Shares may be acquired only on the basis of the current sales prospectus and the key investor information accompanied by the most recent annual report and, if available, the semi-annual report.

# Preface

## Dear Investor,

The following pages will provide you with detailed information on the trends observed on the capital markets during the reporting period (1 October 2021 to 30 September 2022). You will also find a comprehensive set of figures, including the statement of assets for the reporting period which ended on 30 September 2022.

## High inflation weighs on bond markets

Yields on both the U.S. and euro government bond markets rose significantly in the reporting period. The prospect of extensive U.S. stimulus programmes, progress in the fight against coronavirus combined with the expectation of a comprehensive economic recovery boosted inflation expectations as early as the second half of 2021. Inflation then also increased significantly in both economic areas, driven primarily by energy prices. The Fed followed developments patiently for a long time, then in March 2022 gave a clear signal of the start of the rate hike cycle with the first rate hike of 25 basis points. The end of bond purchases and a reduction in the Fed's balance sheet are further points in its revised monetary policy. The war in Ukraine did briefly support safe government bonds. However, price developments triggered primarily by energy prices and also significantly higher inflation expectations led to noticeable losses in U.S. government bonds. In the spring, the trend towards higher yields then continued with increased momentum.

A strong labour market, high wage growth and substantial savings ensured a continued willingness to spend in the US. A difficult task for the monetary authorities. But central bankers reacted, raising key interest rates and announcing larger and further interest rate steps during the reporting period. The yield on ten-year US securities then initially rose to 3.5%. As a result, many investors became increasingly concerned that the US Federal Reserve's monetary policy could be too expansionary and possibly drive the US economy into recession. This was followed by a correction at the end of June. The result was a significant decline in yields. There was no all-clear with regard to inflation. On the contrary, inflation rates continued to rise. The tide therefore turned again from August onwards, as the US Federal Reserve continued to pursue a very restrictive monetary policy and raised the key interest rate in several steps to 3.25%. This caused a significant rise in yields, especially for short-term bonds. Two-year US securities climbed to just under 4.3%. The yield on long-dated US securities rose less sharply, resulting in an inverse yield curve. In the past, this was often a harbinger of recession. Measured against the JP Morgan Global Bond US Index, US government bonds lost 12.5% in the reporting period.

European government bonds performed in essentially the same direction. Prices initially came under downward pressure here too. High energy prices and fears that Russia could further reduce or even completely stop its energy supplies – in conjunction with rising food prices – caused inflation to rise further. Expectations of the European Central Bank (ECB) also rose accordingly. Although the monetary authorities announced an initial interest rate hike for July, this did not seem to be enough for many market players. From mid-June onwards, economic concerns therefore also spread in the eurozone. Key leading indicators deteriorated, and in Europe there were also concerns about an energy crisis in the coming winter. Inflationary pressures, however, would not abate and so the inflation rate rose to ten percent year-on-year. The European Central Bank therefore took another interest rate step and announced additional measures. In the eurozone, the yield on the ten-year Bund rose from -0.2% at the end of September 2021 to 2.1% most recently. Measured by the iBoxx Euro Sovereigns Index, this meant a loss for euro government bonds of 17.2%.

European corporate bonds also suffered from rising risk premiums, falling 15.6% as measured by the ICE BofA Euro Corporate Index (ER00). Emerging market bonds were weighed down by high risk aversion, the sharp rise in US yields and a strong US dollar, and even lost more than 24% in value as measured by the J.P. Morgan EMBI Global Diversified Index.

## Stock markets with significant losses

After an exceptionally good fourth quarter of 2021, which was mainly marked by the end of the coronavirus pandemic, the capital markets experienced turbulence in the current year. There was a temporary recovery in July 2022 before the downward trend continued in August and September. Due to the persistently high inflation, important central banks such as the Federal Reserve (Fed) in the USA and the European Central Bank soon announced that they were bringing their monetary policy normalisation forward. They argued for swift interest rate hikes, but also for a more rapid shift to quantitative tightening. The key interest rate expectations of market players rose significantly as a result. Russia's invasion of Ukraine at the end of February then led to significant market reactions. While in the first trading weeks of 2022 mainly the bond markets and growth stocks were under pressure due to the expected turnaround in interest rates, the uncertainty increased considerably with the escalation in Ukraine – also with regard to the further development of the economy and inflation – and also affected the stock markets. Inflation climbed to its highest level since the oil crisis in the 1970s, mainly due to the sharp increase in energy and agricultural prices. The price declines spread to the entire stock market worldwide.

Despite an initial rise in new coronavirus infections due to the Omicron variant, the pandemic hardly played a role for the capital markets – with the exception of China.

The economic consequences of the war in Ukraine are becoming increasingly clear. Because of its proximity to the war events and higher dependence on Russian energy supplies, Europe is feeling the rise in energy and agricultural prices far more than the US. Up to September, inflation in the eurozone rose to 10.0% (annualised). Although the US economy is not suffering as much from the Ukraine war, the inflation rate there also reached record highs at an annualised 9.1% as of June due to high consumer demand and a tight labour market. However, the US inflation rate declined slightly again to 8.2% by September. The US stock markets therefore also came under considerable pressure in view of the far more restrictive monetary policy course of the Fed. In general, growth concerns have recently increased significantly. July saw a recovery in the bond market as yields declined. However, hopes that a large part of the interest rate hikes by the central banks might already be behind us have again receded. In the US, the Fed raised the key interest rate for the third time in a row by 75 basis points in September. In doing so, it stressed that the fight against still too high inflation was top priority and that a possible recession would be accepted. The European Central Bank (ECB) took the same line. It raised the key interest rate by 50 basis points in July and by 75 basis points in September and has already announced further steps. In addition, the previous bond purchase programmes expired at the end of the second quarter.

Against this backdrop, global stock markets recorded a loss of 16.8% on balance over the past twelve months, as measured by the MSCI World Index in local currency. The US stock markets also suffered significant losses, with the market-wide S&P 500 Index falling 16.8% and the Dow Jones Industrial Average dropping 15.1% (in local currency). The EURO STOXX 50 Index declined by 18%, and the market-wide STOXX Europe 600 Index fell by 14.7% in Europe. The Japanese stock markets were also unable to escape the trend. In Tokyo, the Nikkei 225 Index lost 11.9% in local currency. Emerging markets, measured by the MSCI Emerging Markets Index, lost 23.7% in local currency. Sharp price falls were observed in Eastern Europe: The MSCI Emerging Markets Eastern Europe Index fell 81.3% in local currency.

### **Important information:**

Unless otherwise specified, the data source for the financial indices is Refinitiv. All unit performance data on the following pages is taken from Union Investment's own calculations in accordance with the method applied by the German Investment Funds Association (BVI), unless otherwise specified. The ratios illustrate past performance. Future results may be either higher or lower.

Detailed information on the appointed Management Company and the Depositary of the investment fund (the "Fund") can be found on the last pages of this report.

