Note

Units may be acquired only on the basis of the current sales prospectus and the key investor information accompanied by the most recent annual report and, if available, the semi-annual report.

Dear Investor,

The following pages will provide you with detailed information on the trends observed on the capital markets during the period under review (1 October 2020 to 31 March 2021). You will also find a comprehensive set of figures, including the statement of assets for the reporting period which ended on 31 March 2021.

US yield hike becoming a burden

Initially, US government bonds were influenced by the US election. The landslide victory that pollsters had previously predicted for Joe Biden surprisingly failed to materialise. Due to the initial lack of a clear majority in the US Congress, there was doubt as to whether he would be able to implement his agenda. Moreover, Democrats and Republicans failed for a long time to agree on another stimulus package. A compromise was only reached in this regard shortly before the turn of the year. Initially encouraging results on vaccine trials and then later the start of the first vaccinations boosted investors' optimism about the economy and caused US government bonds to dip slightly. The trend towards higher yields that began in August thus continued with great momentum in the following months. The yield on ten-year US government bonds, which was still at 0.69% at the end of September, peaked at more than 1.75% at the end of March. The Biden administration's further extensive economic stimulus package of up to USD 1.9 trillion proved to be a particular burden. Market participants grew concerned about whether the measures were too extensive and whether the strong economic growth could be accompanied by a rise in inflation. In addition, the package further increased government debt and investors worried that the Federal Reserve might begin tapering its bond purchases. Measured against the JP Morgan Global Bond US Index, US government bonds lost 4.5% in the reporting period.

Already in October, the rising coronavirus infection figures caused uncertainty in the market for euro government bonds. As circumstances developed, many countries then had to adopt a second lockdown. However, the yield on ten-year federal bonds fell only slightly. In view of the already strongly negative interest rate, investors did not see sufficient upward potential for prices. By contrast, the price performance of securities from the peripheral countries was far more surprising. These did not lose value in this difficult environment, as is usually the case, but found ample support in the purchases of the European Central Bank (ECB), extensive maturities and an incipient fiscal union. Disruptive factors such as Brexit and an initially unapproved EU budget gradually turned into positive emotions, so that for a spell a friendly undertone still prevailed. Later, however, euro government bonds were unable to escape the developments in the USA and also ceded ground.

However, comparatively slow vaccination progress, rising infection figures towards the end of the reporting period and greater support from the central bank meant that losses on this side of the Atlantic were less severe. The ECB expanded its daily purchases under the PEPP (Pandemic Emergency Purchase Programme). Government bonds from the peripheral countries were more sought after than those from the core countries. Italian bonds benefited from a change of government. In former ECB chief Mario Draghi, a technocrat with excellent economic and political connections in Europe and an advocate of the monetary community has been found. Based on the iBoxx Euro Sovereign Index, Euro government bonds posted a loss of 2.1%.

Declining risk premiums on European corporate bonds compensated for rising yields. At the index level (ICE BofA Euro-Corp. Index, ER00), corporate bonds logged a slight increase of 0.5%. The search for yield initially helped emerging market bonds (J.P. Morgan EMBI Global Div. Index) to make gains. However, a large part of this was later lost again as a result of the rise in yields on US government bonds. In the end, an increase of 1.0% remained.

Stock markets on the rise despite COVID pandemic

The global stock markets made significant gains during the six months under review. The recovery was driven by programmes adopted by many governments and central banks to mitigate the economic impact of the coronavirus pandemic, combined with research and approval of vaccines for the virus. Global stock markets once again focused heavily on news indicating that the economic consequences of the pandemic had been overcome. On the other hand, they largely ignored the weak state of the global economy, as well as the still ongoing global increase in the number of new infections and the renewed lockdowns in many countries. In the USA, the agreement on a further government economic stimulus package, the Fed's continuing loose monetary policy and the easing uncertainty in connection with the US presidential election boosted prices in the autumn of 2020. In Europe, prices were driven by government support measures combined with the ECB's monetary policy support. In the new year, good EU economic data also led to price gains.

