaches to environmental and social factors but, upon further review, appear to be designed to inhibit companies' actions in such areas. The NLPC describes itself as a 501(c)(3) that "promotes ethics in public life through research, investigation, education, and legal action," and believes "the best way to promote ethics is to reduce the size of government." As part of the corporate integrity project on its website, the NLPC shares its concerns regarding "woke" corporate executives, for instance posting articles about inclusive content "devaluing" the Pixar franchise or about how the NLPC has reported Visa's chair and CEO to the SEC for ongoing "wokeness." The project also examines a supposed pushback against ESG initiatives, featuring pieces such as one describing corporate America's anti-racism programs as racist against white people and another promoting the NLPC's efforts to nominate a fossil-fuel-supporting director candidate to the board of Exxon Mobil Corporation.<br><br>Although policy does not require that the board chair be an independent director, this proposal is largely focused on the seperation of the roles of chair and CEO. Moreover, the shareholder proponent has put forth adequate justification for their proposal. Such a proposal enhances shareholders rights and is not considered detrimental financially or structurally.<br><br>However, the policy does not require the chair of the board to be independent. Therefore, the recommendation is "AGAINST with reference to "ABSTAIN". |
| Shareholder Proposal Regarding Severance Approval Policy | Zustimmung | According to policy, severance packages should be no more than two times salary. Therefore, it is in line with policy to ensure that companies seek shareholder approval for any severance payments valued at 2.99 times the sum of salary and short-term bonus. Therefore, we are voting for this proposal. |

| Shareholder Proposal Regarding Report on Board Oversight of Discrimination | Ablehnung | It should be noted that the proponent of this proposal is the National Center for Public Policy Research ("NCPPR"). NCPPR has a history of submitting shareholder proposals that, upon first impression, appear consistent with environmental and social proposals that call for information or action on enhancing companies' approaches to environmental and social factors but, upon further review, appear to be designed to inhibit companies' actions in such areas. The NCPPR describes itself as a "communications and research foundation supportive of a strong national defense and dedicated to providing free-market solutions to today's public policy problems" that believes "the principles of a free market, individual liberty and personal responsibility provide the greatest hope for meeting the challenges facing America in the 21st century." A division of the NCPPR, the Free Enterprise Project, routinely engages companies on issues such as healthcare, immigration, gun rights, energy, taxes, religious freedom, media bias, corporate free speech, and ideological diversity, among other issues, often by questioning executives at annual meetings or through the submission of shareholder proposals.<br><br>This proposal has also been labeled as "Anti-ESG" due to the shareholder proponent. These proponents have generally submitted proposals that address environmental and social issues and their aims are fairly clearly articulated in their supporting statements. Support for this resolution could buoy the proponents arguments and would advance a narrative that may contradict that of investors concerned about companies ESG performance. As a result, we are voting against this proposal. |

| Specific Authority to Repurchase Shares (Acquisition of SPV Sanlam Shares in Subscription SPV) | Zustimmung | Generally, the repurchase of preference shares is not in line with policy. However, in this case following the acquisition of the shares by the Company's wholly owned subsidiary, the Company is the sole holder of the preference shares issued by Funding SPV.<br><br>As of March 8, 2024, the preference share obligations owed by Funding SPV to entities in the Company exceeded the market value of the SPV Company's shares held by Subscription SPV. The sale of the SPV shares on the market to settle these obligations is likely to create a large overhang of the Company's shares in the market and may have an adverse impact on the price at which the Company's shares trade and the time it may take to recover, which will have a potential negative impact on the Company's shareholders.<br><br>For this reason, the Company intends to repurchase the SPV shares from Subscription SPV following the acquisition by URD of the ordinary shares in Funding SPV, at which time Funding SPV will be a wholly owned subsidiary of the Company, and thereafter delist, cancel and restore the SPV shares, which will enable the B-BBEE SPV Group to partially settle its obligations to entities in the Sanlam Group. The B-BBEE SPV acquisition is among others conditional upon shareholders approving the purchase of the SPV Shares from Subscription SPV.<br><br>Therefore, we are voting for this proposal. |

| Accounts and Reports; Non Tax-Deductible Expenses | Zustimmung | The Company's audited annual and consolidated accounts were available for review in advance of this shareholder meeting. As no evidence has been presented that would question the accuracy of these reports, one should consider this item as routine. Further, as for the approval of non tax-deductible expenses, this is a routine matter that will not have a negative effect on the Company's shareholders. Therefore, we are voting for this proposal. |
| Consolidated Accounts and Reports | Zustimmung | The Company's audited annual and consolidated accounts were available for review in advance of this shareholder meeting. As no evidence has been presented that would question the accuracy of these reports, one should consider this item as routine. Therefore, we are voting for this proposal. |
| Allocation of Profits/ Dividends | Zustimmung | A proposed dividend allocation should be comparable to industry peers and should mirror the financial health of the company. In principle, an acceptable pay-out ratio should be above 20 percent and below 100 percent. The company's aggregate pay-out ratio for the fiscal year is in an acceptable range. Given this, we are voting for this proposal. |

| 2023 Remuneration Report | Ablehnung | The Company's disclosure of its remuneration policies and procedures is in line with policy and applicable legislation. The report gives the impression of having been properly prepared. However:<br><br>The new CEO Thierry Léger's fixed remuneration was set at ¬1,250,000, which represents a 56.3% premium in comparison to that of his predecessors. | 2024 Remuneration Policy (CEO) | Ablehnung | The Company's disclosure of its remuneration policies and procedures is in line with policy and applicable legislation. The report gives the impression of having been properly prepared. However:<br><br>The Company proposes to increase the payout limit under the short-long-term incentive plan for the CEO from 122% to 138% of base salary and the Company has failed to explicitly provide a compelling rationale for the aforementioned increase, which is not in line with best practice.<br>While the Company states that the CEO's remuneration is benchmarked against a group of leading global reinsurers, the Company has failed to disclose the specific companies that are taken into account in the benchmarking exercises. The 2022 Annual Report included the specific companies taken into consideration in this context; as such, this year's level of disclosure represents a retrograde step when compared with the previous year's documents.<br>The Company states that, should Thierry Léger be dismissed by the board of directors before December 31, 2024, he would lose entitlements to a large number of shares granted under the replacement award granted to him upon appointment in 2023. As such, should he be dismissed before the aforementioned date, the CEO would be entitled to a compensatory payment, designed as an acceleration of the exceptional replacement award. The payment, paid in cash, would be equal to 24 months of the CEO's fixed monthly remuneration, and is not subject to the achievement of performance conditions. This is not in line with best practice. Moreover, the replacement award was initially granted to Thierry Léger in performance shares. However, the potential acceleration of said award would entitle the CEO to a payment in cash, which is not subject to performance conditions. As such, the accelerated replacement award granted to Thierry Léger would no longer be aligned with the long-term interests of shareholders.<br>As this is against policy, we are voting against this proposal. |

| Appointment of  Auditor for Sustainability Reporting (KPMG) | Zustimmung | There is no indication of any investigations or pending court cases pertaining to the auditor for sustainability reporting, KPMG. | Authority to Increase Capital Through Capitalisations | Zustimmung | The successive or simultaneous capitalisation of reserves, retained earnings or additional paid-in capital would benefit shareholders by allowing the Company to increase paid-in capital through a series of alternatives, above and beyond the issuance of shares. Moreover, when companies capitalize reserves, retained earnings or paid-in capital, there is no risk of dilution. This procedure merely transfers wealth to shareholders and does not impact share value. Consequently, we are voting for this proposal. |
| Authority to Issue Shares and Convertible Debt w/ Preemptive Rights | Ablehnung | In this case, the board will be authorised to potentially issue up to 40% of the Company`s current issued share capital with preemptive rights. As this exceeds the limit set by policy, we are voting against this proposal. |
| Authority to Issue Shares and Convertible Debt w/o Preemptive Rights w/ Priority Subscription Rights | Ablehnung | In this case, the board will be authorised to potentially issue up to 10% of the Company`s current issued share capital without preemptive rights, subject to a cumulative limit of 52.2% for all share issuances. As the global ceiling exceeds the cumulative limit for all share issuances set by policy, we are voting against this proposal. |

| Greenshoe | Ablehnung | This authority grants the Company the flexibility to increase an over-subscribed issuance by up to 15%, so long as such increase takes place on the same terms and within thirty days of the initial issuance. In this case, the proposed greenshoe is subject to a cumulative limit of 52.2% of share capital for all share issuances, which exceeds the cumulative limit set by policy. Consequently, we are voting against this proposal. |
| Authority to Grant Convertible Warrants (Contingent Capital) | Ablehnung | This authority primarily aims to protect the Company against the deterioration of financial markets. The use of contingent convertible bonds has been growing in Europe in recent years as a means of providing emergency capital buffers for significant financial institutions. Under the proposed authority, contingent convertible warrants would convert automatically into equity capital only in case the Company's capital ratio falls below a specific regulatory threshold. While such a substantial conversion from debt to equity upon a triggering event would undoubtedly have a negative effect on shareholder value, the alternative, namely insolvency or a renewed financial crisis, would have an even harder impact on shareholders. The proposed authority has been developed under the guidance of regulatory authorities to ensure that the Company is able to meet regulatory capital requirements. Nevertheless, this authority is subject to the global limit for share issuances of 52.2% of share capital, which exceeds the limit set by policy. Therefore, we are voting against this proposal. |

| Authority to Issue Performance Shares | Zustimmung | Remuneration plans should be adequately disclosed and should reward executives for good performance. Therefore, if the proposed plan is fully implemented, employee shareholdings would remain reasonable and in line with policy. Consequently, we are voting for this proposal. |
| Global Ceiling on Capital Increases | Ablehnung | In general, the setting of global limits for issuances should be viewed in a positive fashion, as it serves as an additional level of protection for shareholders' interests, by minimizing the potentially significant dilution of a series of issuance requests to a fixed level. However, if approved this authority would represent a potential cumulative capital increase of 52.2% of share capital, which exceeds the cumulative limit set by policy. Consequently, we are voting against this proposal. |

Consequently, we are voting against this proposal. |
| Authority to Set the Reissue Price Of Treasury Shares | Ablehnung | Best practice in Ireland calls for a reissuance price range of 95% to 120% of market price in order to limit potential dilution to current shareholders. It is believed that permitting the Company to reissue shares at a discount of up to 10% may negatively impact shareholder value. Moreover, the Company has failed to provide a cogent rationale allaying such concerns. As this is not entirely in line with policy, we are voting against this proposal. |

| Financial Services Framework Agreement | Zustimmung | The management and the board should be in the best position to determine what operational decisions are best in the context of the business.<br><br>It is a common practice in China for companies listed in Hong Kong to make deposit transactions through a financial arm of their parent company or within their groups. According to policy, dilution for all compensation plans should be no higher than 10% of share capital.<br><br>Given that the company`s plan is fully compliant with policy and, in the absence of any evidence of past abuse by the company of this type of authority, we are supporting this proposal. |

| Remuneration Report | Ablehnung | The Company's disclosure of its remuneration policies and procedures is in line with policy and applicable legislation. The report gives the impression of having been properly prepared. However:<br><br>The executive chair John Elkann is CEO of Exor, which directly owns 14.20% of the Company's issued share capital and voting rights, as well as a member of the Agnelli family which, through Giovanni Agnelli B.V., controls 53.6% of Exor's share capital. The Company discloses that John Elkann received 169,773 PSUs for the 2023 LTI, the fair value of these grants is equal to ¬2,138,008. The significant size of the grant and the total award opportunity are not in line with best practice, particularly when given to a significant shareholder.<br>The CEO is currently enrolled in two additional discretionary bonus plans.The CEO received an exceptional award amounting to ¬10 million in the past fiscal year. The cash award is related to the the achievement of the second and third milestones of the Transformation Incentive.Additionally, the CEO received 1,000,000 PSUs in 2021 valued at ¬4,293,090 of expense to the Company relating to the Shareholder Return Incentive which vests in the event shareholders gain at least an 80 percent return on investment. These discretionary bonuses are out of step with market practice, and the Company has not provided adequate rationale to justify such significant grants.<br>There is a disparity between executive pay and stakeholder experience. The CEO's target pay opportunity has increased by approximately 55.6% in FY2023, to ¬36,494,025 while the Comapny has initiated the termination of thousands of supplemental employees in Detroit, Toledo and Ohio, USA.<br>As this is not in line with policy, we are voting against this proposal. |

| Shareholder Proposal Regarding Report on Supply Chain Due Diligence | Zustimmung | The Company provides meaningful disclosures on its supply chain policies and practices, its standards surrounding involuntary labor, and its assessment process and corrective actions for suppliers. The Company also provides board oversight of its global compliance program. Nevertheless, the proponent notes that the Company sources from approximately 21,000 vendors in over 100 countries, including locations where forced, child, and prison labor are known to exist in the manufacturing chain of product categories sold in its stores. Moreover, the proponent states that while the Company's Vendor Code of Conduct prohibits forced, child, and prison labor, it does not conduct or require routine audits of factories to confirm compliance beyond the producers of private label merchandise,reportedly a very small portion of inventory. Given that increased transparency on how a company is managing supply chain risks is in line with policy, we are voting for this proposal. |