## Investment policy

### Investment objective, investment policy and significant events

The Quoniam Funds Selection SICAV - European Equities sub-fund is an actively managed, European equity fund. In addition to investing predominantly in equities and/or participation certificates or participation rights, the sub-fund may also invest in share certificates, convertible bonds, warrant-linked bonds, total return swaps, which are used to build up both long and short exposure to European equities of different market capitalisations, and in index certificates and warrants, whereby warrants on securities may only be acquired to a limited extent. In addition, the sub-fund's assets are invested in bank balances and/or money-market instruments in worldwide currencies, received in the form of bank deposits from credit institutions with a first-class credit rating or issued by issuers with a first-class credit rating. Derivatives may also be used for investment and hedging purposes. The sub-fund's assets are primarily invested in assets that have been selected from a sustainability point of view. Sustainability is understood to mean environmental (Environment – E) and social (Social – S) criteria as well as good corporate and governmental management (Governance – G). An overall ESG approach will be pursued in which the sustainable focus of the sub-fund is to be ensured by taking into account various sustainability factors. Sustainability factors include environmental, social and employee concerns, respect for human rights and the fight against corruption and bribery. In addition, at least 51% of the sub-fund value shall be invested in equity investments, subject to the defined investment limits. The investment strategy uses a benchmark as a guide, which is to be outperformed. To this end, no attempts are made to replicate the assets included in the benchmark. The fund management may deviate significantly from this benchmark and invest in stocks that are not part of the benchmark. There were two share classes in EUR at the end of the reporting period. Taking into account risk diversification, the objective of the investment policy is to obtain a yield on the invested capital that exceeds the performance of the European equities market.

As a result, sustainability criteria are used as a basis for the sub-fund when investing its assets.

### Portfolio structure and significant changes

In the most recent reporting period, the sub-fund Quoniam Funds Selection SICAV - European Equities invested almost all its assets in equities. Minor exposures in liquidity completed the portfolio. The sub-fund invested in derivatives.

The regional focus of the equity portfolio in the eurozone countries amounted to 52% of equities at close. Major positions were held in the European countries outside of the eurozone, amounting to 48% at the end of the reporting period. Smaller positions in the emerging markets completed the regional structure.

The sector selection was broadly diversified. There was a shift in the focus of the sectoral distribution for equity investments. The investments were mainly shifted from the consumer goods sector (26%) to the healthcare sector (23% at close). Investments in companies with fields of activity in the consumer goods industry with 19% and in the financial sector and in industry, each with 15%, complemented the portfolio at the end of the reporting period. Smaller exposures in a variety of sectors rounded off the sectoral structure.

At the end of the reporting period, the sub-fund held a total of 48% of its assets in foreign currencies. The largest position here was occupied by the Swiss franc with 19% at close. Smaller exposures in various foreign currencies completed the portfolio.

Note: The indicated values may deviate from the statement of assets due to a risk-based approach.

## Investment policy

### Investment objective, investment policy and significant events

The Quoniam Funds Selection SICAV - Emerging Markets Equities MinRisk sub-fund predominantly invests its assets in international equities, share certificates, convertible bonds, option bonds, participation certificates of companies as well as in index certificates and warrants from emerging market and developing countries. Certificates on equities (e.g. American Deposit Receipts or Global Deposit Receipts) of companies may also be acquired. The sub-fund's assets may also be invested in bank deposits and/or money market instruments. In addition, at least 51% of the sub-fund value shall be invested in equity investments, subject to the given investment limits. There were four share classes in different currencies (EUR, USD) at the end of the financial year. Derivatives may be used for investment and hedging purposes. In principle, no provisions are made for currency hedging. The investment strategy uses a benchmark as a guide, which it aims to outperform. To this end, no attempts are made to replicate the assets included in the benchmark. The fund management may deviate significantly from this benchmark and invest in stocks that are not part of the benchmark. The aim of the investment policy of Quoniam Funds Selection SICAV - Emerging Markets Equities MinRisk is to achieve a performance that produces a higher yield than the emerging markets while taking risk diversification into account. Using the MinRisk strategy, the objective for the sub-fund is to achieve a non-benchmarked investment in shares in global emerging markets with the lowest possible risk level (minimum variance principle). The result aims to achieve a defensively oriented equity investment compared with a benchmark-driven approach. As a result, sustainability criteria are used as a basis for the sub-fund when investing its assets. Sustainability is understood to mean environmental (Environment – E) and social (Social – S) criteria as well as good corporate and governmental management (Governance – G). The Company pursues an overall ESG approach in which the sustainable focus of the sub-fund is to be ensured by taking into account various sustainability factors.

Sustainability factors include environmental, social and employee concerns, respect for human rights and the fight against corruption and bribery.

### Portfolio structure and significant changes

In the most recent reporting period, the sub-fund Quoniam Funds Selection SICAV - Emerging Markets Equities MinRisk invested almost all its assets in equities. Minor exposures in liquidity completed the portfolio.

The regional focus of the equity portfolio in the emerging markets amounted to 74% of equities. Of these, Asia/Pacific emerging markets was the largest region among them with 43%, followed by North American emerging markets with 11%, Middle East emerging markets with 11% and smaller exposures in various emerging market countries. Larger positions were held in the Asia-Pacific region with 23% at the end of the reporting period. Smaller exposures in the Middle East, in eurozone countries and in North America rounded off the regional structure.

The selection of sectors was very diverse. The sectoral focus of the equity portfolio was on the financial sector with 26% of equities at close. Investments in companies with fields of activity in the consumer goods sector at 16%, the telecommunications services sector at 14% and the IT and industry sector at 11% completed the portfolio at the end of the reporting period. Smaller exposures in a variety of sectors rounded off the sectoral structure.

At the end of the reporting period, the sub-fund held assets almost solely in foreign currencies. The largest positions here were occupied by the Hong Kong dollar with 22%, the Taiwan dollar with 21% and the renminbi yuan (onshore) with 11%. Smaller exposures in various foreign currencies completed the portfolio.

Note: The indicated values may deviate from the statement of assets due to a risk-based approach.

## Investment policy

### Investment objective, investment policy and significant events

The Quoniam Funds Selection SICAV - Global Equities MinRisk sub-fund's assets will primarily be invested worldwide, including in emerging market countries, in equities, equity certificates, convertible bonds, warrant bonds and, provided they are deemed securities in accordance with Article 41 of the Law of 17 December 2010, in participation certificates of companies as well as in index certificates and warrants. Certificates on equities (e.g. American Deposit Receipts or Global Deposit Receipts) of companies may also be acquired. The sub-fund's assets may also be invested in bank deposits and/or money market instruments. Derivatives may also be used for investment and hedging purposes. In addition, at least 51% of the sub-fund value shall be invested in equity investments, subject to the defined investment limits. Investment decisions for the sub-fund are based on a structured investment process. For individual investment instruments, fundamental information about companies and markets is processed using quantitative methods for yield forecasts. The portfolio is compiled in an optimisation step in which yield forecasts and risk parameters are coordinated with each other. This creates actively managed, risk-controlled portfolios. The investment approach differs from other investment approaches in processing the collected information. The sub-fund's assets are primarily invested in assets that have been selected from a sustainability point of view. Sustainability is understood to mean environmental (Environment – E) and social (Social – S) criteria as well as good corporate and governmental management (Governance – G). An overall ESG approach will be pursued in which the sustainable focus of the sub-fund is to be ensured by taking into account various sustainability factors. Sustainability factors include environmental, social and employee concerns, respect for human rights and the fight against corruption and bribery. There were three share classes in different currencies (EUR, USD) at the end of the financial year. The investment strategy uses a benchmark as a guide, which is to be outperformed. To this end, no attempts are made to replicate the assets included in the benchmark.