Finally, with the start of mass vaccination, hopes grew that the economy would soon open up, even though progress on vaccination has been slow thus far in some countries – such as the eurozone. The data from the vaccination pioneer countries Israel, Great Britain and the USA give grounds for confidence that in the course of the year, after the initial difficulties, major steps can be taken towards herd immunity in many countries and that the pandemic can thus be strongly contained and, potentially, overcome. Despite the fact that economic activity is still at a standstill, especially in many service sectors, the economy is holding relatively steady – especially in comparison with the slump in the previous year. Globally, companies have also reported on the whole very robust fourth quarter 2020 results.

The MSCI World Index climbed 18.5% (in local currency) on balance over the past six months. In the USA, the S&P 500 Index rose by 17.9% overall. The Nasdaq Composite Index rose by 18.6%. In Europe, the STOXX Europe 600 index posted a similarly high gain of 19.0%. In Japan, the NIKKEI 225 index climbed 25.9%, while emerging markets (MSCI Emerging Markets index) were up 19.9%.

Important information:

Unless otherwise specified, the data source for the financial indices is Refinitiv. All unit performance data on the following pages is taken from Union Investment's own calculations in accordance with the method applied by the German Investment Funds Association (BVI), unless otherwise specified. The ratios illustrate past performance. Future results may be either higher or lower.

Detailed information on the Management Company and the Depositary of the investment fund (the "Fund") can be found on the last pages of this report.

Fund assets	3,228,973,141.59

1) The consolidation of the Quoniam Funds Selection SICAV is performed according to the gross method. If the net method had been applied, the consolidated total net assets would have been reduced by EUR 21,510,881.64 to EUR 3,207,462,259.95. This results from the investment of the sub-fund Quoniam Funds Selection SICAV - Global Equities MinRisk in shares of the sub-fund Quoniam Funds Selection SICAV - European Equities MinRisk as well as from the investment of the sub-fund Quoniam Funds Selection SICAV - Global Equities MinRisk All Countries in shares of the sub-fund Quoniam Funds Selection SICAV - Emerging Markets Equities MinRisk.

Assets in USD were converted into Euro at the exchange rate as at 31.03.2021: 1 EUR = 1.1752 USD.

Assets in NOK were converted into Euro at the exchange rate as at 31.03.2021: 1 EUR = 10.0312 NOK.

Forward exchange transactions

On the 31st of March, 2021 the following open forward exchange transactions were outstanding:

Currency		Monetary amount	Market Value	Per cent of sub-fund assets
				EUR
CHF/EUR	Currency buys	20,160,000.00	18,232,925.62	5.27
USD/EUR	Currency buys	8,311,300.00	7,067,996.93	2.04
EUR/GBP	Currency sales	7,660,000.00	8,989,238.73	2.60
EUR/USD	Currency sales	242,300,000.00	206,053,885.26	59.59

Exchange rates

For the valuation of assets in a foreign currency, the following exchange rate for 31 March 2021 was used for conversion into Euro.

Australian dollar	AUD	1	1.5427
British pound	GBP	1	0.8517
Canadian dollar	CAD	1	1.4769
Japanese yen	JPY	1	129.8361
Norwegian krone	NOK	1	10.0312
Swiss franc	CHF	1	1.1059
US dollar	USD	1	1.1752

Purchases and sales from 1 October 2020 to 31 March 2021

Purchases and sales of securities, loans evidenced by promissory notes and derivatives, including changes without money movements, made during the reporting period insofar as they are not specified in the schedule of assets.

Exchange rates

For the valuation of assets in a foreign currency, the following exchange rate for 31 March 2021 was used for conversion into Euro.

Australian dollar	AUD	1	1.5427
British pound	GBP	1	0.8517
Canadian dollar	CAD	1	1.4769
Japanese yen	JPY	1	129.8361
US dollar	USD	1	1.1752

Purchases and sales from 1 October 2020 to 31 March 2021

Purchases and sales of securities, loans evidenced by promissory notes and derivatives, including changes without money movements, made during the reporting period insofar as they are not specified in the schedule of assets.