Consequently, we are voting for this proposal. |
| 2023 Allocation of Profits/ Dividends | Zustimmung | A proposed dividend allocation should be comparable to industry peers and should mirror the financial health of the company. In principle, an acceptable pay-out ratio should be above 20 percent and below 100 percent. The company's aggregate pay-out ratio for the fiscal year is in an acceptable range. Given this, we are voting for this proposal. |
| Amendments to Articles | Zustimmung | In this case, there is no cause for shareholder concern regarding the proposed amendments. Consequently, we are voting for this proposal. |
| Amendments to Procedural Rules for Corporate Governance | Zustimmung | In this case, there is no cause for shareholder concern regarding the proposed amendments. Consequently, we are voting for this proposal. |
| Extraordinary Motions | Ablehnung | In Taiwan, many companies place an item for extraordinary motions on their proxy forms. However, shareholders of Taiwanese companies who vote via proxy technically may not exercise their voting rights preemptively for any extraordinary motions raised at the general meeting of shareholders. Instead, proxies have full authority to exercise their discretion in supporting or opposing any such motions.<br><br>As granting unfettered discretion is not in line with policy, we are voting against this proposal. |

| Ratification of Auditor | Ablehnung | There is no indication of any investigations or pending court cases pertaining to the auditor. Moreover, the fees paid to the auditor are appropriate and are clearly disclosed by the Company. However, the same firm has audited the Company for more than 10 years, which is not in line with policy.<br><br>Moreover, as per US market practice, the lead auditor`s name and tenure has not been disclosed in the company's proxy materials or annual report.<br><br>Consequently, we are voting against this proposal. |
| Advisory Vote on Executive Compensation | Ablehnung | The Company's disclosure of its remuneration policies and procedures is in line with policy and applicable legislation. The report gives the impression of having been properly prepared. However:<br><br>The remuneration structure allows for adjusted metrics.<br>The LTI does not include ESG criteria.<br>As this is against policy, we are voting against this proposal. |
| Shareholder Proposal Regarding Independent Chair | Zustimmung | Although policy does not require that the board chair be an independent director, this proposal is largely focused on the seperation of the roles of chair and CEO. The chair/CEO at the Company is currently a combined role, which is not in line with policy. Moreover, the shareholder proponent has put forth adequate justification for their proposal. Therefore, we are supporting this proposal. |
| Shareholder Proposal Regarding  Progress on Animal Pain Management Commitment | Zustimmung | The proponent notes that in 2016, the Company released a Food Animal Welfare Policy saying every animal deserves certain freedoms for their entire lives, including freedom from pain, injury, fear and distress, and it then issued a specific 'Pain Management' section addressing the fact that animals in the food supply often endure having their body parts mutilated without pain relief and the Company has never reported any compliance, so shareholders have no way of knowing what progress (if any) has been made. In its response to this proposal, the Company states that, with respect to animal pain management, its approach is grounded in the Farm Animal Welfare Committee's industry-standard Five Freedoms. The Company further states that it is committed to following practices that support the welfare of animals sourced for food and non-food products. Overall, requests for increased transparency related to animal welfare are in line with policy. Therefore, we are supporting this proposal. |

| Shareholder Proposal Regarding Living Wage Policy | Zustimmung | This proposal requests that the board and management establish Company wage policies that are reasonably designed to provide workers with the minimum earnings necessary to meet a family's basic needs. The Company states that, in 2022, it announced a new starting wage range of $15 to $24, depending on the job and the local market, to competitively position the Company as a wage leader in every market where it operates. It adds that its total compensation is competitive with other large companies and leading in retail. The Company also emphasizes that it offers a comprehensive benefits package to support its well-being strategy, considering mental, physical, and financial well-being. Overall, as requests for ensuring the payment of a living wage are in line with policy, we are supporting this proposal. |
| Shareholder Proposal Regarding Report on Political Expenditures and Values Congruency | Zustimmung | Requests for increased transparency related to political expenditures and/or political activities are in line with policy. Consequently, we are supporting this proposal. |
| Shareholder Proposal Regarding Charitable Contributions Disclosure | Ablehnung | While increased disclosure around charitable contributions is typically in line with policy, in this case, the proponent of this proposal is the National Center for Public Policy Research (NCPPR). The NCPPR describes itself as a 'communications and research foundation supportive of a strong national defense and dedicated to providing free-market solutions to today's public policy problems' that believes 'the principles of a free market, individual liberty and personal responsibility provide the greatest hope for meeting the challenges facing America in the 21st century.' A division of the NCPPR, the Free Enterprise Project ('FEP') describes itself as 'the conservative movement's only full-service shareholder activism and education program: It files shareholder resolutions, engages corporate CEOs and board members at shareholder meetings, petitions the Securities and Exchange Commission (SEC) for interpretative guidance, and sponsors effective media campaigns to create the incentives for corporations to stay focused on their missions.' This proponent has generally submitted proposals that appear to be focused on E&S issues on their face but are designed to frustrate the company's actions around ESG performance. Therefore, we are voting against this proposal. |

Currently, the Company has disclosed its policies, sustainability goals, and initiatives related to the health effects of its products, specifically regarding sugar alternatives.<br><br>Nonetheless, as demands for increased transparency are generally in line with the basic policy requirements, we are voting for this proposal. |
| Shareholder Proposal Regarding Report on Risks Caused by the Decline in the Quality of Accessible Medical Care | Zustimmung | In this case, this proposal is requesting that the Company produce a report detailing any known and potential risks and costs to the Company caused by the decline in the quality of their accessible medical care and the Company's strategy to ameliorate these harms. This proposal is not necessarily aimed at addressing an issue that is unique to or disproportionately impacting the Company-- the proponent provides no rationale as to why the Company was selected for this resolution other than its "operations and its ability to implement its strategic plan are directly impacted by poor healthcare options for its employees."<br><br>At the Company's 2023 annual meeting, a similar proposal requesting that the Company provide a report detailing any known and potential risks or costs to the Company caused by enacted or proposed state policies severely restricting reproductive rights, and detailing any strategies beyond litigation and legal compliance that the Company may deploy to minimize or mitigate these risks received 13.1% shareholder support, excluding abstentions and broker non-votes.<br><br>Ultimately, as demands for increased transparency are generally in line with the basic policy requirements, we are voting for this proposal. |

| Accounts and Reports | Zustimmung | The Company's audited annual and consolidated accounts were available for review in advance of this shareholder meeting. As no evidence has been presented that would question the accuracy of these reports, one should consider this item as routine. Therefore, we are voting for this proposal. |

Given this, we are voting for this proposal. |

| Directors' liability action | Zustimmung | Where there is a violation of directors' duties, a solvent joint stock company can bring a liability action against the directors under Article 2393 of the Civil Code. Although any damages that the court awards are paid to the company rather than to the shareholders that have brought the action, it appears to be in shareholders' best interest to hold a director liable for a breach of his duties. As a result, it is recommended to view this item in a non-critical fashion should it occur.<br><br>Therefore, we are voting for this proposal. |

| Allocation of Profits/ Dividends | Zustimmung | A proposed dividend allocation should be comparable to industry peers and should mirror the financial health of the company. In principle, an acceptable pay-out ratio should be above 20 percent and below 100 percent. The company's aggregate pay-out ratio for the fiscal year is in an acceptable range. Given this, we are voting for this proposal. |
| Authority to Repurchase and Reissue Shares | Ablehnung | At this time, there is no evidence of any past abuse of this type of authority at the company. | Elect Jacques Aschenbroich | Ablehnung | There are no obvious reasons to doubt the qualifications of the candidate Jacques Aschenbroich. However, one week after the submission of the draft resolution, the board announced that it had, on the proposal of its Governance and Ethics Committee, unanimously decided not to include the resolution on the agenda of this shareholder meeting. In particular, the board noted that the French Commercial Code does not expressly provide for the possibility of filing an advisory resolution and states that it is the sole responsibility of the board of directors to decide on whether the roles of CEO and chair are combined.<br><br>The board's decision to reject the inclusion of this shareholder proposal could be a legitimate source of concern for some shareholders. In this case, the board has not provided shareholders with compelling rationale for the rejection of this proposal. Shareholders would be warranted to question the extent to which an advisory proposal -- which would not bind the board to any future actions -- could be interpreted as interfering with the board's powers to set strategy or depriving the board of its legal competences.<br><br>Ultimately, tthe board's decision here to deprive shareholders of the ability to vote on this item, which would have provided the board with useful insight into broad shareholder sentiment on its governance structure and a basis for further engagement with shareholders on this issue, could be legitimately interpreted as a failure of the board to satisfactorily perform its duty to shareholders. The board discloses that its decision not to include the shareholder proposal was a unanimous board decision that was based on a proposal of its Governance and Ethics Committee, which is chaired by lead independent director Jacques Aschenbroich. As a result, it is fair to hold nomineee Jacques Aschenbroich accountable for this issue.<br><br>Moreover, in accordance with our oil and gas policy, as a sustainable investor we will no longer directly support companies that expand their oil and gas production or generate more than 5% of their revenue from oil and gas extraction. | Opinion on 2024 Sustainability and Climate Progress Report | Ablehnung | There are certain reservations concerning proposals that request shareholders approve or disapprove a company's climate strategy. Although shareholders should be afforded disclosure that allows them to understand and assess a company's environmental and social risks, there are concerns regarding the mechanism by which shareholders would be required to cast an up/down vote on the Company's climate strategy.<br><br>In this case, there does not appear to be significant concerns with the Company's climate policy or its existing climate strategies and disclosures. The Company has adopted a net zero commitment across the value chain and has set reduction targets for its Scope 1, 2, and 3 emissions. The Company also provides reporting aligned with the TCFD and information concerning its scenario analysis.<br><br>However, there could be significant improvements with regard to the Company's disclosure of the governance of its Say on Climate vote. One example is that the Company has failed to provide any kind of meaningful information concerning how it has or intends to use the results of this vote in its shareholder engagements. The Company does state that, should the vote fail, it will consult with shareholders on the reasons why they objected to the vote. However, only consulting with them if the vote fails to receive majority support, to a large extent, defeats the purpose of having such a vote.<br><br>Without disclosure of how it intends to incorporate this vote in its more traditional engagement efforts, it is difficult to ascertain if or to what level this matter has been or will be discussed with shareholders. As noted by the Principles for Responsible Investors ("PRI) in a recent investor briefing, approval for a Say on Climate vote "may ease pressure on the company to take further action." The PRI states that it is possible that a company "may point to the fact that a majority of its shareholders voted in favour of its transition plan to justify not taking additional steps to address its climate risks and opportunities," which can "weaken existing investor engagement efforts, anchoring a company's ambition and undermining future investors' asks to increase ambition."<br><br>Moreover, this disclosure is particularly important given the Company's 2023 vote result. While the Company's climate plan received 88.8% support, this is far lower than the vast majority of companies who placed similar proposals up for a vote last year. While the Company does appear to emphasize the importance of shareholder engagement in several of its documents (calling it a "main tool and framework for dialogue" in its URD), it does not appear to provide meaningful specifics regarding these engagements. As a result, it is difficult for us to assess the effectiveness of this vote as an engagement tool. |

| | | Furthermore, despite the Company's relatively low support for its 2023 proposal, it appears to emphasize its 2023 vote result as a demonstration of the Company's positive climate performance. In practice, this resulted in the board citing this vote as one of three factors for awarding the CEO and chair maximum vesting under the CSR component of his annual bonus  These issues are compounded by the fact that the Company has, on several occasions, refused to place shareholder resolutions on its ballot.<br><br>Ultimately, given this is the fourth time the Company has placed its climate plan up for a vote of shareholders, it would be expected that the Company has received feedback from shareholders and disclosed how this vote has impacted its shareholder engagement. Similarly, it would be expected that the Company provides some indication as to the sentiments expressed by shareholders in its dialogues with them, as well as the steps it has taken to alleviate shareholder concerns.<br><br>Asa result, we are voting against this proposal. |
| Appointment of  Auditor for Sustainability Reporting (EY) | Ablehnung | There is no indication of any investigations or pending court cases pertaining to the auditor. | Appointment of  Auditor for Sustainability Reporting (PwC) | Zustimmung | As per French market practice, the lead auditor's tenure has not been disclosed in the Company's proxy materials or annual report. However, L822-14 of the Code de Commerce requires rotation of the lead auditor every six years. Moreover, there is no indication of any investigations or pending court cases pertaining to the auditor have been disclosed. | Shareholder Proposal Regarding Methane Report | Zustimmung | Methane emissions represent a very significant and financially material risk for companies operating in the natural gas industry and some of these risks could carry over to the Company, given it insures companies in this industry. The Company has taken these risks into account and states that, when relevant to an underwriting assessment, it incorporates methane-related risks (e.g. identification of potential methane leaks) into its underwriting process. Nonetheless, as requests for increased transparency on how a company is managing its environment related risks are in line with policy, we are voting for this proposal. |