The fund management may deviate significantly from this benchmark and invest in stocks that are not part of the benchmark. Taking into account risk diversification, the objective of the investment policy is to obtain a yield on the invested capital that exceeds the performance of global equity markets. Using the MinRisk strategy, the objective for the sub-fund is to achieve a non-benchmarked investment in global equities with the lowest possible level of overall risk (minimum variance principle). To this end, a defensive equity investment compared with a benchmark-driven approach is sought. As a result, sustainability criteria are used as a basis for the sub-fund when investing its assets.

### Portfolio structure and significant changes

In the last reporting period, the Quoniam Funds Selection SICAV - Global Equities MinRisk sub-fund invested its assets predominantly in equities, which accounted for 96% of the sub-fund's assets at close. Smaller exposures in liquidity and equity funds completed the portfolio. The sub-fund invested in derivatives.

The regional focus of the equity portfolio in North America amounted to 68% of equities at close. Larger positions of 12% were held in the Asia-Pacific region and 10% in the European countries outside the eurozone at the end of the reporting period. Smaller exposures in the eurozone countries and the Middle East supplemented the regional structure. The remaining equity assets were invested in shares of equity funds.

The selection of sectors was very diverse. There was a shift in the focus of the sectoral distribution for equity investments. The investments were mainly shifted from the consumer goods sector (24%) to the healthcare sector (24% at close). Investments in companies with fields of activity in the financial sector with 19% and in the IT sector with 17% completed the portfolio at the end of the reporting period. Smaller exposures in equity funds and in a variety of sectors rounded off the sectoral structure.

# Quoniam Funds Selection SICAV - Global Equities MinRisk

At the end of the reporting period, the sub-fund held a total of 89% of its assets in foreign currencies. The US dollar was the largest position here, and it comprised 63% of the holdings at the end of the reporting period. Smaller exposures in various foreign currencies completed the portfolio.

Note: The indicated values may deviate from the statement of assets due to a risk-based approach.

## Investment policy

### Investment objective, investment policy and significant events

The Quoniam Funds Selection SICAV - Global Credit MinRisk sub-fund invests its sub-fund assets in fixed and variable-interest government bonds, bonds from supranational issuers, debenture bonds and corporate bonds from global issuers including issuers from emerging market countries. Notwithstanding the above, up to 100% of the sub-fund's assets may be invested in bank deposits and/or money market instruments. Derivatives may be used for investment and hedging purposes. Investment decisions for the sub-fund are based on a structured investment process. For individual investment instruments, fundamental information about companies and markets is processed using quantitative methods for yield forecasts. The portfolio is compiled in an optimisation step in which yield forecasts and risk parameters are coordinated with each other. This creates actively managed, risk-controlled portfolios. The sub-fund's assets are primarily invested in assets that have been selected from a sustainability point of view. Sustainability is understood to mean environmental (Environment – E) and social (Social – S) criteria as well as good corporate and governmental management (Governance – G). An overall ESG approach will be pursued in which the sustainable focus of the sub-fund is to be ensured by taking into account various sustainability factors. Sustainability factors include environmental, social and employee concerns, respect for human rights and the fight against corruption and bribery. There were six share classes in different currencies (CHF, EUR, USD) at the end of the financial year. The objective of the investment policy is to achieve a reasonable yield on the invested capital. Using the MinRisk strategy, the objective for the sub-fund is to achieve a high absolute performance in a global bond fund while maintaining a low level of depreciation risk. As a result, sustainability criteria are used as a basis for the sub-fund when investing its assets.

### Portfolio structure and significant changes

In the last reporting period, the Quoniam Funds Selection SICAV - Global Credit MinRisk sub-fund invested its assets predominantly in bonds, which accounted for 98% of the sub-fund's assets at close. Minor exposures in liquidity completed the portfolio. The sub-fund invested in derivatives.

From a regional perspective, the focus was on bond assets in North America, which accounted for 52% at close. The share of investments in eurozone countries amounted to 28% and to 11% in the European countries outside the eurozone at the end of the reporting period. Smaller exposures in the Asia-Pacific region and emerging markets completed the regional structure.

The focus for bond classes was almost entirely on corporate bonds (corporates). Industry bonds were the biggest position with 67% at close followed by financial bonds with 19% and supply-sector bonds with 14%.

At the end of the reporting period, the sub-fund held a total of 51% of its assets in foreign currencies. The US dollar was the largest position here, and it comprised 48% of the holdings at the end of the reporting period. Smaller exposures in various foreign currencies completed the portfolio.

The average credit rating of bond investments was BBB+ at the end of the reporting period. The average yield was 3.17% at the end of the reporting period. The average capital tie-up period (duration) at the end of the reporting period was one year and one month.

Note: The indicated values may deviate from the statement of assets due to a risk-based approach.

## Investment policy

### Investment objective, investment policy and significant events

The Quoniam Funds Selection SICAV - Euro Credit sub-fund is an actively managed bond fund that predominantly invests in fixed and variable-rate government bonds, bonds from supranational issuers, debenture bonds and corporate bonds from global issuers including issuers from emerging market countries. Sub-fund assets are also invested in bank deposits and/or money market instruments. Derivatives may also be used for investment and hedging purposes. The sub-fund's assets are primarily invested in assets that have been selected from a sustainability point of view. Sustainability is understood to mean environmental (Environment – E) and social (Social – S) criteria as well as good corporate and governmental management (Governance – G). The Company pursues an overall ESG approach in which the sustainable focus of the sub-fund is to be ensured by taking into account various sustainability factors. Sustainability factors include environmental, social and employee concerns, respect for human rights and the fight against corruption and bribery. The assets acquired for the sub-fund shall largely be denominated in euro. Other currencies are only acquired to a limited extent. The currency risks resulting from the foreign currency positions are largely currency-hedged. The investment strategy uses a benchmark as a guide, which it aims to outperform. To this end, no attempts are made to replicate the assets included in the benchmark. The fund management may deviate significantly from this benchmark and invest in stocks that are not part of the benchmark. There were three share classes in EUR at the end of the financial year. Taking into account risk diversification, the aim of the investment policy is to obtain a yield on the invested capital that exceeds the performance of the European corporate bond market. As a result, sustainability criteria are used as a basis for the sub-fund when investing its assets.

### Portfolio structure and significant changes

In the most recent reporting period, the sub-fund Quoniam Funds Selection SICAV - Euro Credit invested almost all of its sub-fund assets in bonds. Minor exposures in liquidity completed the portfolio. The sub-fund invested in derivatives.

From a regional perspective, the bond assets were mainly invested in the eurozone countries with a share of 48% at close. The share of investments in North America amounted to 25% at the end of the reporting period and 18% in the European countries outside the eurozone. Smaller exposures in the Asia-Pacific region and emerging markets completed the regional structure.

The focus for bond classes was completely on corporate bonds (corporates). The value remained almost constant during the reporting period. Industry bonds were the biggest position with 52% at close followed by financial bonds with 37% and utility bonds with 11%.

The average credit rating of bond investments was BBB+ at the end of the reporting period. The average yield was 4.69% at the end of the reporting period. The average duration at close was four years and seven months.

Note: The indicated values may deviate from the statement of assets due to a risk-based approach.