Forward exchange transactions

On the 31st of March, 2021 the following open forward exchange transactions were outstanding:

Currency	Monetary amount	Market Value	Per cent of sub-fund assets
			USD
EUR/USD	Currency buys	97,669,621.48	114,850,293.92
USD/EUR	Currency sales	1,708,135.41	2,008,606.67

Exchange rates

For the valuation of assets in a foreign currency, the following exchange rate for 31 March 2021 was used for conversion into US dollar.

Euro	EUR	1	0.8509
------	-----	---	--------

Purchases and sales from 1 October 2020 to 31 March 2021

Purchases and sales of securities, loans evidenced by promissory notes and derivatives, including changes without money movements, made during the reporting period insofar as they are not specified in the schedule of assets.

The notes on the report form an integral part of this report.

Notes on the report as at the end of March 2021

The SICAV's accounts are kept in Euro. Exceptions are provided by the Quoniam Funds Selection SICAV - Global High Yield MinRisk, the Quoniam Funds Selection SICAV - Global Equities MinRisk All Countries as well as the Quoniam Funds Selection SICAV - Global Equities. The sub-fund currency for the sub-funds Quoniam Funds Selection SICAV - Global High Yield MinRisk as well as Quoniam Funds Selection SICAV - Global Equities is US dollar and the sub-fund currency for the sub-fund Quoniam Funds Selection SICAV - Global Equities MinRisk All Countries is Norwegian krone.

The consolidated composition of the fund's assets corresponds to the sum of the presentations for the individual sub-funds, converted at year-end rates. Investments between sub-funds (where one sub-fund invests into another sub-fund of the Quoniam Funds Selection SICAV) are not object of an elimination for the purposes of consolidated presentation of results.

The semi-annual accounts of the SICAV were prepared in accordance with the classification and valuation principles as applicable in the country of domicile.

The price of securities and other exchange-listed derivatives reflects the relevant stock exchange or market value at the end of March 2021. Securities traded on a regulated market are valued at the market prices published for the relevant market. Investment fund units in target funds are valued at their most recently published prices.

If the sub-funds hold OTC derivatives on the closing date, these are valued daily on the basis of indicative quotes from brokers or mathematical valuation models.

If the sub-funds have pending forward exchange transactions, these are valued based on the forward rates applicable to the residual maturity.

Securities whose prices are not in line with market conditions and all assets for which no representative market value can be obtained are valued at a price established by the appointed Management Company in good faith using recognised valuation rules.

Bank deposits were estimated at par value.

Assets and liabilities denominated in currencies other than that of the sub-fund were converted into the respective sub-fund currency at the last available mean rate of exchange. All transactions in foreign currencies were converted to the sub-fund currency at the applicable exchange rate on the respective booking date. Realised and unrealised currency gains and losses are included as income or expenses.

The deferred interest includes accrued interest as at the end of the financial year.

Several sub-funds have a number of different share classes that contribute to the development of the sub-fund in proportion to their net asset value and after deducting the respective proportion of the costs.

The issue or redemption price of the sub-fund shares is calculated as the net asset value per share on the respective trading day plus an initial sales charge and/or redemption fee as defined in the prospectus where applicable. The initial sales charge shall be levied in favour of the appointed management company and the distributor and can be scaled according to the size of the order. The redemption fee is credited to the sub-fund.

Share purchases and redemptions of the sub-fund are subject to the swing pricing procedure. The procedure is intended to protect shareholders of the sub-fund from the net capital flows which occur as a result of purchases and redemptions and the associated costs of the investment or disinvestment. The swing pricing committee stipulates a threshold value for the amendment of the net asset value per share in the event of a particular net capital flow being exceeded. The swing pricing committee also stipulates the percentage ("swing factor") by which the net asset value will be increased or reduced. This value is based on the anticipated transaction costs, tax burdens and/or bid/offer spreads ("spreads"). The fundamental procedure ("single swing pricing") stipulates that the increased or reduced net asset value per share be established for all expenses, redemptions or exchanges on a trading day. The maximum swing factor for the sub-fund is 2%.