| Shareholder Proposal Regarding Disclosure of GHG Emissions | Zustimmung | This proposal requests that the Company measure and disclose the GHG emissions associated with its underwriting and insuring activities in high-carbon sectors, including oil and gas. The Company discloses its Scope 1 and 2 emissions as well as Scope 3 emissions from travel and provides reporting aligned with the recommendations of the TCFD. It also maintains a commitment to become carbon neutral across its owned operations by 2030. It should be noted that at the Company's 2023 shareholder meeting, a proposal requesting that the Company issue a report addressing if and how it intends to measure, disclose, and reduce the GHG emissions associated with its underwriting, insuring, and investment activities, in alignment with the Paris Agreement's 1.5°C goal, requiring net zero emissions received 14.7% shareholder support, excluding abstentions and broker non-votes.<br><br>The Company states in its response to this proposal, it considers climate risk as part of its underwriting, pricing, reinsurance, and investment decisions. It also emphasizes that it is intently focused on the impacts of changing climate conditions on its business, taking robust measures to appropriately manage both climate-related risks and opportunities. Moreover, the Company clarifies that GHG emissions are almost never relevant to its assessment of its underwriting risk, as well as reiterating that GHG emissions data is not available with respect to the vast majority of the Company's customer base in high-carbon sectors.<br><br>Nonetheless, as requests for increased transparency on how a company is managing its environment related risks are in line with policy, we are voting for this proposal. |
| Shareholder Proposal Regarding Human Rights Risks and Underwriting Process | Zustimmung | This proposal requests that the Company publish a report describing how human rights risks and impacts are evaluated and incorporated into the underwriting process. While the Company does not explicitly address whether it considers and evaluates free, prior, and informed consent in its underwriting process, it provides reasonable disclosure regarding human rights and its integration of human rights within its business. In addition, the Company states in its response to this proposal that it does not underwrite any policies in the Arctic National Wildlife Refuge and the Democratic Republic of Congo, two areas of concern mentioned by the proponent. Nonetheless, requests for increased transparency on how the company's human rights risks and impacts are evaluated and incorporated in its underwriting process are in line with policy. Therefore, we are voting for this proposal. |

| Remuneration Report | Ablehnung | The Company's disclosure of its remuneration policies and procedures is in line with policy and applicable legislation. The report gives the impression of having been properly prepared. However:<br><br>Fixed salary increased by more than 10% within one year without a valid reason. The CEO's base salary increased by 30.0% during the past fiscal year, from ¬2,500,000 in FY2022 to ¬3,250,000 in FY2023. The Company has disclosed that the CEO's salary will increase by 10.8% during FY2024.<br>Adjustment Mechanism for Conversion Share Price: Under the 2023 Group Incentive System the share price calculation to determine the number of shares to grant under the long-term portion of the plan was based on the market share price at the beginning of the performance period (average price from the beginning of the year until the AGM approval of the incentive plan), to reduce the possible volatility stemming from a shorter observation period and to take into account availability constraints during the deferral period, as per regulatory requirements. However, to offset the effects of the EBA guidelines and the regulatory prohibition of the Bank of Italy on distributing dividends or paying them ex-post, the Company had the authority to apply an adjustment mechanism to discount the share conversion price in case of unavailability of shares, in order to restore the market value, thus generating a potential increase to the number of shares awarded to the CEO at an equal performance level achieved.<br><br>In FY2023, 458,520 shares were awarded to the CEO, for a value of ¬6.5 million. The board disclosed that the share conversion price used was ¬14.176, calculated through an adjustment of the Company's market share price at the beginning of the performance period, which was equal to ¬17.011 as average market price from January 1, 2023, to March 31, 2023, e.g. the date of 2023 AGM which approved the 2023 Group Incentive System. The overall effect of such adjustment was of c.16.7% on the market share price (¬17.011), leading to a final share adjusted conversion price of ¬14.176" (2024 remuneration report, pp. 103-104). The application of the discount on the share conversion price resulted in a final number of assigned shares approximately 20% higher than if no discount was applied.<br><br><br>As this is not entirely in line with policy, we are voting against this proposal. |

| 2024 Group Incentive System | Ablehnung | Please refer to Proposal 0800 for further details of the plan.<br><br>Remuneration plans should be adequately disclosed and should reward executives for good performance. According to policy, dilution for all compensation plans should be no higher than 10% of share capital.<br><br>While the proposed dilution is within the policy limits, the Company states that this proposal is also in line with the Group Remuneration Policy (Source: 2024 Meeting Materials), which we opposed. Consequently, we are voting against this proposal. |
| Approval of the Employee Share Ownership Plan | Zustimmung | The bonus shares will be primarily issued from the Company's treasury shares to avoid dilution. Employee stock purchase plans are an effective way to motivate employees to achieve corporate objectives. The terms of the plan are reasonable and do not violate policy. Consequently, we are voting for this proposal. |
| Authority to Issue Shares to Implement 2022 Group Incentive System | Zustimmung | That said plan was approved by the majority of shareholders present at the 2022 general meeting. In this case, the board will be authorised to issue up to 0.048% of the Company`s current issued share capital without preemptive rights, which is in line with policy. Consequently, we are voting for this proposal. |

Consequently, we are voting for this proposal. |
| Cancellation of Shares | Ablehnung | Please refer to Proposal 0400 for further details.<br><br>This proposal seeks shareholder approval to authorise the board to cancel a maximum of 200,000,0000 shares, representing 11.63% of the Company's outstanding shares, acquired through buyback programme (Proposal 0400), which we opposed. Consequently, we are voting against this proposal. |
| Directors' liability action | Zustimmung | Where there is a violation of directors' duties, a solvent joint stock company can bring a liability action against the directors under Article 2393 of the Civil Code. Although any damages that the court awards are paid to the company rather than to the shareholders that have brought the action, it appears to be in shareholders' best interest to hold a director liable for a breach of his duties. As a result, it is recommended to view this item in a non-critical fashion should it occur.<br><br>Therefore, we are voting for this proposal. |

| Advisory Vote on Climate Transition Action Plan | Zustimmung | In this case, the Company has asked shareholders to vote on its climate transition action plan ("CTAP"). The Company has adopted a net zero ambition and has set reduction targets for its Scope 1, 2, and 3 emissions. The Company also provides reporting aligned with the TCFD, information concerning its scenario analysis, and has received third-party assurance on its GHG emissions. Overall, its disclosure is sufficient to allow shareholders to understand and evaluate how the Company intends, at this time, to meet its climate objectives.<br><br>Regarding this proposal in the context of the board's oversight responsibilities, the Company states the board and the leadership executive are responsible for setting the Company's climate strategy and implementing it. It also states that it engaged with certain shareholders as part of its updating process, seeking their feedback so that it could take it into account in making its decision as to how to update the CTAP. Further, the Company states that if more than 20% of votes are cast against this resolution to approve the CTAP, the Company will engage with, and provide updates to, shareholders as prescribed under provision 4 of the UK Corporate Governance Code and take the voting outcome for this resolution into account when making future decisions regarding further updates to the plan.<br><br>Given that the proposed Climate Transition Action Plan is in line with policy, we are voting for this proposal. |

| Allocation of Dividends | Zustimmung | A proposed dividend allocation should be comparable to industry peers and should mirror the financial health of the company. In principle, an acceptable pay-out ratio should be above 20 percent and below 100 percent. The company's aggregate pay-out ratio for the fiscal year is in an acceptable range. Given this, we are voting for this proposal. |
| Remuneration Policy | Ablehnung | The Company's disclosure of its remuneration policies and procedures is in line with policy and applicable legislation. The report gives the impression of having been properly prepared. However:<br><br>Severance package payments are not limited to a maximum of two-years` salary.<br>The board can grant discretionary bonuses.<br>Questionable Benchmark: The Company states that salaries and remuneration levels for its executives are benchmarked against a group of companies comprising 16 Italian and European companies in the financial services sector, with a particular focus on companies operating in the insurance sector. However,  many of the constituents of the peer group continue to be significantly larger than the Company in terms of scope and market capitalisation.<br>The board possesses discretion to adjust awards under both short- and long-term incentive plan, departing from the effective achievement level of performance goals.<br>As this is not entirely in line with policy, we are voting against this proposal. |
| Remuneration Report | Ablehnung | The Company's disclosure of its remuneration policies and procedures is in line with policy and applicable legislation. The report gives the impression of having been properly prepared. It should be noticed that the former CEO and general manager, Carlo Cimbri, who seats as non-executive chair of the board since 2022 received a significant remuneration. Specifically, in FY2023 the non-executive chair received ¬1,080,000 for his role as chair, ¬1,079,500 from the Company's subsidiary, Unipolsai, ¬2,000,000 as remuneration accrued by virtue of the managerial employment relationship in place during the year under review and ¬1,000,000 as annual contribution of his three-year stability pact, for an overall salary of above ¬4 million. The size of said remuneration exceeds pay levels for non-executive chair positions at market and industry peers. As this is not entirely in line with policy, we are voting against this proposal. |

| Advisory Vote on Executive Compensation | Ablehnung | The Company's disclosure of its remuneration policies and procedures is in line with policy and applicable legislation. The report gives the impression of having been properly prepared. However:<br><br>Compensation is not linked to materially significant ESG indicator.<br>The clawback policy is restatement-dependent only.<br>The remuneration structure allows for adjusted awards.<br>As this is against policy, we are voting against this proposal. |
| Ratification of Auditor | Ablehnung | There is no indication of any investigations or pending court cases pertaining to the auditor. Moreover, the fees paid to the auditor are appropriate and are clearly disclosed by the Company. However, the same firm has audited the Company for more than 10 years, which is not in line with policy.<br><br>Moreover, as per US market practice, the lead auditor`s name and tenure has not been disclosed in the company's proxy materials or annual report.<br><br>Consequently, we are voting against this proposal. |
| Shareholder Proposal Regarding Recapitalization | Zustimmung | Allowing one vote per share is in line with policy and generally operates as a safeguard for common shareholders by ensuring that those who hold a significant minority of shares are able to weigh in on issues set forth by the board, especially in regard to the director election process. Therefore, we are voting for this proposal. |
| Shareholder Proposal Regarding Report on Carbon Reduction Commitments | Ablehnung | In this case, the proponent of this proposal is the National Center for Public Policy Research (NCPPR). The NCPPR describes itself as a 'communications and research foundation supportive of a strong national defense and dedicated to providing free-market solutions to today's public policy problems' that believes 'the principles of a free market, individual liberty and personal responsibility provide the greatest hope for meeting the challenges facing America in the 21st century.' A division of the NCPPR, the Free Enterprise Project ('FEP') describes itself as 'the conservative movement's only full-service shareholder activism and education program: It files shareholder resolutions, engages corporate CEOs and board members at shareholder meetings, petitions the Securities and Exchange Commission (SEC) for interpretative guidance, and sponsors effective media campaigns to create the incentives for corporations to stay focused on their missions.' This proponent has generally submitted proposals that appear to be focused on E&S issues on their face but are designed to frustrate the company's actions around ESG performance. Further, the Company provides robust climate disclosures and maintains explicit board-level oversight of climate. Therefore, we are voting against this proposal. |

| Shareholder Proposal Regarding Diversity and Inclusion Report | Zustimmung | This proposal requests that the Company provide an assessment of the effectiveness of its diversity, equity, and inclusion efforts, specifically concerning outcomes using quantitative metrics for workforce diversity, hiring, promotion, and retention of employees, including data by gender, race, and ethnicity. Additional information concerning the board's assessment of this issue would allow shareholders to understand what issues are of the most importance to the Company from a human capital management perspective and how the Company is progressing against any diversity-related goals. While the Company has recently improved its diversity-related disclosures, specifically concerning the board's role in overseeing the Company's diversity and inclusion efforts, the Company has faced and is currently facing, numerous allegations of discrimination both from current and former employees and the EEOC. Overall, given that the requested disclosure is in line with policy, we are voting for this proposal. |