Liquidation report  
01.10.2021 - 30.09.2022

The Board of Directors of Quoniam Funds Selection SICAV (the "SICAV"), an investment company incorporated under Part I of the Luxembourg Law of 17 December 2010, decided on 23 August 2022 to liquidate the sub-fund Quoniam Funds Selection SICAV - Global Risk Premia (the "sub-fund") in accordance with the provisions of Article 24 of the Articles of Association of the Company on 30 September 2022.

The reason for the liquidation is that the sub-fund has experienced increased cash outflows due to the difficult market environment and is therefore unprofitable and without growth opportunities.

The decision to stop issuing sub-fund shares of the share classes EUR A dis (WKN A12C7K / ISIN LU1120175267), EUR I dis (WKN A12C7L / ISIN LU1120175184) and EUR I acc (WKN A2AN18 / ISIN LU1525535792) was also taken on 23 August 2022 with immediate effect.

The share value as of the liquidation date for the EUR A dis class was EUR 80.36.

The share value as of the liquidation date for the EUR I dis class was EUR 809.01.

The share value as of the liquidation date for the EUR I acc class was EUR 870.40.

The payment to shareholders was made with effect from 6 October 2022.

Liquidation report  
01.10.2021 - 30.09.2022

The Board of Directors of Quoniam Funds Selection SICAV (the "SICAV"), an investment company incorporated under Part I of the Luxembourg Law of 17 December 2010, decided on 23 August 2022 to liquidate the sub-fund Quoniam Funds Selection SICAV - European Equities MinRisk (the "sub-fund") as of 30 September 2022, in accordance with the provisions of Article 24 of the Company's Articles of Association.

The reason for the liquidation is that the sub-fund has experienced increased cash outflows due to the difficult market environment and is therefore unprofitable and without growth opportunities.

The decision to stop issuing sub-fund shares of the share classes EUR A dis (WKN A12C7M / ISIN LU1120175341), EUR A dis RF (WKN A2N9DC / ISIN LU1910824512), EUR I acc (WKN A12C7N / ISIN LU1120175424) and EUR I dis (WKN A2QGNY / ISIN LU2250014136) was also taken on 23 August 2022 with immediate effect.

The share value as of the liquidation date for the EUR A dis class was EUR 98.13.

The share value as of the liquidation date for the EUR A dis RF class was EUR 107.05.

The share value as of the liquidation date for the EUR I acc class was EUR 1,143.74.

The share value as of the liquidation date for the EUR I dis class was EUR 1,050.82.

The payment to shareholders was made with effect from 6 October 2022.

## Investment policy

### Investment objective, investment policy and significant events

The Quoniam Funds Selection SICAV - Global High Yield MinRisk sub-fund may invest its sub-fund assets in fixed and variable-interest government bonds, bonds from supranational issuers, debenture bonds and corporate bonds from global issuers including issuers from emerging market countries. Investments are primarily in bonds rated between BB+ and B-.

Notwithstanding the above, up to 100% of the sub-fund's assets may be invested in bank deposits and/or money market instruments. Derivatives may also be used for investment and hedging purposes. Investment decisions for the sub-fund are based on a structured investment process. For individual investment instruments, fundamental information about companies and markets is processed using quantitative methods for yield forecasts. The portfolio is compiled in an optimisation step in which yield forecasts and risk parameters are coordinated with each other. This creates actively managed, risk-controlled portfolios. The investment approach differs from other investment approaches in processing the collected information. The investment strategy uses a benchmark as a guide, which is to be outperformed. To this end, no attempts are made to replicate the assets included in the benchmark. The fund management may deviate significantly from this benchmark and invest in stocks that are not part of the benchmark. The sub-fund's assets are primarily invested in assets that have been selected from a sustainability point of view. Sustainability is understood to mean environmental (Environment – E) and social (Social – S) criteria as well as good corporate and governmental management (Governance – G). An overall ESG approach will be pursued in which the sustainable focus of the sub-fund is to be ensured by taking into account various sustainability factors.

Sustainability factors include environmental, social and employee concerns, respect for human rights and the fight against corruption and bribery. The objective of the investment policy is to achieve a reasonable yield on the invested capital. Using the MinRisk strategy, the objective of the sub-fund is to achieve a high absolute performance in a global bond fund while maintaining the lowest possible level of depreciation risk. As a result, sustainability criteria are used as a basis for the sub-fund when investing its assets.

### Portfolio structure and significant changes

In the last reporting period, the Quoniam Funds Selection SICAV - Global High Yield MinRisk sub-fund invested its assets predominantly in bonds, which accounted for 96% of the sub-fund's assets at close. Minor exposures in liquidity completed the portfolio. The sub-fund invested in derivatives.

From a regional perspective, the focus was on bond assets in North America, which accounted for 58% at close. The share of investments in eurozone countries amounted to 20% at the end of the reporting period. Smaller exposures in emerging markets, in European countries outside the eurozone, in the Middle East, in the Asia-Pacific region and others supplemented the regional structure.

The focus for bond classes was completely on corporate bonds (corporates). Industry bonds were the biggest position with 68% at close followed by utility bonds with 22% and financial bonds with 10%.

At the end of the reporting period, the sub-fund held a total of 26% of its assets in euro.

# Quoniam Funds Selection SICAV - Global High Yield MinRisk

The average credit rating of bond investments was BB at the end of the reporting period. The average yield was 5.93% at the end of the reporting period. The average duration at close was two years and eight months.

Note: The indicated values may deviate from the statement of assets due to a risk-based approach.

# Quoniam Funds Selection SICAV - Global Equities MinRisk All Countries (liquidated)

Security Ident. No. A14RYJ  
ISIN-Code LU1221083840

Liquidation report  
01.10.2021 - 30.09.2022

The Board of Directors of Quoniam Funds Selection SICAV (the "SICAV"), an investment company incorporated under Part I of the Luxembourg Law of 17 December 2010, decided on 23 August 2022 to liquidate the sub-fund Quoniam Funds Selection SICAV - Global Equities MinRisk All Countries (the "sub-fund") as of 30 September 2022, in accordance with the provisions of Article 24 of the Company's Articles of Association.

The reason for the liquidation is that the sub-fund has experienced increased cash outflows due to the difficult market environment and is therefore unprofitable and without growth opportunities.

The decision to stop issuing sub-fund shares of the share class NOK hedged I acc share class sub-fund (WKN A14RYJ / ISIN LU1221083840) was also taken on 23 August 2022 with immediate effect.

The share value at the liquidation date for the NOK hedged I acc class was NOK 1,302.20.

The payment to shareholders was made with effect from 6 October 2022.

## Performance in percent <sup>1)</sup>

6 months	1 year	3 years	10 years
-11.46	-7.85	4.82	-

1) Based on published share values (BVI method). The information and figures contained in this report are based on the past and do not provide any indication of future developments.