The fees of the appointed Management Company of the SICAV and the all-in fee are calculated based on the net fund assets per calendar day and paid out on a monthly basis. The all-in fee covers the depositary fee, general custody and bearing fees for holding assets in custody, auditors' fees, costs of appointing proxies and costs of principal management activities, such as fund accounting reporting, and taxe d'abonnement. The calculation is based on a contractual agreement.

If profit and loss includes other expenses, these expenses consist of the costs referred to in the prospectus, such as government fees, collateral management fees, or cost of changes to the prospectus.

Earnings and expense adjustments have been charged to the ordinary net income. These include net income generated during the reporting period, which purchasers of shares pay as part of the issue price, and sellers of shares receive in the redemption price.

The net assets of the following share classes are currently subject to a "taxe d'abonnement" of 0.05% p.a. in Luxembourg, payable quarterly and based on the respective reported net fund assets at the end of the quarter:

Quoniam Funds Selection SICAV - European Equities - EUR A dis,
Quoniam Funds Selection SICAV - Emerging Markets Equities MinRisk - EUR A dis,

Quoniam Funds Selection SICAV - Global Equities - EUR I dis und
Quoniam Funds Selection SICAV - Global Equities - USD I acc

Insofar as sub-fund assets are invested in other Luxembourg investment funds that are already subject to the taxe d'abonnement, the portion of sub-fund assets invested in such Luxembourg investment funds is exempt from the tax.

Income from the investment of the net assets will not be taxed in Luxembourg. However, it may be subject to withholding or other tax in the countries in which the net assets are invested. Neither the appointed Management Company nor the Depositary will obtain individual or collective receipts for such taxes.

In conjunction with transactions in listed and/or OTC derivatives, the SICAV is required to deliver or hold collateral in the form of bank deposits or securities.

The positions "Other bank deposits/bank liabilities" include collateral provided/received by the sub-funds in the form of bank deposits for listed and/or collateral provided for OTC derivatives. Collateral provided in the form of securities is recorded in the schedule of assets. Collateral received in the form of securities and collateral for OTC derivatives in the form of bank deposits are not listed in the composition of the sub-fund's assets or the schedule of assets.

Sub-fund share performance is calculated on the basis of the share prices published on the closing dates according to the BVI formula. It may differ slightly from the performance of the shares as shown in the sub-fund's report.

The appointed Management Company, in its function as the appointed Management Company of the SICAV, may benefit from "soft commissions" (e.g. broker research, financial analyses, market and price information systems) in connection with trade transactions. Said commissions are used in the interests of shareholders when making investment decisions. Transactions of this type cannot be conducted with natural persons; the service providers concerned may trade only in the interests of the SICAV and the services provided must be directly associated with the activities of the SICAV.

Since the end of 2019, the spread of the corona virus Covid-19 can be observed, initially in China and now on all continents. The pandemic and the worldwide determined containment measures caused particularly in March 2020 massive shifts on all capital markets. These shifts led to fluctuations in the performance of the investment fund, which, however, stabilized in the further course. By the use of appropriate measures the operational continuation of the investment fund is secured until today and its liquidity was always guaranteed in the reporting period. The committee of the Management Company continues to track the capital markets and the efforts of the government to contain the spreading of the virus and observes potential economic impacts on the investment fund.

Note on the Law of 17 December 2010

The SICAV was set up in accordance with Part I of the Luxembourg Law of 17 December 2010 relating to undertakings for collective investment ("Law of 17 December 2010") and fulfils the conditions laid down by Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 on the coordination of legal and administrative provisions relating to undertakings for collective investment in transferable securities ("Directive 2009/65/EC").

Other information of the appointed Management Company

Disclosures in accordance with Regulation (EU) 2015/2365

Other information

Securities transactions are only ever carried out with counterparties included in a list of approved parties by the fund management. The list is reviewed on an ongoing basis. Criteria such as quality of execution, level of transaction costs, quality of research and reliability in the settlement of securities transactions are given precedence. Furthermore, the annual reports of the counterparties are examined.
