Objectives and investment policy

The objective of the investment policy of Quoniam Funds Selection SICAV - Emerging Markets Equities MinRisk is to achieve a performance that produces a higher yield than the emerging markets, following the principle of risk diversification. The assets to be acquired for this Fund are identified on a discretionary basis using a consistent investment process ("active management").

The investment strategy uses a benchmark (MSCI Emerging Markets) as orientation, which is to be outperformed. To this end, no attempts are made to replicate the assets included in the benchmark. The Fund management may deviate significantly from this benchmark and invest in stocks that are not part of the benchmark.

With the MinRisk strategy, the aim of achieving an investment with a low overall risk compared to the benchmark is being pursued for the Fund. The aim of outperforming the benchmark on a risk-adjusted basis is also being pursued. Moreover, sustainability criteria are used as a basis for the sub-fund when investing its assets.

The investment decisions are made according to a structured investment process. For individual investment instruments, fundamental information about companies and markets is processed using quantitative methods for yield forecasts. Sustainability criteria are also taken into account. The portfolio is compiled in an optimisation step in which yield forecasts and risk parameters are coordinated with each other. This creates actively managed, risk-controlled portfolios. The investment approach differs from other investment approaches in processing the collected information.

The sub-fund's assets will mainly be invested in international equities and equity-like transferable securities from emerging and developing economies.

Income arising from Quoniam Funds Selection SICAV - Emerging Markets Equities MinRisk EUR I dis is generally distributed.

In principle, investors may request the redemption of their units on any valuation day. The company can, however, suspend redemptions under exceptional circumstances if it deems this to be in the interests of investors.

This risk indicator is based on historical data and may not be a reliable indication of future performance. The share class risk category may shift over time and does not constitute a guarantee. The lowest category (1) does not mean that investments are entirely risk-free.

Quoniam Funds Selection SICAV - Emerging Markets Equities MinRisk EUR I dis is in category 5 because its value is subject to high variations. This means that opportunities for profits and losses may be high.

The following risks have no direct influence on this classification, but may be significant for the Fund:

Liquidity risks: The Fund invests a significant portion of its assets in financial instruments which are sufficiently liquid by nature, but may reach a relatively low level of liquidity in some circumstances.

Political/legal risks: The Fund invests a significant portion of its assets in emerging and/or developing countries. This may give rise to particular political and legal risks, such as unclear ownership rights for individual securities, which can be accompanied by an increased risk of loss.

Operational risks: There is the risk of losses resulting from the inadequacy or failure of internal procedures and systems, from human error or as a result of external events. New or amended legislation may also affect the Fund.

Risk in relation to Shanghai- and Shenzhen Hong Kong Stock Connect : The sub-fund can invest via the Shanghai- and Shenzhen Hong Kong Stock Connect ("SHSC") programme in certain permissible Chinese A-class shares, which may involve additional clearing, processing, legal and operational risks and risks in the form of restrictions to investment possibilities.

A detailed presentation of the risks can be found in the sections of the sales prospectus entitled "General risk information", "Risk profile of the Sub-Fund" and, where applicable, "Special information".