# Quoniam Funds Selection SICAV - Global Equities MinRisk All Countries (liquidated)

## Investment policy

### Investment objective, investment policy and significant events

The sub-fund Quoniam Funds Selection SICAV - Global Credit MinRisk Defensive is a bond fund with an international focus. The sub-fund's assets are primarily invested, for hedging purposes, in fixed-income and floating-rate corporate bonds (including those from issuers in the finance industry), other interest-bearing transferable securities (excluding asset-backed securities, such as collateralised debt obligations, collateralised bond obligations, collateralised swap obligations and similar securities), as well as zero bonds, government bonds and credit default swaps (CDS on individual stocks and index CDS). The aforementioned assets are issued by international issuers (including those from emerging markets). There were two share classes in EUR at the end of the reporting period. The objective of the investment policy is to achieve a reasonable yield on the invested capital. By simultaneously investing in global corporate bonds and managing interest rate change risks, the sub-fund offers higher yield potential compared to short-term global bonds denominated in EUR. Using the defensive MinRisk strategy, the objective for the sub-fund is to achieve additional returns in a global bond fund, while maintaining a low level of depreciation risk. As a result, sustainability criteria are used as a basis for the sub-fund when investing its assets. Sustainability is understood to mean environmental (Environment – E) and social (Social – S) criteria as well as good corporate and governmental management (Governance – G). The Company pursues an overall ESG approach in which the sustainable focus of the sub-fund is to be ensured by taking into account various sustainability factors. Sustainability factors include environmental, social and employee concerns, respect for human rights and the fight against corruption and bribery.

### Portfolio structure and significant changes

In the last reporting period, the Quoniam Funds Selection SICAV - Global Credit MinRisk Defensive sub-fund invested its assets predominantly in bonds, which accounted for 98% of the sub-fund's assets at close. Minor exposures in liquidity completed the portfolio. The sub-fund invested in derivatives.

From a regional perspective, the focus was on bond assets in North America, which accounted for 39% at close. At the end of the reporting period, the share of investments in eurozone countries amounted to 27%, in European countries outside the eurozone to 17% and in the emerging markets to 11%. Of these, smaller exposures to various emerging market countries were held in the Fund. Smaller exposures in the Asia-Pacific region completed the regional allocation.

The focus for bond classes was completely on corporate bonds (corporates). The value remained almost constant during the reporting period. Industry bonds were the biggest position with 61% at close followed by financial bonds with 22% and utility bonds with 17%.

At the end of the reporting period, the sub-fund held a total of 52% of its assets in foreign currencies. The largest position here was occupied by the US dollar with 48% at close. Smaller exposures in the British pound completed the portfolio.

The average credit rating of bond investments was BBB+ at the end of the reporting period. The average yield was 3.15% at the end of the reporting period. The average duration was eleven months at close.

Note: The indicated values may deviate from the statement of assets due to a risk-based approach.

## Investment policy

### Investment objective, investment policy and significant events

The Quoniam Funds Selection SICAV - Global Equities sub-fund predominantly invests its assets internationally, including in emerging market countries (incl. China), in equities, share certificates, convertible bonds, option bonds and in participation certificates of companies as well as in index certificates, exchange-traded index funds (incl. closed-end REITS) and warrants. Certificates on equities (e.g. American Deposit Receipts or Global Deposit Receipts) of companies may also be acquired. The sub-fund's assets may also be invested in bank deposits and/or money market instruments. In addition, at least 51% of the sub-fund value shall be invested in equity investments, subject to the given investment limits. There were two share classes in different currencies (USD, EUR) at the end of the financial year. The investment strategy uses a benchmark as a guide, which it aims to outperform. To this end, no attempts are made to replicate the assets included in the benchmark. The fund management may deviate significantly from this benchmark and invest in stocks that are not part of the benchmark. Taking into account risk diversification, the objective of the investment policy is to obtain a yield on the invested capital that exceeds the performance of global equity markets. As a result, sustainability criteria are used as a basis for the sub-fund when investing its assets. Sustainability is understood to mean environmental (Environment – E) and social (Social – S) criteria as well as good corporate and governmental management (Governance – G). The Company pursues an overall ESG approach in which the sustainable focus of the sub-fund is to be ensured by taking into account various sustainability factors. Sustainability factors include environmental, social and employee concerns, respect for human rights and the fight against corruption and bribery.

### Portfolio structure and significant changes

In the last reporting period, the Quoniam Funds Selection SICAV - Global Equities sub-fund invested its assets predominantly in equities, which accounted for 98% of the sub-fund's assets at close. Minor exposures in liquidity completed the portfolio.

The regional focus of the equity portfolio in North America most recently amounted to 67% of equities. Major positions were held in the Asia-Pacific region and the eurozone countries, amounting to 11% each at the end of the reporting period. Smaller exposures in European countries outside the eurozone, the Middle East and emerging markets supplemented the regional structure.

The selection of sectors was very diverse. The sectoral focus was on the equity portfolio in the IT industry, which most recently comprised 28% of the equities. Investments in companies with fields of activity in the health sector with 20%, in the consumer goods industry with 12% and in the industry sector with 11% completed the portfolio at the end of the reporting period. Smaller exposures in a variety of sectors rounded off the sectoral structure.

At the end of the reporting period, the sub-fund held a total of 93% of its assets in foreign currencies. The largest position here was occupied by the US dollar with 68% at close. Smaller exposures in various foreign currencies completed the portfolio.

Note: The indicated values may deviate from the statement of assets due to a risk-based approach.

# Notes on the report as at the 30 September 2022 (appendix)

## Significant accounting and valuation principles

The SICAV's accounts are kept in Euro. Exceptions are provided by the Quoniam Funds Selection SICAV - Global High Yield MinRisk, the Quoniam Funds Selection SICAV - Global Equities MinRisk All Countries (liquidated) as well as the Quoniam Funds Selection SICAV - Global Equities. The sub-fund currency for the sub-funds Quoniam Funds Selection SICAV - Global High Yield MinRisk as well as Quoniam Funds Selection SICAV - Global Equities is US dollar and the sub-fund currency for the sub-fund Quoniam Funds Selection SICAV - Global Equities MinRisk All Countries (liquidated) is Norwegian krone.

The consolidated composition of the fund's assets, the consolidated income statement and the consolidated changes in the fund's assets correspond to the sum of the presentations for the individual sub-funds, converted at year-end rates. Investments between sub-funds (where one sub-fund invests into another sub-fund of the Quoniam Funds Selection SICAV) are not object of an elimination for the purposes of consolidated presentation of results. The effects of exchange rate differences in the conversion of the composition of the fund's assets in foreign currency are included in the item "Currency translation difference from consolidation" in the consolidated changes in the fund's assets expelled.

The annual accounts of the SICAV were prepared in accordance with the classification and valuation principles as applicable in the country of domicile.

The price of securities and other exchange-listed derivatives reflects the relevant stock exchange or market value at the end of the financial year. Securities traded on a regulated market are valued at the market prices published for the relevant market. Investment fund units in target funds are valued at their most recently published prices.

If the sub-funds hold OTC derivatives on the closing date, these are valued daily on the basis of indicative quotes from brokers or mathematical valuation models.

If the sub-funds have pending forward exchange transactions, these are valued based on the forward rates applicable to the residual maturity.

Securities whose prices are not in line with market conditions and all assets for which no representative market value can be obtained are valued at a price established by the appointed Management Company in good faith using recognised valuation rules.

Bank deposits were estimated at par value.

Assets and liabilities denominated in currencies other than that of the sub-fund were converted into the respective sub-fund currency at the last available mean rate of exchange. All transactions in foreign currencies were converted to the sub-fund currency at the applicable exchange rate on the respective booking date. Realised and unrealised currency gains and losses are included as income or expenses.

The deferred interest includes accrued interest as at the end of the financial year.

Dividends are posted as receivables on the date on which the respective securities are first quoted as "ex-dividend".

Several sub-funds have a number of different share classes that contribute to the development of the sub-fund in proportion to their net asset value and after deducting the respective proportion of the costs.