| Exchange Offer Amendments | Zustimmung | Certainly, the primary beneficiary of the Exchange Offer Program would seemingly be the Company's Class B shareholders, who have been restricted from converting their Class B shares for the past 15 years pending the final resolution of the U.S. Covered Litigation. If this proposal is approved, the Company's Class B shareholders would have the opportunity to realize partial liquidity for their holdings of Class B common stock through their voluntary participation in the Initial Exchange Offer and any of the Successive Exchange Offers. The Company also believes that the Exchange Offer Program represents an opportunity to strengthen its client relationships, as most of the Class B shareholders consist of clients of the Company.<br><br>From the perspective of the holders of the other classes of the Company's common stock, the Exchange Offer Program will result in an increase in the Company's public float, which may place downward pressure on the trading price of the Company's Class A shares, as some former Class B holders may look to sell their exchanged shares. Notwithstanding the foregoing, the initial lock-up provisions mitigate at least part of this risk. Further, as stated by the the board the Exchange Offer Program provides for a more measured and orderly structure for releasing portions of the Class B common stock. In the absence of the Exchange Offer Program, the Class B shares would become convertible into Class A shares all at once (upon final resolution of the U.S. Covered Litigation), which would probably lead to greater volatility in the Company's Class A shares compared to the current proposed structure.<br><br>Moreover, it is believed that the proposed change should be economically neutral to all classes of the Company's shareholders. It appears the Exchange Offer Program will not result in any alterations to the relevant share conversion rates that give greater favor to Class B shareholders. Further, any Class B shareholders who participate in any of the Exchange Offers must enter into makewhole agreements that will effectively provide Class A and Class C shareholders with economically equivalent protection from the remaining U.S. Covered Litigation.<br><br>Consequently, we are voting for this proposal. |
| Right to Adjourn Meeting | Zustimmung | Please refer to Proposal 4 for further details. If there are insufficient votes to approve Proposal 4, the board requests that the meeting be adjourned in order to solicit additional proxies. Consequently, we are voting for this proposal |

| Shareholder Proposal Regarding Third-Party Study of Policy to Prohibit Political Contributions | Zustimmung | It should be noted that the Company has met and exceeded the legal requirements for its lobbying disclosure and has provided reasonably accessible information regarding the policies governing related activities. Moreover, in its response to this proposal, the Company states that a prohibition on political giving would place the Company at a significant competitive disadvantage when advocating for its business interests relative to other companies, and especially relative to peers in the Company's highly regulated industry. Nevertheless, proposals requesting increased transparency on political contributions are in line with policy. Therefore, we are voting for this proposal. |
| Shareholder Proposal Regarding Lobbying Report | Zustimmung | It should be noted that the Company has met and exceeded the legal requirements for its lobbying disclosure and has provided reasonably accessible information regarding the policies governing related activities. Moreover, in its response to this proposal, the Company states that it aims to be responsive to feedback from its shareholders on how it can enhance transparency related to its lobbying and other political engagement efforts, so by its 2024 mid-year Political Engagement Report, the Company will revise the information it provides on significant memberships and will disclose an estimate of the amount of the Company's payments used for lobbying activities. Nevertheless, proposals requesting increased transparency on lobbying contributions are in line with policy. Therefore, we are voting for this proposal. |
| Shareholder Proposal Regarding Amendment to Clawback Policy | Ablehnung | The Company's clawback policy is in line with policy. Moreover, if the Company were to amend its recoupment policy to remove the personal culpability component, it could cause a legitimate business decision to come under scrutiny, which is not the intention of a recoupment policy. Moreover, extending these terms could result in executives taking an overly conservative approach, which could work to the detriment of shareholders. Therefore, we are voting against this proposal. |

| Shareholder Proposal Regarding Independent Chair | Ablehnung | Although policy does not require that the board chair be an independent director, this proposal is largely focused on the seperation of the roles of chair and CEO. The chair/CEO at the Company is currently a combined role, which is not in line with policy. Moreover, the shareholder proponent has put forth adequate justification for their proposal. However, the policy does not require the chair of the board to be independent. Therefore, we are voting against this proposal. |
| Shareholder Proposal Regarding Report on Board Oversight of Discrimination | Ablehnung | In this case, the proponent of the proposal is an anti-ESG proponent, the American Family Association, which describes itself as being 'on the front lines of America's culture war.' Currently, it states that it is 'one of the largest and most effective pro-family organizations in the country.' The AFA states that its mission is to 'inform, equip, and activate individuals and families to transform American culture and give aid to the church, here and abroad, in its calling to fulfill the Great Commission,' and lists the following as its values: (i) evangelism and discipleship; (ii) marriage and family; (iii) sanctity of human life; (iv) stewardship; (v) religious liberty. Moreover, the Company has provided adequate disclosure regarding its oversight of issues related to diversity, inclusion, and belonging efforts and practices as well as its anti-discrimination efforts. Therefore, we are voting against this proposal. |
| Shareholder Proposal Regarding Independent Report on Potential Liabilities of Lead-Sheathed Cables | Zustimmung | Given the nature and scope of the Company's operations, it could be subject to significant risks, including reputational risks, with respect to both worker safety and public health impacts related to legacy networks of lead-sheathed cable. In its response to this proposal, the Company states that it undertook third-party testing in 2023 and the results do not indicate that there is an immediate public health risk requiring remediation associated with lead-sheathed cables. It should be noted that the Company has already commissioned and published the results of an independent, third-party investigation of the sites mentioned by The Wall Street Journal report. As the Company explains in its response to this proposal, the results of the testing that it conducted in 2023 do not indicate that there is an immediate public health risk requiring remediation associated with lead-sheathed cables. Further, the Company adds that it is continuing to work closely with the EPA, its industry, state environmental agencies, and others to address this matter. Nonetheless, given that increased transparency on how a Company is managing its environmental and social related risks is in line with policy, we are voting for this proposal. |

| Vorlage des festgestellten Jahresabschlusses und des gebilligten Konzernabschlusses sowie des zusammengefassten Lageberichts für die Vonovia SE und den Konzern zum 31. Dezember 2023 sowie des Berichts des Aufsichtsrats für das Geschäftsjahr 2023 | Keine Stimmabgabe | Über diesen Tagesordnungspunkt wird nicht abgestimmt. |
| Verwendung des Bilanzgewinns des Geschäftsjahres 2023 der Vonovia SE | Zustimmung | Die Dividende sollte angemessen sein und der finanziellen Lage des Unternehmens entsprechen. In der Regel liegt eine akzeptable Ausschüttungsquote zwischen 20 und 100 Prozent. In diesem Fall soll trotz negativen Earnings per Share eine Dividende ausgeschüttet werden, was gemessen am Bilanzgewinn auch noch nachvollziehbar erscheint. Allerdings entspricht eine Dividende, die den Jahresgewinn übersteigt, nicht den Richtlinien. Da bei Vonovia die relevante Kenngröße nicht der EPS sondern der EBT ist und diese Kennzahl positiv, ist der Dividendenvorschlag angemessen und wir stimmen dem Vorschlag zu. |
| Entlastung der Mitglieder des Vorstands für das Geschäftsjahr 2023 | Zustimmung | Es ist nichts von anhängigen Verfahren gegen Mitglieder des Vorstands bekannt. Das Periodenergebnis ist im Vergleich zum Vorjahr erheblich eingebrochen und zum zweiten Mal in Folge negativ, was jedoch bei Vonovia, ebenso wie den vergleichbaren Werten der Branche, allen derzeitigen Indizien zufolge dem Marktumfeld geschuldet ist. Aus diesem Grund eine Nichtentlastung abzuleiten erscheint verfrüht, insbesondere da dies keinen Governance-Verstoß darstellt, ebensowenig wie die Umstellung des Steuersystems. Dies wird zwar Auswirkungen auf das Vergütungssystem und ggf. die Dividende haben, ein konkreter Richtlinienverstoß ist daraus jedoch nicht ersichtlich. Daher kann die Entlastung unkritisch gesehen werden. Somit stimmen wir für den Antrag. |
| Entlastung der Mitglieder des Aufsichtsrats für das Geschäftsjahr 2023 | Ablehnung | Es ist nichts von anhängigen Verfahren gegen Mitglieder des Aufsichtsrats bekannt. Allerdings sind einige maßgebliche Transparenzpunkte und/ oder Governance-Aspekte nicht gegeben und es fehlen folgende Punkte:<br><br>Vorsitz des Prüfungsausschusses ist nicht unabhängig<br>Regelzugehörigkeitsdauer für Aufsichtsratsmitglieder<br>Aufgrund einiger Mängel bei der Transparenz bzw. | Billigung des Vergütungssystems für die Vorstandsmitglieder | Ablehnung | Über das Vergütungssystem wurde zuletzt im Jahr 2021 abgestimmt und erlangte eine Zustimmungsquote von 87,75 %. Das Vergütungssystem ist teilweise überarbeitet worden, ist aber im Wesentlichen dem bisherigen System sehr ähnlich. | Minutes | Zustimmung | This resolution is a routine formality in this market. |
| Accounts and Reports; Allocation of Profits and Dividends | Zustimmung | A proposed dividend allocation should be comparable to industry peers and should mirror the financial health of the company. In principle, an acceptable pay-out ratio should be above 20 percent and below 100 percent. The company's aggregate pay-out ratio for the fiscal year is in an acceptable range. Given this, we are voting for this proposal. |
| Authority to distribute dividends | Zustimmung | If approved, the board is given authorization to resolve and declare dividends for the financial quarters up to the 2024 AGM. This proposal does not violate policy. Consequently, we are voting for this proposal. |

| Appointment of Nomination Committee | Zustimmung | The Norwegian Code of Practice for Corporate Governance ("the Code") recommends that listed companies have a nomination committee that is majority independent of the board and the company. The nomination committee makes recommendations regarding the election of the board corporate assembly, if applicable, as well as the remuneration for governing bodies.<br><br>In this case, the nomination committee generally meets best practice and does not violate policy. Consequently, we are voting for this proposal. |
| Authority to Repurchase Shares | Ablehnung | At this time, there is no evidence of any past abuse of this type of authority at the company. However, the maximum price has been disclosed in monetary value only, instead of 10% premium or discount of market price. As this is against policy, we are voting against this proposal. |

| Ratification of Auditor | Zustimmung | There is no indication of any investigations or pending court cases pertaining to the auditor. Moreover, the fees paid to the auditor are appropriate and are clearly disclosed by the Company. However, as per US market practice, the lead auditor`s name and tenure has not been disclosed in the company's proxy materials or annual report. The aforementioned notwithstanding, and as stipulated by Sarbanes-Oxley Act of 2002/Title II, "It shall be unlawful for a registered public accounting firm to provide audit services to an issuer if the lead (or coordinating) audit partner (having primary responsibility for the audit), or the audit partner responsible for reviewing the audit, has performed audit services for that issuer in each of the 5 previous fiscal years of that issuer."<br><br>In spite of this, we are voting for this proposal. |
| Shareholder Proposal Regarding Report on Supply Chain Risks From Climate Change | Zustimmung | This proposal effectively requests that the Company provide reporting explaining whether and how the Company has concluded it faces no material supply chain risks from climate change and whether its conclusions on this topic impact its approach to addressing climate change. However, it does not appear that the Company has indicated that climate change does not present a risk to its supply chain and has listed weather-related risks in its 10-K. This proposal also requests additional reporting on how the board is overseeing the Company's management of, and reporting on climate change-related risks. Establishing and disclosing this oversight could be a significant improvement for the Company.<br><br>This proposal centers around the proponent's assertion that in its 10-K, the Company has not disclosed any supply chain risks "whatsoever from climate change (or even severe weather in general)." However, on page 5 of its 10-K, the Company provides disclosure, outlining Supply Chain and Third-Party Risks as well as "Legal, Regulatory and Other External Risks".<br><br>Nonetheless,as demands for increased transparency surrounding climate change issues are generally in line with the basic policy requirements, we are voting for this proposal. |