The issue or redemption price of the sub-fund shares is calculated as the net asset value per share on the respective trading day plus an initial sales charge and/or redemption fee as defined in the prospectus where applicable. The initial sales charge shall be levied in favour of the appointed management company and the distributor and can be scaled according to the size of the order. The redemption fee is credited to the sub-fund.

Share purchases and redemptions of the sub-fund are subject to the swing pricing procedure. The procedure is intended to protect shareholders of the sub-fund from the net capital flows which occur as a result of purchases and redemptions and the associated costs of the investment or disinvestment. The swing pricing committee stipulates a threshold value for the amendment of the net asset value per share in the event of a particular net capital flow being exceeded. The swing pricing committee also stipulates the percentage ("swing factor") by which the net asset value will be increased or reduced. This value is based on the anticipated transaction costs, tax burdens and/or bid/offer spreads ("spreads"). The fundamental procedure ("single swing pricing") stipulates that the increased or reduced net asset value per share be established for all expenses, redemptions or exchanges on a trading day. The maximum swing factor for the Fund is 2%.

### Taxation of the Fund

The net assets of the following share classes are currently subject to a "taxe d'abonnement" of 0.05% p.a. in Luxembourg, payable quarterly and based on the respective reported net fund assets at the end of the quarter:

Quoniam Funds Selection SICAV - European Equities - EUR A dis,  
Quoniam Funds Selection SICAV - Emerging Markets Equities MinRisk - EUR A dis,  
Quoniam Funds Selection SICAV - Global Equities MinRisk - EUR hedged A dis,

Quoniam Funds Selection SICAV - Global Equities - EUR I dis and  
Quoniam Funds Selection SICAV - Global Equities - USD I acc

Insofar as sub-fund assets are invested in other Luxembourg investment funds that are already subject to the taxe d'abonnement, the portion of sub-fund assets invested in such Luxembourg investment funds is exempt from the tax.

Income from the investment of the net assets will not be taxed in Luxembourg. However, it may be subject to withholding or other tax in the countries in which the net assets are invested. Neither the appointed Management Company nor the Depositary will obtain individual or collective receipts for such taxes.

Please refer to the Sales Prospectus for further information regarding use of income.

## **Information on fees and expenses**

The fees of the appointed Management Company of the SICAV and the all-in fee are calculated based on the net fund assets per calendar day and paid out on a monthly basis. The all-in fee covers the depositary fee, general custody and bearing fees for holding assets in custody, auditors' fees, costs of appointing proxies and costs of principal management activities, such as fund accounting reporting, and taxe d'abonnement. The calculation is based on a contractual agreement.

If profit and loss includes other expenses, these expenses consist of the costs referred to in the prospectus, such as government fees, collateral management fees, or cost of changes to the prospectus.

## **Ongoing charges**

The calculation method used to calculate the "ongoing charges" indicator, is that outlined by the Committee of European Securities Regulators (Circular CESR/10-674 of 1 July 2010).

The "ongoing charges" indicate the costs charged to the sub-fund and may fluctuate from year to year. They take into account the management charges, custodian fees, taxe d'abonnement and all other costs charged to the sub-fund. For sub-funds with a significant share in other funds, the costs of these other funds are also taken into account. This figure shows the total costs as a percentage of the average sub-fund volume over one financial year. Performance-related fees and transaction costs incurred – with the exception of Custodian bank transaction costs – are not included in the "ongoing charges".

## **Transaction cost**

The transaction costs refer to all costs that were listed or invoiced separately in the financial year in the name of the sub-fund and are directly related to the purchase or sale of assets.

The appointed Management Company, in its function as the appointed Management Company of the SICAV, may benefit from "soft commissions" (e.g. broker research, financial analyses, market and price information systems) in connection with trade transactions. Said commissions are used in the interests of shareholders when making investment decisions. Transactions of this type cannot be conducted with natural persons; the service providers concerned may trade only in the interests of the SICAV and the services provided must be directly associated with the activities of the SICAV.

## **Income and expenditure adjustment**

Income and expenditure adjustments have been charged to the ordinary net income. These include net income generated during the reporting period, which purchasers of shares pay as part of the issue price, and sellers of shares receive in the redemption price.

## **Collateral**

In conjunction with transactions in listed and/or OTC derivatives, the SICAV is required to deliver or hold collateral in the form of bank deposits or securities.

The positions "Other bank deposits/bank liabilities" include collateral provided/received by the sub-funds in the form of bank deposits for listed and/or collateral provided for OTC derivatives. Collateral provided in the form of securities is recorded in the schedule of assets. Collateral received in the form of securities and collateral for OTC derivatives in the form of bank deposits are not listed in the composition of the fund's assets or the schedule of assets. Collateral provided in the form of securities is recorded in the statement of assets. Collateral received in the form of securities as well as collateral for OTC derivatives in the form of bank deposits are not recorded in the statement of assets and in the statement of assets.

## **Significant events during the reporting period**

In the concluded reporting period, the subfunds made the following distribution:

On August 23, 2022, the Board of Directors of Quoniam Funds Selection SICAV decided to liquidate the following sub-funds as of 30. September 2022:

- Quoniam Funds Selection SICAV - Global Risk Premia
- Quoniam Funds Selection SICAV - Global Equities MinRisk All Countries
- Quoniam Funds Selection SICAV - European Equities MinRisk

#### **Significant events after the reporting period**

The Board of Directors of the SICAV has decided, subject to the approval of the CSSF, has decided to convert the already existing but unused fund envelope of the sub-fund Quoniam Funds Selection SICAV - Emerging Markets Equities Dynamic as of 1. January 2023 and to activate it at the same time. As part of the restructuring, the sub-fund will be renamed Quoniam Funds Selection SICAV - Global Equities Climate.

#### **General explanations in the context of the COVID-19 pandemic**

Thanks to the development of effective vaccines and the spread of less dangerous virus variants, many countries have significantly scaled back or abolished containment measures. China, however, is maintaining its zero-covid policy and has reacted to the spread of the Omikron variant with renewed complete lockdowns of cities with millions of inhabitants. This may continue to affect global supply chains, which could exacerbate the current global economic downturn. The Management Board of the Management Company continues to monitor the development of the capital markets in order to limit any economic impact on the assets.

#### **Explanation in the context of the Russia-Ukraine conflict**

The invasion of Ukraine by Russian forces has significantly aggravated the geopolitical situation and led to Western sanctions against Russia. Russia has subsequently imposed counter-sanctions and sharply reduced the export of energy raw materials to Europe or even stopped them completely. In Europe, this has led to a sharp rise in inflation and a slump in economic activity. The Management Board of the management company monitors the development very closely. The assets have very little financial exposure to Russia and Ukraine as of the reporting date (Sub-fund Quoniam Funds Selection SICAV - Emerging Markets Equities MinRisk). Appropriate management mitigates the economic risks to capital assets.

#### **Note on the Law of 17 December 2010**

The SICAV was set up in accordance with Part I of the Luxembourg Law of 17 December 2010 relating to undertakings for collective investment ("Law of 17 December 2010") and fulfills the conditions laid down by Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 on the coordination of legal and administrative provisions relating to undertakings for collective investment in transferable securities ("Directive 2009/65/EC").

## Audit report

To the Shareholders of  
**Quoniam Funds Selection SICAV**

---

### Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Quoniam Funds Selection SICAV (the "Fund") and of each of its sub-funds as at 30 September 2022, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

#### *What we have audited*

The Fund's financial statements comprise:

- the composition of the fund's assets for the Fund and the composition of the sub-fund's assets for each of the sub-funds as at 30 September 2022;
- the changes in the fund's assets for the Fund and the changes in the sub-fund's assets for each of the sub-funds for the year then ended;
- the income statement for the Fund and the income statement for each of the sub-funds for the year then ended;
- the schedule of assets for each of the sub-funds as at 30 September 2022; and
- the notes to the financial statements, which include a summary of significant accounting policies.

---

### Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements" section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

---

### Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

---

#### **Responsibilities of the Board of Directors of the Fund for the financial statements**

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

---

#### **Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements**

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;

- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;
- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

PricewaterhouseCoopers, Société coopérative  
Represented by

Luxembourg, 4 November 2022

Andreas Drossel

Only the German version of the present financial statements has been reviewed by the Auditor. Consequently, the audit report refers to the German version, other versions result from a conscientious translation made under the responsibility of the Board of Directors. In case of differences between the German version and the translation, the German version shall prevail.

# Other information of the appointed Management Company (unaudited)

To what extent were the environmental and social characteristics pursuant to Art. 11 1a) of the Disclosure Regulation fulfilled?

## Quoniam Funds Selection SICAV - European Equities

The Fund invested primarily in assets that have been selected from a sustainability point of view. Sustainability is understood to mean environmental (Environment - E) and social (Social - S) criteria as well as good corporate and governmental management (Governance - G). The sustainable focus of the Fund was achieved in particular by taking into account various sustainability factors. Sustainability factors include environmental, social and employee concerns, respect for human rights and the fight against corruption and bribery. In order to fulfil the environmental and social characteristics, sustainability factors and a sustainability indicator were assigned to the assets of the Fund. The relevant issuers whose assets were fundamentally investable for the Fund were evaluated on the basis of the sustainability indicator. Depending on the type of issuer, this sustainability indicator included the dimensions of environment, social, governance, sustainable business and controversies and assessed the current level of sustainability. In addition, exclusion criteria were set for the acquisition of certain assets. For example, securities of companies that generated more than five percent of their turnover through the production of armaments or tobacco were excluded. For the Fund, priority is given to European equities that are classified as sustainable on the basis of the exclusion criteria. The Fund is invested flexibly depending on the market situation, which can lead to a change of investment focus at any time. When deciding on the acquisition of assets, economic and sustainable aspects are weighted equally. The sustainability indicator and the exclusion criteria were processed in a software application for sustainable portfolio management. Based on this software, the portfolio management was able to review various sustainable strategies and adjust them if necessary. In addition, the compliance of issuers with good corporate governance standards was analysed on the basis of data from various providers and research from proxy advisors and included in the investment decisions.

## Quoniam Funds Selection SICAV - Emerging Markets Equities MinRisk

The Fund invested primarily in assets selected from a sustainability point of view. Sustainability is understood to mean environmental (Environment - E) and social (Social - S) criteria as well as good corporate and governmental management (Governance - G). The sustainable focus of the Fund was achieved in particular by taking into account various sustainability factors. Sustainability factors include environmental, social and employee concerns, respect for human rights and the fight against corruption and bribery. In order to fulfil the environmental and social characteristics, sustainability factors and a sustainability indicator were assigned to the assets of the Fund. The relevant issuers whose assets were fundamentally investable for the Fund were evaluated on the basis of the sustainability indicator. Depending on the type of issuer, this sustainability indicator included the dimensions of environment, social, governance, sustainable business and controversies and assessed the current level of sustainability. In addition, exclusion criteria were set for the acquisition of certain assets. For example, securities of companies that generated more than five percent of their turnover through the production of armaments or tobacco were excluded.

For the Fund, priority is given to European corporate bonds that are classified as sustainable on the basis of the exclusion criteria. The Fund is invested flexibly depending on the market situation, which can lead to a change of investment focus at any time.

When deciding on the acquisition of assets, economic and sustainable aspects are weighted equally.

The sustainability indicator and the exclusion criteria were processed in a software application for sustainable portfolio management. Based on this software, the portfolio management was able to review various sustainable strategies and adjust them if necessary.

In addition, the compliance of issuers with good corporate governance standards was analysed on the basis of data from various providers and research from proxy advisors and included in the investment decisions.

## **Disclosure according to Regulation (EU) 2020/852 on the establishment of a framework to facilitate sustainable investment**

The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

## **Disclosures in accordance with Regulation (EU) 2015/2365**

During the period under review, no transactions were entered for the following sub-funds in accordance to Regulation (EU) 2015/2365 on securities financing transactions and overall yield swaps:

Quoniam Funds Selection SICAV - Emerging Markets Equities MinRisk,

Quoniam Funds Selection SICAV - Global Equities MinRisk,

Quoniam Funds Selection SICAV - Global Credit MinRisk,

Quoniam Funds Selection SICAV - Euro Credit,

Quoniam Funds Selection SICAV - Global Risk Premia (liquidated),

Quoniam Funds Selection SICAV - European Equities MinRisk (liquidated),

Quoniam Funds Selection SICAV - Global High Yield MinRisk,

Quoniam Funds Selection SICAV - Global Equities MinRisk All Countries (liquidated),

Quoniam Funds Selection SICAV - Global Credit MinRisk Defensive

and

Quoniam Funds Selection SICAV - Global Equities.

For the sub-fund Quoniam Funds Selection SICAV - European Equities the information are shown on pages 163-164.

## **CO<sup>2</sup> footprint**

The sub-fund Quoniam Funds Selection SICAV - European Equities exhibited a CO<sup>2</sup> intensity of 137.29 tons per million USD of revenue at the end of the financial year. The sub-fund Quoniam Funds Selection SICAV - Global Equities MinRisk exhibited a CO<sup>2</sup> intensity of 125.37 tons per million USD of revenue at the end of the financial year. The sub-fund Quoniam Funds Selection SICAV - Emerging Markets Equities MinRisk exhibited a CO<sup>2</sup> intensity of 211.65 tons per million USD of revenue at the end of the financial year. The sub-fund Quoniam Funds Selection SICAV - European Equities MinRisk (liquidated) exhibited a CO<sup>2</sup> intensity of 127.03 tons per million USD of revenue at the end of the financial year. The CO<sup>2</sup> intensity is calculated on a booking-day basis and may therefore vary. This affects both the amount of the CO<sup>2</sup> intensity, as well as the degree of coverage of the data. The degree of coverage may therefore be requested from the management company.

## **Other information**

Securities transactions are only ever carried out with counterparties included in a list of approved parties by the fund management. The list is reviewed on an ongoing basis. Criteria such as quality of execution, level of transaction costs, quality of research and reliability in the settlement of securities transactions are given precedence. Furthermore, the annual reports of the counterparties are examined.

The proportion of securities transactions conducted during the period under review (October 1st, 2021 to September 30th, 2022) on account of the retail funds managed by Union Investment Luxembourg S.A. with companies within the Group or associated with it through significant holdings amounted to 7.17 per cent. The total transactions volume amounted to EUR 5,374,903,041.42.

## **Information on risk management processes**

### **The method used to monitor the overall risk associated with derivatives for the subfunds**

**Quoniam Funds Selection SICAV - European Equities,  
Quoniam Funds Selection SICAV - Emerging Markets Equities  
MinRisk,  
Quoniam Funds Selection SICAV - Global Equities  
Quoniam Funds Selection SICAV - Global Equities MinRisk and  
Quoniam Funds Selection SICAV - Global Equities MinRisk All  
Countries (liquidated)**  
is the commitment approach.