| Advisory Vote on Executive Compensation | Ablehnung | The Company's disclosure of its remuneration policies and procedures is in line with policy and applicable legislation. The report gives the impression of having been properly prepared. However:<br><br>The STIP awards are largely discretionary.<br>The clawback policy is restatement-dependent only.<br>The board has granted an excessive one-time award. The award granted to Marta Benson at approximately $10 million, exceeds her total reported compensation in each of the two prior years, in which her compensation also consisted of performance-based short- and long-term incentives. The Company discloses that the award was made in connection with her promotion to CEO and President, Pottery Barn Brands and to assist the Company in developing an orderly effective transition plan in connection with the newly developed role. In addition, the Company notes Ms. Benson's anticipated retirement in April 2024 when disclosing that she only received RSUs for fiscal year ending in 2024. It should be questioned whether the substantial increase to her yearly compensation, along with the accompanying lack of any performance-based compensation during the year, was the most reasonable approach to handling a promotion that lasted a little over one year.<br>The LTI does not include ESG criteria.<br>The remuneration structure allows for adjusted metrics.<br>As this is against policy, we are voting against this proposal. |

| Advisory Vote on Executive Compensation | Ablehnung | The Company's disclosure of its remuneration policies and procedures is in line with policy and applicable legislation. The report gives the impression of having been properly prepared. However:<br><br>The Company has failed to disclose the counting methology for executive stock ownership guidelines.<br>The Company's clawback policy is restatement dependent only, which is not in line with best practice.<br>Compensation is not linked to materially significant ESG indicator.<br>The same performance criteria are used for the short-term and the long-term variable remuneration.<br>The board can grant discretionary bonuses. In fact, the Company granted excessive retention awards of performance shares to various executives in 2024 without clearly illustrating why retention is of particular concern to the Company at this time. In addition, several of the one-off awards were discretionary in nature, with minimal discussion regarding their purpose. The potential impact of the one-off awards on overall NEO compensation is concerning given the Company's existing history of above-median NEO compensation levels. Additionally, while the increases to CEO's target direct compensation for the year under review were reasonable, there is a continued misalignment between the CEO's realized five-year pay and the Company's five-year TSR performance.<br>The remuneration structure allows for adjusted metrics.<br>As this is against policy, we are voting against this proposal. |

| Adoption of New Share Option Scheme and Scheme Mandate Limit | Ablehnung | While the proposed dilution is in line with policy, the following issues should be noted:<br><br>Change of Control Provision: The rules of the Scheme includes a provision that provides for accelerated vesting of options, to the extent vested and not already exercised, if the Company changes control. This provision may discourage potential buyers from making an offer for the Company both because the purchase price will be higher and because substantial numbers of employees may earn significant amounts of money and decide to leave their positions with the Company. In short, this sort of provision may not only lower the chances of a deal, but will possibly also lower the premium paid to shareholders in a takeover transaction.<br><br>Short Vesting Period: There is one year minimum vesting period for awards granted under the scheme. A minimum vesting period of at least two years, if not longer, better align shareholders' interests with those of the management when determining equity-based awards. This is as long-term vesting periods serve to incentivize participants to manage long-term performance, noting that risk-taking in one year may have consequences to shareholder value which do not emerge until years later. Where a company chooses to have a short vesting period ! or no vesting period ! for awards, the awards may vest prior to the consequences of risk-taking bears out, essentially becoming short-term "guaranteed payments" rather than acting as long-term incentivizing tools.<br>As this is not entirely in line with policy, we are voting against this proposal. |

| 2024 Related Party Transactions | Ablehnung | It is a common practice for Chinese companies to make deposit transactions through a financial arm of their parent company or within their groups. Such pooling of the group's cash through an unlisted financial vehicle may give the parent company control over the listed company's finances. As the proposed dividend pay-out ratio exceeds 100 percent, we are voting against this proposal. |

| Vorlage des festgestellten Jahresabschlusses der adidas AG und des gebilligten Konzernabschlusses, des zusammengefassten Lageberichts für die adidas AG und den Konzern zum 31. Dezember 2023, des Vorschlags des Vorstands für die Verwendung des Bilanzgewinns sowie des Berichts des Aufsichtsrats für das Geschäftsjahr 2023 | Keine Stimmabgabe | Über diesen Tagesordnungspunkt wird nicht abgestimmt. |
| Beschlussfassung über die Verwendung des Bilanzgewinns | Zustimmung | Die Dividende sollte angemessen sein und der finanziellen Lage des Unternehmens entsprechen. In der Regel liegt eine akzeptable Ausschüttungsquote zwischen 20 und 100 Prozent. In diesem Fall soll trotz negativen Earnings per Share eine Dividende ausgeschüttet. Zwar dürfte eine Dividende zunächst erfreulich sein und es ist auch begrüßenswert, dass das Unternehmen die Dividende stabil halten will. Allerdings entspricht eine Dividende, die den Jahresgewinn übersteigt, nicht den Richtlinien. Da die Restrukturierung des Unternehmens jedoch besser als geplant läuft und der Dividendenvorschlag als Vorgriff auf die guten Zahlen zu Beginn des Jahres 2024 verstanden werden kann, erachten wir den Dividendenvorschlag als angemessen. Zudem haben außerordentliche Belastungen, zu dem negativen Nettoergebnis geführt. Vor dem Hintergrund der Erwartung, dass diese außerordentliche Belastungen einmalig waren, stimmen wir daher zu. |
| Beschlussfassung über die Entlastung des Vorstands für das Geschäftsjahr 2023 | Zustimmung | Es ist nichts von anhängigen Verfahren gegen Mitglieder des Vorstands bekannt. Es ergeben sich auch keine weiteren konkreten Governance-Aspekte bzw. Richtlinienverstöße, welche einer Entlastung der Mitglieder des Vorstands entgegenstehen könnten. Zwar war die Gesellschaft in den letzten Jahren, insbesondere 2022 mit zahlreichen Problemen konfrontiert. Allerdings zeigen sich für das vergangene Geschäftsjahr bislang keine gravierenden Governance-Verstöße. Die Entwicklung sollte zwar weiter beobachtet werden, jedoch kann die Entlastung unkritisch gesehen werden. Somit stimmen wir für den Antrag. |

| Beschlussfassung über die Billigung des Vergütungsberichts | Zustimmung | Über das Vergütungssystem wurde zuletzt im Jahr 2021 abgestimmt und erreichte eine Zustimmungsrate von 83,41%, der letzte Vergütungsbericht erlangte eine Zustimmungsquote von lediglich 67,90%.<br><br>Während das System eigentlich richtlinienkonform war und auch keine Abweichungen vom DCGK vorlagen, hatte die Abfindung von Kaspar Rorsted sowie die damals bereits geplante Adjustierung des LTI für negative Stimmen gesorgt. Es erscheint zwar nachvollziehbar, dass mit dem Eintritt eines neuen CEO die von vorneherein unerreichbaren Ziele disincentivierend gewirkt hätten.<br><br>Allerdings wäre in diesem Zusammenhang hinsichtlich bester Transparenz wenigstens eine vorsorgliche Abweichungserklärung von G.8 DCGK zu erwarten gewesen. Nach Abwägung der Argumente stimmen wir in der Gesamtschau dennoch für den Vergütungsbericht. |

Klimastrategie - Netto-Null-Ziel für Scope 3

| Inhalt | Ergebnis |

| Mit Blick auf die Klimastrategie von Union Investment steht Rio Tinto auf der Prioritätenliste, da das Unternehmen zu den größten CO2-Emittenten in den Portfolios zählt. Das Gespräch konzentrierte sich daher auf die Festlegung von Netto-Null-Zielen für Scope 1 bis Scope 3 vor 2025. | Rio Tinto hat zwar kategorienspezifische Ziele für Scope-3-Emissionen, wie die Dekarbonisierung der Schifffahrt und des Stahls, aber es gibt kein Gesamtziel, das kurz-, mittel- oder langfristig festgelegt ist. Das Unternehmen hat sich allerdings zum Beispiel mit Eisenerzkunden darauf verständigt, Partnerschaften zur Dekarbonisierung zu bilden. Rio Tinto plant nicht, einen Gesamtwert für Scope-3-Emissionen festzulegen. |

Daneben wollte das Unternehmen unseren ESG-Ansatz besser verstehen und welche Themen bei der Unternehmensanalyse speziell zum Tragen kommen. | Ahold Delhaize hat klare Klimaziele für direkte (Scope 1 & 2) und indirekte (Scope 3) Emissionen festgelegt. Das Unternehmen plant, seine direkten Emissionen bis 2025 um 34%, bis 2030 um 50% und bis 2040 um 90% im Vergleich zu einem Referenzjahr 2018 zu reduzieren. Die restlichen 10% sollen durch CO2-Entfernungstechnologien ausgeglichen werden. Ahold Delhaize ist das einzige Unternehmen in seiner Vergleichsgruppe, das Informationen über den Einsatz von CO2-Kompensationen offenlegt. Eine stärkere Verankerung der Klimaziele in der langfristigen Vergütungskomponente des Managements ist erfolgt. Neben der Klimastrategie konzentriert sich das Unternehmen derzeit auf die Umsetzung der CSRD, um den Anforderungen im sozialen Bereich Rechnung zu tragen. |

Wir diskutierten weiterhin die Definition der Nachhaltigkeitsexpertise im Aufsichtsrat. Herr Pischetsrieder sieht wie wir die Selbstauskunft zur Erstellung der Kompetenzmatrix nicht als zielführend an. Er hält sie aber im ersten Schritt als Basis vertretbar. Hinsichtlich der Vorstandsvergütung wiesen wir ausdrücklich darauf hin, dass bei einer Überarbeitung des Vergütungssystems darauf geachtet werden sollte, dass es jeweils eine Obergrenze pro Komponente gibt, d.h. dass sich eine Übererfüllung nicht auf eine andere Komponente auswirken darf. Außerdem sprechen wir kurz über die anhaltenden Streiks im Lufthansa-Konzern. | Bezüglich der Sustainable Aviation Fuels glaubt Lufthansa, laut Herrn Weber, dass es von Vorteil sei, sich hier mit Blick auf 2030 die größtmögliche Flexibilität zu erhalten. Lufthansa wird sich an die gesetzlich vorgegebenen Quoten halten, aber nicht darüber hinausgehen. Lufthansa positioniert sich explizit nicht als Vorreiter in diesem Bereich. Der Einschätzung von Herrn Kley zufolge sind die Fronten zwischen Arbeitnehmern und Vorstand verhärtet und es wird dieses Jahr noch zu weiteren Streiks kommen. Hinsichtlich der klassischen Governance-Themen wurde über die Besetzung des Aufsichtsrats diskutiert. Hier stellte Herr Kley die geplanten Neuerungen vor. Die Qualifikationsmatrix sei bei der Lufthansa keine Selbstauskunft der Mitglieder. Dies ist positiv zu werten. Hinsichtlich der Erhöhung des Prüfungsniveaus von Vergütungs- und Nachhaltigkeitsbericht sagte Herr Kley, dass sie das Level auf "reasonable assurance" anheben werden, wenn dies Marktstandard sei. Sie möchten aber zunächst keine Vorreiter in diesem Bereich werden, da aus ihrer Sicht die Erhöhung nicht mit einer Qualitätsverbesserung einhergehen würde. |

Wir forderten eine professionelle und langfristige Nachfolgeplanung im Aufsichtsratsvorsitz. | Herr Dymond gab umfassende Einblicke in die Entwicklung rund um den designierten Aufsichtsratsvorsitzenden Punit Renjen. Er habe eine sehr operative Rolle eingenommen, die über die Rolle des Aufsichtsratsvorsitzenden hinausging und kritisch gesehen wird. Daher habe man sich zu einer Trennung entschieden. Vorgesehen für die Nachfolge von Hasso Plattner ist nun Pekka Ala-Pietilä, der bereits sehr lange im Aufsichtsrat von SAP saß, jedoch vor einigen Jahren ausschied. Wir äußerten unsere Bedenken hinsichtlich der Unabhängig aufgrund der bereits langjährigen Zugehörigkeit im Aufsichtsrat von SAP und einer potentiellen Ämterhäufung. Feedback zur ESG-Strategie von Bayer

Inhalt

Wir haben mit dem Unternehmen anlässlich des HSBC ESG Chemicals & Pharma Speed-Dating 2024 gesprochen. Unter anderem wurden die ESG-Strategie im Allgemeinen, neue SBTi-Ziele, die Teilnahme an ESG-Berichtsstandards, die laufenden Rechtsstreitigkeiten, Say-on Climate und genetisch veränderte Organismen (GVO) erörtert.

Ergebnis

Bayer hat bei SBTi neue Netto-Null-Ziele für Scope 1, 2 und 3 vorgelegt. Wir haben Bayer um ein Mitspracherecht beim Thema Klima (Say-on-Climate-Beschlüsse) gebeten und darum, eine aktive Rolle bei der Definition von Branchenstandards für die Klimaschutzberichterstattung zu übernehmen. Wir haben erklärt, warum der Einsatz von GVO durch Bayer ein Grund für den Ausschluss von Bayer aus unseren Nachhaltigkeitsfonds ist (GVO schaffen Abhängigkeiten, beeinträchtigen die Artenvielfalt). Bayer zeigte hierfür kein Verständnis und würde dieses Thema gerne weiter erörtern. Wir haben die Tatsache angesprochen, dass ESG kein Thema auf dem Capital Markets Day 2024 war. Hintergrund des Gesprächs war die anstehenden Hauptversammlung. Diskutiert wurden insbesondere die Vorstandsvergütung und die Arbeit des Aufsichtsrats. Wir forderten eine angemessene Peergroup innerhalb der Vergütung und zielführende Maßnahmen zur Erhöhung der Frauenquote auf den ersten drei operativen Ebenen.

Ergebnis

Wir diskutierten intensiv die geplanten Änderungen des Vergütungssystems. Insbesondere hinsichtlich der Peergroup wurden die Perspektiven ausgetauscht. Sie wird aus 15 vergleichbaren Unternehmen bestehen, deren Geschäftsfelder sich mit denen von Heidelberg Materials überschneiden. Die reinen US Player seien schwer zu schlagen. Die Vorteile des Multipliers in der Vergütung wurden damit begründet, dass dieser auch nach unten wirke. Hinsichtlich eines Staggered Boards war der Aufsichtsrat verhalten, da dafür eine Satzungsänderung notwendig sei. Due-Diligence-Prüfung von Menschenrechten: Angebliche Versäumnisse in der Lieferkette

Inhalt

Gegen Tesco ist weiterhin eine Klage vor dem englischen High Court anhängig, in der es um angebliche Versäumnisse im Jahr 2022 im Zusammenhang mit Arbeitsrechtsverstößen in der Bekleidungsfabrik in Mae Sot (Thailand) von VK Garment geht.
Um die Qualität der Due-Diligence-Prüfung von Tesco auf dem Gebiet der Menschenrechte zu beurteilen, bitten wir Tesco, uns folgende Informationen zur Verfügung zu stellen:

• Wie Tesco seine Einkaufspraxis überprüft, um eine Untergrabung der Einhaltung von Menschenrechten zu vermeiden
• Ansatz für den Dialog mit Stakeholdern über Menschenrechte, einschließlich der Frage, wie Tesco betroffene Stakeholder in Due-Diligence- und Beschwerdeverfahren einbezieht
• Kommentare zu den Ausbeutungsvorwürfen von Arbeitskräften aus Myanmar, die behaupten, immer noch in Armut zu leben, weil es keine angemessenen Entschädigungen gibt

Ergebnis

Tesco bekräftigt, dass das Unternehmen sein Engagement für die Menschenrechte sehr ernst nimmt und verweist uns auf seine Menschenrechtspolitik, die Auskunft über die Vorgehensweise von Tesco bei der Sorgfaltspflicht in Bezug auf die Menschenrechte und die Zusammenarbeit mit den Stakeholdern gibt. Tesco bezeichnet die Vorwürfe als äußerst schwerwiegend. Hätte Tesco solche Probleme rechtzeitig erkannt, hätte das Unternehmen die Beziehung zu diesem Lieferanten sofort beendet. Tesco ist bekannt, dass das thailändische Arbeitsgericht den Betroffenen eine Entschädigung zugesprochen hat, und Tesco wird den Lieferanten nachdrücklich auffordern, den Beschäftigten den ihnen zustehenden Lohn auszuzahlen. Angesichts der Sachlage ist es Tesco derzeit leider nicht möglich, ausführlichere Erklärungen abzugeben.

Verantwortungsvoller Umgang mit Künstlicher Intelligenz

Inhalt

Mit den neuesten Entwicklungen im Bereich Künstliche Intelligenz (KI), insbesondere im Bereich der Generative Artificial Intelligence (GenAI), geht eine umfassende Transformation in vielen Wirtschaftsbereichen einher. Diese Transformation bringt sowohl Chancen als auch Risiken mit sich. Als aktiver Vermögensverwalter ist es uns wichtig, gemeinsam mit den Unternehmen einen verantwortungsvollen Umgang mit KI zu fördern und so zu einer nachhaltigen Entwicklung der Gesellschaft beizutragen. Daher fordern wir von dem Unternehmen geeignete Maßnahmen zu ergreifen, um diese Risiken zu identifizieren, zu minimieren und verantwortungsvolle KI-Strategien zu implementieren. In diesem Zusammenhang haben wir das Unternehmen gebeten, einen entsprechenden Fragebogen auszufüllen.

Ergebnis

United Internet zeigte sich sehr kooperativ und hat den Fragebogen umfassend beantwortet. Das hilft uns, einen guten Überblick zu verschaffen und den verantwortungsvollen Umgang mit KI bei dem Unternehmen zu bewerten.

| Inhalt | Ergebnis |
|---|---|
| Im Vorfeld der bevorstehenden Jahreshauptversammlung wurden wir von dem Unternehmen kontaktiert, um unser Abstimmungsverhalten zu besprechen. Dabei ging es insbesondere um die Vergütung und die Nachfolgeplanung. | Die neue Vergütungspolitik trägt der Forderung nach Malus- und Clawback-Klauseln Rechnung. Darüber hinaus werden Abfindungen gekürzt. Die Gewichtung der ESG-Komponente wird reduziert. Die Nachfolge von Herrn Galan wurde erörtert, ebenso wie die Tatsache, dass die Posten des Vorstandsvorsitzenden und des CEO von einer Person in Doppelfunktion besetzt sind. In diesem Zusammenhang haben wir auch über die Kompetenzen des Lead Independent Director gesprochen. |

| Im Vorfeld der bevorstehenden Jahreshauptversammlung haben wir insbesondere die Vorstandsstruktur und die Rolle des Lead Independent Director besprochen. Des Weiteren sprachen wir über das Vergütungssystem und den Abschlussprüfer. Wir forderten eine stärkere Fokussierung auf die Dualität zwischen dem Vorstandsvorsitzenden und CEO und einem unabhängigen Lead Independent Director auf der Grundlage unserer Unabhängigkeitskriterien. Außerdem nutzten wir die Gelegenheit und sprachen kurz über die Klimastrategie des Unternehmens. | Herr Bertinetti erläuterte die künftige Trennung zwischen dem Vorstandsvorsitzenden und dem CEO. Wir haben auch über die Nachfolgeplanung gesprochen, aber es gab keine neuen Informationen zu diesem Thema. Was den Lead Independent Director betrifft, so hält das Unternehmen ihn auf der Grundlage seiner eigenen Kriterien für unabhängig. Wir haben darauf hingewiesen, dass die Amtszeit als Kriterium nicht vernachlässigt werden darf. In diesem Zusammenhang kritisierten wir die lange Amtszeit des Abschlussprüfers, die knapp 60 Jahre beträgt. Die Vergütung wurde näher erläutert. Obwohl sie keine kurzfristigen oder langfristigen Anreize im herkömmlichen Sinne haben, weisen unsere Stimmrechtsberater darauf hin, dass die Vergütung (ihrer Meinung nach) falsch ausgewiesen ist. Die einzelnen Ziele enthalten ESG-Kriterien, die jedoch nicht offengelegt werden. |

Klimastrategie - Scope 3

Inhalt

Während des Austauschs mit Rio Tinto wurden die aktuellen Scope-1- und Scope-2-Ziele sowie die Festlegung von Scope-3-Zielen besprochen. Das Unternehmen ist derzeit nicht auf Kurs, um sein Reduktionsziel für 2025 zu erreichen. Das Unternehmen geht davon aus, bis 2025 Investitionsentscheidungen zu treffen, die zu einer Reduzierung um 15 % führen werden, rechnet aber nicht mit dieser Reduzierung bis zum Ende des Jahrzehnts.

Ergebnis

Rio Tinto hat sich verpflichtet, das Ziel alle drei Jahre zu überprüfen. Für die Anleger wird ein Update im Jahr 2025 erwartet. Das Unternehmen erwägt die Festlegung von Jahreszielen anstelle von Zwischenzielen. Ein weiteres Diskussionsthema war die Uneinigkeit über ein Scope-3-Ziel, aber die Anleger würdigten die Bemühungen von Rio Tinto im Umgang mit Scope-3-Emissionen, insbesondere bei der Dekarbonisierung von Stahl.

Aufgrund der Komplexität der Berichterstattung und der Festlegung von Zielen im Finanzsektor haben wir einen laufenden Dialog mit den größten Finanzinstituten in unserem Portfolio initiiert, um klimabezogene Themen zu adressieren. Während des Treffens mit Société Générale haben wir die Klimastrategie von Union Investment vorgestellt und unsere Erwartung dargelegt, dass sich Portfoliounternehmen Klimaneutralitätsziele in Bezug auf ihre Emissionen in Scope 1 bis 3 geben. Darüber hinaus haben wir unsere Transparenzanforderungen hinsichtlich der Berichterstattung über Scope-3-Emissionen, der Zielsetzung für grüne Finanzierungen und des Managements von Klimarisiken erörtert.

Ergebnis

Als Mitglied der Net Zero Banking Alliance visiert das Bankhaus grundsätzlich die Ausrichtung seines Portfolios auf einen Klimaneutralitätspfad an und hat auch entsprechende mittelfristige Ziele für seinen Kreditbestand festgelegt. Société Générale verpflichtet sich derzeit jedoch nicht zu einem umfassenderen Netto-Null-Ziel für Emissionen in den Scopes 1 bis 3, das auch geförderte Emissionen (facilitated emissions) einschließt. Ergebnis

Seit dem Pariser Klimaabkommen im Jahr 2015 und als Gründungsmitglied der 2021 geschmiedeten Net Zero Banking Alliance hat BNP Ziele für die Erreichung der Klimaneutralität ihrer Kredit- und Anlageportfolios bis 2050 festgelegt. Für die neun Sektoren ihres Kreditbestands mit dem höchsten Ausstoß an Treibhausgasen wurden mittelfristige Ziele abgesteckt. Bitte an Stellantis, den Fragebogen des CDP-Programms zu beantworten

Inhalt

Als Engagement Lead der Non-Disclosure Campaign des CDP haben wir Stellantis kontaktiert. Wir erkennen an, dass Stellantis Klimaschutzziele ausgearbeitet und sich verpflichtet hat, bis 2038 CO2-neutral zu wirtschaften. Zugleich haben wir Stellantis nachdrücklich nahegelegt, seine Fortschritte über eine Teilnahme an der CDP-Umfrage zum Klimawandel transparent zu machen.

Ergebnis

Stellantis lehnt die Teilnahme am Carbon Disclosure Project (CDP) ab, da das Unternehmen die Umsetzung der Richtlinie zur Nachhaltigkeitsberichterstattung von Unternehmen (CSRD) als eine wichtigere Aufgabe ansieht, die seine volle Konzentration und seinen gesamten Einsatz fordert. Der Umsetzung der CSRD räumt es eine höhere Priorität ein als der Beantwortung des CDP-Fragebogens. Wir haben Stellantis gegenüber deutlich gemacht, dass wir uns zwar der mit der Berichterstattung verbundenen Arbeitsbelastung bewusst sind und die Fokussierung auf die CSRD nachvollziehen können, andere europäische Unternehmen einschließlich Mitbewerbern aus der Branche aber dennoch einen Nutzen im CDP erkennen und von dessen Orientierung an den Berichtsstandards ESRS und IFRS S2 profitieren. Auch haben wir erwähnt, dass ein Verzicht auf die Offenlegung leider zu einem F-Rating für Stellantis führen würde, dem Union Investment in der kommenden Abstimmungssaison gegebenenfalls Rechnung tragen werde.