### **The method used to monitor the overall risk associated with derivatives for the subfunds**

**Quoniam Funds Selection SICAV - Global Risk Premia (liquidated),  
and  
Quoniam Funds Selection SICAV - Global Credit  
MinRisk Defensive  
is the absolute VaR approach.**

The VaR (value-at-risk) model is used to ascertain the absolute VaR approach. The Value-at-Risk (VaR) indicator is a mathematical-statistical concept and indicates the possible losses of a portfolio over a specific period that is unlikely to be exceeded.

A Monte Carlo simulation is used in order to ascertain the VaR indicator. The parameters used for this are:

- Holding period: 20 days
- Confidence level: 99%
- Historical monitoring period: 1 year (balanced)

The utilisation of the total risk associated with derivatives determined via the above model and the corresponding limit utilisation at a regulatory limit of 20 % amounted for the minimal, maximal and average VaR value to:

### **For the subfund Quoniam Funds Selection SICAV - Global Risk Premia (liquidated):**

Minimum VaR 0.00%; Limit utilisation 0%,  
Maximum VaR 4.92%; Limit utilisation 25%,  
Average VaR 3.12%; Limit utilisation 16%.

### **Leverage effect**

The determined average leverage effect using the gross method amounted to 629%.

### **For the subfund Quoniam Funds Selection SICAV - Global Credit MinRisk Defensive:**

Minimum VaR 0.16%; Limit utilisation 1%,  
Maximum VaR 2.79%; Limit utilisation 14%,  
Average VaR 0.42%; Limit utilisation 2%.

### **Leverage effect**

The determined average leverage effect using the gross method amounted to 182%.

**The method used to monitor the overall risk associated with derivatives for the subfunds**  
**Quoniam Funds Selection SICAV - Global Credit MinRisk,**  
**Quoniam Funds Selection SICAV - Euro Credit,**  
**Quoniam Funds Selection SICAV - European Equities MinRisk (liquidated) and**  
**Quoniam Funds Selection SICAV - Global High Yield MinRisk is the relative VaR approach.**

In this case, the VaR of the Fund is set in comparison with the VaR of a reference portfolio. The utilisation of this ratio may not exceed the maximum value of 200 %. The reference portfolio is therefore essentially an accurate snapshot of the investment policy of the fund. The reference portfolio is made up as follows:

**Quoniam Funds Selection SICAV - Global Credit MinRisk**

100% ICE BofA 1-5 Year Global Corporate Index

**Quoniam Funds Selection SICAV - Euro Credit**

100% Markit iBoxx EUR Corporates Index

**Quoniam Funds Selection SICAV - European Equities MinRisk (liquidated)**

100% MSCI Europe

**Quoniam Funds Selection SICAV - Global High Yield MinRisk**

100% ICE BofA Global High Yield BB-B

The VaR (value-at-risk) model is used to ascertain the relative VaR approach. The Value-at-Risk (VaR) indicator is a mathematical-statistical concept and indicates the possible losses of a portfolio over a specific period that is unlikely to be exceeded.

A Monte Carlo simulation is used in order to ascertain the VaR indicator. The parameters used for this are:

- Holding period: 20 days
- Confidence level: 99%
- Historical monitoring period: 1 year (balanced)

The utilisation of the total risk associated with derivatives determined via the above model and the corresponding limit utilisation at a regulatory limit of 200 % amounted to (for the minimal, maximal and average utilisation):

**For the subfund Quoniam Funds Selection SICAV - Global Credit MinRisk:**

Minimum VaR fund / VaR reference portfolio 0.49%;  
Limit utilisation 61%

Maximum VaR fund / VaR reference portfolio 1.21%;  
Limit utilisation 131%

Average VaR fund / VaR reference portfolio 0.82%;  
Limit utilisation 88%

**Leverage effect**

The determined average leverage effect using the gross method amounted to 199%.

**For the subfund Quoniam Funds Selection SICAV - Euro Credit:**

Minimum VaR fund / VaR reference portfolio 0.90%;  
Limit utilisation 95%

Maximum VaR fund / VaR reference portfolio 3.49%;  
Limit utilisation 105%

Average VaR fund / VaR reference portfolio 1.98%;  
Limit utilisation 101%

**Leverage effect**

The determined average leverage effect using the gross method amounted to 109%.

**For the subfund Quoniam Funds Selection SICAV -  
European Equities MinRisk (liquidated):**

Minimum VaR fund / VaR reference portfolio 0.03%;  
Limit utilisation 0%

Maximum VaR fund / VaR reference portfolio 14,88%;  
Limit utilisation 121%

Average VaR fund / VaR reference portfolio 7.99%;  
Limit utilisation 82%

**Leverage effect**

The determined average leverage effect using the gross method  
amounted to 96%.

**For the subfund Quoniam Funds Selection SICAV -  
Global High Yield MinRisk:**

Minimum VaR fund / VaR reference portfolio 0.34%;  
Limit utilisation 9%

Maximum VaR fund / VaR reference portfolio 2.23%;  
Limit utilisation 31%

Average VaR fund / VaR reference portfolio 1.14%;  
Limit utilisation 20%

**Leverage effect**

The determined average leverage effect using the gross method  
amounted to 308%.

## Information on the remuneration policy of Union Investment Luxembourg S.A.

### Scope of the remuneration policy

Remuneration policy and practice includes fixed and variable components of salaries and voluntary retirement benefits. The calculation methodology is defined in the remuneration policy and in the discretionary and internal guidelines of the Company. The above remuneration refers to all UCITS and alternative investment funds managed by Union Investment Luxembourg S.A. All employees are holistically concerned with the administration, so a division per fund is not possible. When calculating the compensation for the 2021 financial year, there was no deviation from the defined methodology in accordance with the remuneration policy as well as the discretionary guidelines and internal guidelines.

### Description of the calculation of the remuneration elements

The remuneration consists of the following components:

- 1) Fixed compensation: total of the monthly basic salaries paid in the past financial year and the 13th salary.
- 2) Variable compensation: total of the variable remuneration components paid in the past financial year. These include variable compensation and special payments based on the business result.

### Total amount of compensation paid by the Management Company in the past financial year (as at: 31 December 2021)

Number of staff		75
Fixed remuneration	EUR	5,400,000.00
Variable remuneration	EUR	1,300,000.00
Total compensation	EUR	6,700,000.00
Number of employees with management function		13
Total remuneration of employees with management function	EUR	2,400,000.00

### Information on employee remunerations in the event of outsourcing

Union Investment Luxembourg S.A. has outsourced the portfolio management to Quoniam Asset Management GmbH. Union Investment Luxembourg S.A. pays no direct remuneration from the funds to the employees of the outsourcing company.

The outsourcing company has provided the following information on the remuneration of its employees:

### Total amount of compensation paid by the outsourcing company in the past financial year (as at: 31 December 2021)

Number of staff		133
Fixed remuneration	EUR	14,200,000.00
Variable remuneration	EUR	7,900,000.00
Total compensation	EUR	22,100,000.00

Number of funds/subfunds managed by the appointed management company (as at: 31. December 2021): 131 UCITS and 31 AIF's