Wir haben den Anruf dazu genutzt, unsere Transparenzanforderungen hinsichtlich der Emissionsberichterstattung und der Festlegung von Klimazielen im Hinblick auf die von Union Investments verfolgte Klimastrategie zu unterstreichen. | Gianluca, Risk Executive für Klima & Natur, hat sich uns in seiner neuen Rolle und unter Verweis auf sein neues Aufgabengebiet vorgestellt. Er nahm unsere Bemerkungen zur Festlegung von Klimazielen und zur Berichterstattung zur Kenntnis, konnte aber vorerst noch keine Aussagen zu weiteren Verbesserungen machen. Engagement zur Klimastrategie

| Inhalt | Ergebnis |
|---|---|
| Mit der 2021 verabschiedeten Klimastrategie für das Portfoliomanagement hat Union Investment beschlossen, die Treibhausgasemissionen im verwalteten Wertpapiervermögen noch vor dem Jahr 2050 auf netto null zu bringen. Daraus leitet sich die Forderung ab, dass sich die Wertpapieremittenten ebenfalls zur Klimaneutralität bis 2050 verpflichten und dieses Ziel verlässlich verfolgen. Diese Foderung haben wir bei den Vertretern der Commerzbank platziert. Aufgrund der Komplexität von Klimazielsetzungen im Finanzsektor und sowie der Sonderstellung des Sektors bei der Finanzierung der Transformation haben wir außerdem über die Zwischenziele der Emissionsreduktion, Klimaaspekte im Risikomanagement sowie Sustainable Finance Ziele besprochen. | Das Gespräch war sehr konstruktiv. Die Commerzbank ist Teil der Net Zero Banking Alliance und verfolgt das Ziel im Kredit- und Investmentportfolio bis 2050 Klimaneutralität zu erreichen. Es liegen wissenschaftsbasierte (SBTi) Zwischenziele vor. Bislang ist das Kapitalmarkt- und Beratungsgeschäft (Stichwort Facilitated Emissions) noch nicht in der Net Zero Zielsetzung einbezogen.Sobald es hier eine Guidance zur Umsetzung seitens SBTi gibt, soll das nachgeholt werden. Im Bereich Sustainable Finance wird derzeit an einer Anschlusszielsetzung über das Jahr 2025 hinaus gearbeitet. Unserer Anregung neben absoluten auch relative Zielsetzungen zu bedenken stand man offen gegenüber. Ein Folgetermin im Vorfeld zur Hauptversammlung 2025 wurde vereinbart. |

Aktionärsdialog über die Klimastrategie

| Inhalt | Ergebnis |

| Der Finanzsektor spielt über die Bereitstellung von Finanzmitteln eine Schlüsselrolle dabei, den Umbau der Realwirtschaft zu beschleunigen. Aufgrund der Komplexität der Berichterstattung und der Festlegung von Zielen im Finanzsektor haben wir einen laufenden Dialog mit den größten Finanzinstituten in unserem Portfolio initiiert, um klimabezogene Themen zu adressieren. Während des Treffens mit Wells Fargo haben wir kurz die Klimastrategie von Union Investment umrissen und unsere Erwartung dargelegt, dass sich Portfoliounternehmen Klimaneutralitätsziele in Bezug auf ihre Emissionen in Scope 1 bis 3 geben. Darüber hinaus haben wir unsere Transparenzanforderungen hinsichtlich der Berichterstattung über Scope-3-Emissionen, der Zielsetzung für grüne Finanzierungen und des Managements von Klimarisiken erörtert. | Wells Fargo ist Mitglied der Net Zero Banking Alliance und strebt somit Klimaneutralität bis zum Jahr 2050 an. Neben den über sein Kredit- und Anlageportfolio finanzierten Emissionen bezieht Wells Fargo auch einen Teil der geförderten (facilitated) Emissionen (im Zusammenhang mit den am Kapitalmarkt begebenen Wertpapieren) ein. Mittelfristige Ziele wurden für die Bereiche Öl und Gas, Stromerzeugung, Automobile, Stahl und Luftfahrt festgelegt. Wir haben Wells Fargo angeregt, weitere emissionsintensive Sektoren einzubeziehen und Scope-3-Emissionen in absoluten Zahlen transparenter offenzulegen. Es wurde ein Follow-up vor der Jahreshauptversammlung im Jahr 2025 vereinbart. |

| Inhalt | Ergebnis |

| Pandora setzt Labordiamanten statt konventionell geförderter Diamanten ein. Die konventionelle Förderung und der Handel von Diamanten geht oft mit Kontroversen u.a. betreffend Arbeitsbedingungen und Menschenrechten einher. | Pandora setzt sogenannte "Lab-grown Diamonds", also synthetische Diamanten ein, deren Qualität und insbesondere Produktionskosten sich weiter verbessert haben. Der CEO wies darauf hin, dass in den USA 2023 erstmals mehr synthetische als konventionelle Diamanten verkauft worden sind. Er erwartet eine deutliche und strukturelle Fortsetzung dieses Trends weg von klassischen Diamanten. Pandora vermeidet durch den Einsatz von synthetischen Diamanten die typischen Kontroversen des Diamantenmarktes. |

Treffen im Vorfeld der Hauptversammlung und Abstimmungsverhalten

| Inhalt | Ergebnis |
|---|---|
| Im Vorfeld der bevorstehenden Jahreshauptversammlung (JHV) haben wir uns zu einer Besprechung mit Ryanair über Governance-Themen und unser Abstimmungsverhalten getroffen. Insbesondere haben wir uns aktuelle Informationen zum Vergütungssystem erbeten. | Zunächst wurde uns mitgeteilt, dass Roberta Neri von ihrer Position im Board of Directors zurücktreten und sich in diesem Jahr nicht zur Wahl stellen wird. Da dies kurzfristig geschah, wurde noch kein Nachfolger gefunden. Das Board of Directors ist groß genug, um die zeitliche Lücke zu überbrücken. Wir haben ausdrücklich nach dem Vorliegen einer Biodiversitätspolitik gefragt. Hierfür gibt es keinen Beauftragten, da es sich für Ryanair um ein nicht wesentliches Thema handelt. Das gesamte Board ist für Nachhaltigkeitsfragen zuständig. Es gibt keinen speziell für dieses Thema Verantwortlichen. Hinsichtlich des Vergütungssystems hat uns Herr Larkin mitgeteilt, dass es Richtlinien für Aktienoptionen gibt, die jedoch von einschlägigen Standardrichtlinien abweichen. Deshalb hat unser Stimmrechtsberater auf diesen Punkt hingewiesen. Darüber hinaus ist ein Nachhaltigkeitskriterium Teil des Vergütungssystems. Es findet eine jährliche Überprüfung der Effizienz des Boards statt. |

| Das Treffen sollte dazu dienen, den neuen Aufsichtsratsvorsitzenden Herrn Brudermüller kennenzulernen. Dabei standen insbesondere die Themen Zukunftsplan, Diversität, Vergütung und die nächste Hauptversammlung im Vordergrund. | Herr Brudermüller hat für seine neue Amtszeit insbesondere die Themen China-Geschäft und auch ESG im Blick. Wir fragten kritisch nach dem avisierten Ziel, die Verbrennerproduktion einzustellen. Laut seinen Aussagen soll Mercedes 100 % elektrisch bis 2039 sein. Dennoch lies sich erkennen, dass die Regulatorik und auch die Marktsituation Einfluss auf dieses Ziel nehmen können. Im Aufsichtsrat wurde noch nicht über neue Zielgrößen hinsichtlich des Frauenanteils in den Ebenen 1 und 2 unterhalb des Vorstands gesprochen. Nach seinen Aussagen geht Kompetenz vor Gender. Allerdings wird in der Besetzung das Thema Diversität immer eingebunden. | 30% der Produktpalette von Coca-Cola besteht aus Produkten mit weniger Zucker oder gar aus Zuckersubstituten. Wir haben in dem Meeting nach einem Update zur Markenstrategie gefragt und wie die Strategie zur weiteren Zuckerreduktion des Portfolios ausgestaltet ist. | Das Unternehmen arbeitet weiter an Neuformulierungen der bestehenden Produkte. Die Nachfrage nach zuckerreduzierten Produkten ist in entwickelten Märkten sehr ausgeprägt. In Entwicklungsländern hingegen noch sehr gering. Bislang hatte Coca-Cola einen dezentralen Ansatz für Produktinnovationen. Dies soll sich nun ändern, um Skaleneffekte besser abzugreifen und den Markenkern zu stärken. |

| Im Rahmen eines Gruppenmeetings der BNP Exane ESG Konferenz haben wir darüber gesprochen wie Produktsicherheit nach der Zantac-Kontroverse sichergestellt werden kann und die AI Strategie thematisiert. | GSK hebt die Wichtigkeit des access to medicine Indexes hervor. Wir haben die Zantac trials thematisiert, bei denen immer noch Gerichtsverfahren ausstehen. Sie sehen keine Fehler im eigenen Umgang mit den Vorwürfen und sehen solche Vorfälle als unvermeidbar. Im Bezug auf Scope 3 Emissionen sind sie auf einem guten Weg ihre Ziele zu erreichen. Falls die finale Testphase des Ventolin Inhalers erfolgreich ist, würde das die gesamten Emissionen um 42 Prozent senken. |

Der Preis von Ozempic ist seit Beginn um ungefähr 40% gesunken. In den USA haben sie eine weite Versicherungsdeckung erreicht. Im Rahmen ihrer Defeat Diabetes Strategie sind sie dabei, Insulin auch ohne ständige Kühlung zwischen 2 und 8 Grad verfügbar zu machen. | Im Rahmen eines Gruppenmeetings auf der BNP Exane ESG Konferenz baten wir um eine Adressierung von Kontroversen im Bezug auf ihre Verkaufspraktiken und Maßnahmen zur Erhöhung der Verfügbarkeit der Produkte zu erläutern. | Novartis legt sehr starken Fokus auf Access und Innovation. Sie sind sich bewusst, dass sie auf der Umweltseite nicht führend sind, da sie sich vor einigen Jahren bewusst dazu entschieden haben, zu priorisieren und das Thema Access in den Vordergrund zu stellen. Sie haben einen zero-tolerance approach was Ethik und Verhalten der Mitarbeiter angeht. |

Nachfolgeplanung und Vorstandsvergütung

| Inhalt | Ergebnis |
|---|---|
| Im Rahmen der jährlichen Corporate Governance Roadshow haben wir diesen Termin insbesondere dazu genutzt, den kürzlich bekannt gegebenen Wechsel im Aufsichtsratsvorsitz sowie die geplanten Änderungen der Vorstandsvergütung zu diskutieren. Wir forderten eine professionelle Nachfolgesuche mit ausreichender Einarbeitungszeit sowie eine Vorstandsvergütung, die näher an den für die Deutsche Börse wesentlichen Stellschrauben ausgerichtet ist. | Herr Jetter begründete den überraschenden Wechsel im Vorsitz des Aufsichtsrats damit, dass er sich intensiver seinen internationalen Ämtern widmen möchte und er den jetzigen Zeitpunkt als passend für einen Wechsel im Vorsitz ansieht. Kompetenzen, die der neue Vorsitz umfassen sollte, sieht er insbesondere in den Bereichen IT, Internationalität, bedingtem Umgang mit dem Regulator und Teamzusammenhalt. Hinsichtlich der Vergütung kritisierten wir insbesondere die breite Indexwahl als Vergleichsgruppe sowie das Fehlen organischen Wachstums. Auch die Kenngröße EBITDA greift aus unserer Sicht zu kurz. Die Kritik wurde respektiert. Gleichzeitig wurde darauf hingewiesen, dass sich die Deutsche Börse bewusst gegen eine eigene Vergleichsgruppe aufgrund der Anfechtbarkeit entschieden habe. |

Governance-Treffen mit WF

| Inhalt | Ergebnis |
|---|---|
| Wells Fargo (WF) hat uns zum jährlichen Herbstdialog mit seinen Aktionären eingeladen. Wir sprachen über die Governance von WF und haben uns insbesondere nach der Risikokompetenz des Boards und dem Vergütungssystem erkundigt. Wir haben zielführende Anreize für Führungskräfte gefordert. | Erörtert wurde die im Board vertretene Risikokompetenz. WF verfügt über eine Reihe an Profilen mit Risikokompetenz einschließlich in Bezug auf finanzielle und nichtfinanzielle Risiken (z. B. mit Herrn Garcia). Wir haben das Problem der ESG-bezogenen Risiken und die speziellen Kompetenzen angesprochen, die erforderlich sind, um diese zu steuern. Es erfolgt auf regelmäßiger Basis eine interne und externe Evaluierung bei WF. Dies soll bei Bedarf eine fortlaufende strukturelle Neuaufstellung des Gremiums sicherstellen. Die Vergütung ermöglicht Zielanpassungen, was wir kritisch sehen. Zudem werden die kurzfristigen Prämien nach Ermessen zugeteilt. WF hat sichergestellt, dass die Verfahren zur Bewertung der Zielerreichung standardisiert sind und Manipulation eindämmen. Zuletzt haben wir eine Kontroverse über die strukturelle Diskriminierung afroamerikanischer Menschen zur Sprache gebracht. WF wird neue Verfahren und Maßnahmen umsetzen, um diese Probleme so weit wie möglich zu unterbinden. |

Schlechter ESG-Score

| Inhalt | Ergebnis |

| Mit dem Unternehmen haben wir über den Hintergrund der schlechten Nachhaltigkeitsausrichtung (ESG Qualität), die sich im schlechten ESG Score widerspiegelt, gesprochen. | Im E-Score schlägt sich offenbar nieder, dass Vertex derzeit noch keine Aussage zu Scope 3 getroffen hat und nicht mit der Science Based Targets Initiative zusammenarbeitet. Der S-Score und das Thema Kontroversen sind geprägt durch Kritik von Interessenvertretern der Patienten am fehlenden Zugang zum "miracle product" Trikafta sowie an der Preispolitik für dieses Medikament gegen Mukoviszidose (cystic fibrosis), welches derzeit für 80% des Umsatzes von Vertex steht und bis 2040 patentgeschützt ist. | Wir haben den Herbstdialog im Telekonferenzformat dazu genutzt, aktuelle Corporate-Governance-Themen anzusprechen. So haben wir um aktuelle Informationen zur Planung der Nachfolge des CEO, zur Diversität innerhalb des Boards und zu den vertretenen Kompetenzen gebeten. | UBS sucht in erster Linie einen internen Kandidaten für die CEO-Nachfolge. Vier Kandidaten sind im Rennen. Der bisherige CEO geht in drei Jahren in den Ruhestand. Somit ist jetzt ein guter Zeitpunkt, um die Kandidaten über eine längere Zeit zu testen und auf den Prüfstand zu stellen. Das Board hält nach neuen Profilen mit technologischer Fachkompetenz Ausschau. Vielfalt ist im gesamten Prozess ein wichtiges Thema. Die Übernahme der Credit Suisse und die Integration dauern an. Bislang sind keine Probleme aufgetreten. Große Herausforderungen sind jedoch bei der Datenmigration zu erwarten. |

Strategie-Update: Klimawandel, CapEx, EACOP

| Inhalt | Ergebnis |
|---|---|
| Anlässlich des jüngsten Strategie-Updates von TotalEnergies sprachen wir unter anderem über Investitionsausgaben (CapEx), die US-Präsidentschaftswahl, $CO_2$-Preissensitivitätsanalysen, physische Risiken, naturbasierte Kohlenstoffsenken und Kontroversen rund um das EACOP-Projekt. | Total stellt etwa 5 Mrd. USD p.a. CapEx für Integrated Power (einschließlich erneuerbarer Energien, aber auch Gas-und-Dampf-Kombikraftwerke) bereit. Es fallen immer noch hohe Investitionsausgaben für Öl und Gas an (allerdings vorwiegend für die Instandhaltung). Total rechnet nicht vor 2030 mit dem Ölfördermaximum und wird die Investitionsausgaben für Öl und Gas nicht weiter kürzen. Daran wird sich auch unter Donald Trump (im Falle einer Wahl) nichts ändern. Alle Projekte sind bei $CO_2$-Preisen von 100 USD/t rentabel (bei einer Sensitivitätsanalyse ergeben sich nur "geringe" Beeinträchtigungen bei 200 USD/t). Angeblich sind keine wesentlichen physischen Risiken erkennbar (Diversifizierung). $CO_2$-Zertifikate kosten ca. 20 USD/t $CO_2$. Was die EACOP-Due-Diligence-Prüfung betrifft, so wurde eine Überprüfung durch Dritte in Auftrag gegeben. Der Veröffentlichungstermin ist jedoch unklar, da der Prüfer offenbar erkrankt ist. Angeblich sind 100 % der Umsiedlungen und 99 % der Kompensationen abgeschlossen. Wir werden diese Kontroverse per E-Mail weiterverfolgen. |

Energiewende, Ørsted-Deal, CCS, Besteuerung

| Inhalt | Ergebnis |
|---|---|
| Wir haben über die jüngsten Updates zum Plan für die Energiewende sowie über Einzelheiten zu der 10-prozentigen Beteiligung gesprochen, die Equinor kürzlich an Ørsted erworben hat. Weitere Themen waren die Entwicklungen im Bereich der Kohlenstoffabscheidung und -speicherung (CCS) und die Besteuerungsstruktur von Equinor in Norwegen. | Die Investitionsausgaben für erneuerbare Energien lagen 2023 bei 20 % der Bruttoinvestitionsausgaben und werden bis 2030 auf >50 % steigen. Dadurch wird der Anteil erneuerbarer Energien an der Energieerzeugung bis 2035 auf 15-20 % steigen. Der Ørsted-Deal war finanziell motiviert, könnte aber zum Ziel von Equinor im Bereich erneuerbare Energien beitragen. Es wurden noch keine Synergien verzeichnet. Die Verringerung von Scope-1- und Scope-2-Emissionen (20 % Energieeffizienz, 20 % Konsolidierung von Anlagen, 60 % Elektrifizierung) liegt im Rahmen des Ziels für 2030. Die angestrebte Reduzierung von Scope-3-Emissionen soll angeblich mit den geplanten Investitionsausgaben erreicht werden, allerdings erst, wenn die CCS-Anlagen in Betrieb sind. Erhebliche Kapazität in der Kohlenstoffabscheidung und -speicherung (30-50 Mio. t $CO_2$ pro Jahr bis 2035). Breakeven der Kohlenstoffabscheidung und -speicherung bei ~100 EUR/t $CO_2$ im EU-Emissionshandel. Der effektive Steuersatz beläuft sich in Norwegen auf 90 % (78 % + Kapitalbeteiligung der Regierung). Sehr stabil und langfristig vorhersehbar. Großer Puffer für den Fall von Preisschwankungen bei fossilen Brennstoffen. |

Hierbei wiesen wir darauf hin, dass in der kurzfristigen Vergütungskomponente zumindest Beispiele für mögliche Kennzahlen genannt werden sollten. Daneben sollte eine Doppelverzielung von Kennzahlen zwischen kurz- und langfristiger Komponente vermieden werden. Bezüglich der aus unseren Sicht fehlenden Unabhängigkeit des Prüfungsausschussvorsitzenden sagte Frau Streit, dass aus ihrer Sicht für die Einschätzung der Unabhängigkeit die Zeit im Vorsitz des Prüfungsausschusses und nicht die Zugehörigkeitsdauer im Aufsichtsrat herangezogen werden sollte. Es ist jedoch möglich, dass er als Vorsitzender des Vorstandes bleibt, da die Rollen in Zukunft getrennt werden. Für die Position des CEO werden mehrere Kandidaten in Betracht gezogen, wobei die Kompetenz Vorrang vor dem Geschlecht hat. In Bezug auf die Vergütung sind keine Pläne zur Schaffung von mehr Transparenz oder zur Änderung der aktuellen Struktur vorgesehen. Das Unternehmen hält die neuen Änderungen in der Klimaberichterstattung für angemessener und plant keine zusätzlichen sektorspezifischen Ziele in Bezug auf finanzierte und begünstigte Emissionen. Fortschritte bei dem Erreichen der Klimaziele

| In unserem Gespräch mit Herrn Spohr wurden die Herausforderungen durch die Verzögerungen bei der Auslieferung neuer Flugzeuge sowie die Implementierung nachhaltiger Flugkraftstoffe (SAF) und deren Einfluss auf die Erreichung der Klimaziele von Lufthansa diskutiert. | Herr Spohr hob hervor, dass die Flottenerneuerung ein zentraler Faktor darstellt, der das Potenzial zur Steigerung der Effizienz um bis zu 30% bietet. Er erläuterte, dass das Jahr herausfordernd war und sich diese Situation wahrscheinlich bis 2025 fortsetzen wird, jedoch ab 2026 eine Verbesserung erwartet wird. Bezüglich der EU-Vorgaben für die Beimischung nachhaltiger Kraftstoffe äußerte Herr Spohr Bedenken hinsichtlich deren Realisierbarkeit und plädierte für eine Überprüfung dieser Quoten durch die EU. Insbesondere im Hinblick auf die Effizienz von Power-to-Liquid-Technologien, die durch hohe Energieverluste gekennzeichnet sind. Herr Spohr betonte die Notwendigkeit einer sachlichen Diskussion, um realistische und effiziente Ansätze zu entwickeln. |

| Im Zuge des Earnings Calls des 3. Quartals hatten wir die Gelegenheit das Thema ESG auf Vorstandsebene zu besprechen. Wir forderten die Setzung eines umfassenden Netto-Null-Ziels sowie die Berücksichtigung von Künstlicher Intelligenz (KI) und Biodivesität | Herr Buch führte aus, dass die neuen Bauaktivitäten insbesondere mit nachhaltigen Rohstoffen, wie Holz erfolgen sollen. Wir wiesen darauf hin, dass zu desem Zweck überlegt werden muss, wo das Holz herkommt und wie das Thema Deforestation und Biodiversity in diesem Prozess intergriert wird. Wir wiesen weiterhin darauf hin, dass kein vollumfängliches Netto-Null-Ziel besteht. Herr Buch konnte aber den eingeschlagenen Klimapfad glaubwürdig argumentieren. Um dem Fachkräftemangel entgegenzuwirken, sollen vermehrt Arbeiter aus Kolumbien angeworben werden. KI als große Chance für Geschäftsmodell (z.B. Kontakt zu Kunden). Transformation bei Teleperformance

Inhalt

Im Rahmen der Erstellung des Transformationratings haben wir uns insbesondere mit den Themen Emissionsreduktion, Künstlicher Intelligenz (KI) und mentaler Mitarbeitergesundheit beschäftigt. Teleperformance hat dieses Jahr neue, ambitioniertere mittelfristige Reduktionsziele von der SBTi verifizieren lassen. Die Auswirkungen von KI sind für das Unternehmen als sehr weitreichend einzustufen. Sowohl die verwendeten Tools als auch die Art der Anfragen werden sich ändern, hier geht der Trend zu "higher value"-Tätigkeiten und das Empathie wichtiger wird. Auch Risikomanagement spielt eine große Rolle
Großer Fokus des Gespräches war das Thema mentale Gesundheit, insbesondere im Bereich "Content Moderation". Hierzu stellte das Unternehmen präventive und reaktive Maßnahmen vor.

Ergebnis

Die Antworten des Unternehmens, insbesondere zum Umgang mit KI, werden im Rahmen des Transformationsratings berücksichtigt.

Außerdem haben wir die jüngste "sehr gravierende" Kontroverse um die Menschenrechte in Mosambik im Zusammenhang mit Flüssigerdgas (LNG) ausführlich diskutiert. | Lionel Zinsou wurde mit dem EACOP-Bericht beauftragt. Er wurde krank, befindet sich aber auf dem Weg der Besserung. Die Veröffentlichung wird daher für das 1. Quartal 2025 erwartet. Als geschäftsführender Gesellschafter der Beratungsfirma SouthBridge und ehemaliger Präsident von Benin kennt er sich mit afrikanischen Angelegenheiten im Allgemeinen aus. TotalEnergies konnte jedoch nicht erklären, warum er ausgewählt wurde und nicht beispielsweise eine renommierte Anwaltskanzlei. Es gibt auch keine Hinweise darauf, dass er zuvor einen ähnlichen Bericht erstellt hat. Dies lässt Zweifel an der Unabhängigkeit und Qualifikation aufkommen. In Bezug auf Mosambik bestreitet Total nachdrücklich alle Vorwürfe. Seit dem Artikel in Politico ermitteln die Regierungsbehörden. Bei der Due-Diligence-Prüfung für Menschenrechte im Jahr 2022 (LKL) und 2023 (GUS-Umfrage) wurden keine Beweise für Verstöße gefunden. Vorstandsvergütung und Hauptversammlung

| Inhalt | Ergebnis |
|---|---|
| Im Hinblick auf die Hauptversammlung im kommenden Jahr wurden in diesem Gespräch vor allem die geplanten Themen der Agenda und dabei insbesondere die Vorstandsvergütung diskutiert. Wir forderten eine höhere Beschränkung des diskretionären Ermessensspielraums seitens des Aufsichtsrats. Daneben wiesen wir auf das fehlende Scope 3 Klimaneutralitätsziel hin. | Evonik hat auf der letzten Hauptversammlung sehr schlechte Zustimmungsergebnisse zum Vergütungsbericht erhalten. Die Kritik lag vor allem in der Transparenz und in den weiten Ermessensspielräumen des Aufsichtsrats hinsichtlich einer Anpassung der Vorstandsvergütung. Da es Evonik nicht möglich war, das Vergütungssystem in diesem Jahr zu überarbeiten (die Überarbeitung ist für das nächste Jahr angekündigt), können sie die Kritik bis zur nächsten Hauptversammlung nur zum Teil beilegen. Wir haben die weiterhin bestehenden Kritikpunkte betont und dazu aufgefordert, diese bei der Überarbeitung im nächsten Jahr zu verbessern. Das fehlende Scope 3 Klimaneutralitätsziel war bekannt. Hier wurde zugesagt, dieses Manko erneut in die Organisation zu spielen. |
