What type of product is it?

This document provides you with key investor information about this sub-fund. With reference to Article 181(5) of the Law of 17 December 2010, each sub-fund is only liable for the debts, liabilities and obligations within the Fund applicable to that sub-fund. This means each individual sub-fund constitutes its own entity with regard to the unitholders. The unitholder of a sub-fund may convert some or all of its units into units of another sub-fund subject to the imposition of any applicable issue taxes. Conversions from one sub-fund to another shall be made on the basis of conversion applications submitted to the Management Company in accordance with the provisions of sections 7 and 8 of the Sales Prospectus.

Type: The Fund is an OGAW- investment fund established in Luxembourg.

Term: The Fund has an unlimited term. The Fund may be wound up at any time by the Management Company in accordance with the provisions laid down in the Management Regulations. Units in the Fund may in principle be redeemed on each valuation day. We may suspend or limit redemptions under exceptional circumstances if such action is deemed necessary when taking the interests of investors into account.

Objectives: The objective of Quoniam Funds Selection SICAV - European Equities is to achieve long-term capital growth, in addition to generating income in line with market conditions. The assets to be acquired for this Fund are identified on a discretionary basis using a consistent investment process ("active management"). As a result, sustainability criteria are used as a basis for the sub-fund when investing its assets. The sub-fund's assets will mainly be invested in equities and/or participation certificates or rights included in an organised market and admitted for official trading within and outside the EEA. Furthermore, the sub-fund may invest in share certificates, convertible bonds, warrant bonds, index certificates and warrants. The sub-fund's assets may also be invested in money market instruments and bank deposits. Derivatives may be used for investment and hedging purposes. The investment strategy uses a benchmark (MSCI EUROPE) as orientation, which is to be outperformed. To this end, no attempts are made to replicate the assets included in the benchmark. The fund management may deviate significantly from this benchmark and invest in stocks that are not part of the benchmark.

Income arising from Quoniam Funds Selection SICAV - European Equities EUR I dis is generally distributed.

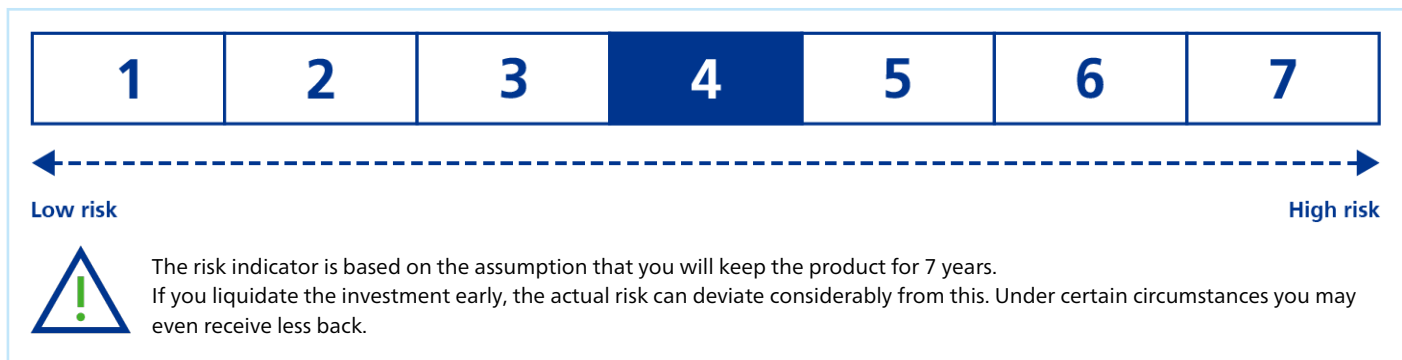

The Depositary of the Fund is the DZ PRIVATBANK S.A., Luxembourg.

The prospectus and the current annual and semi-annual reports, the current unit prices and further information on the fund are available free of charge in English at <https://www.union-investment.com>.

Small investor target group: The Fund is aimed at small investors. These clients pursue the goal of wealth creation / optimisation and have a long-term investment horizon. This fund is a product for clients with basic knowledge and/or experience of financial products. The client can bear a financial loss and does not value capital protection.

What are the risks and what could I get in return?

Risk indicator

The Overall Risk Indicator helps you to assess the risk associated with this product compared to other products. It shows how high the probability is that you will lose money on this product because the markets develop in a certain way or because we are unable to pay you out.

We have classified this product as risk class 4 on a scale of 1 to 7, where 4 is a medium risk class.

The risk of potential losses from future performance is classified as medium.

In the event of very adverse market conditions, it is possible that our ability to execute your return request may be affected.

Please note the currency risk. You will receive payments in another currency, so your final return will depend on the exchange rate between the two currencies. This risk is not reflected in the above indicator.

Risks not adequately captured by the Overall Risk Indicator: Operational risks, tax risks.

This product does not contain any protection against future market developments. As a result, you could lose all or part of the invested capital.

Performance scenarios

What you get out of this product in the end depends on future market developments. Future market development is uncertain and cannot be predicted with certainty.

The pessimistic, medium and optimistic scenarios shown illustrate the worst, average and best performance of the product/a suitable benchmark over the last 12 years. The markets could develop completely differently in the future.

Making a one-time payment

Recommended holding period	7 years	
Investment example	10,000 EUR	
	If you exit after 1 year	If you exit after 7 years

Scenarios

Minimum	There is no guaranteed minimum return. You could lose all or part of your investment.

The figures quoted include all the costs of the product itself, but may not include all the costs you may have to pay to your adviser or distributor, or the costs of your adviser or distributor. Also not taken into account is your personal tax situation, which can also have an impact on the amount you ultimately earn.

The stress scenario shows what you could get back under extreme market conditions.

The pessimistic, medium and optimistic scenario resulted in an investment between 2010 and 2022.

What happens if Union Investment Luxembourg S.A. is not able to make the payment?

The failure of the Company has no direct effect on your payment, as the statutory regulation stipulates that in the event of the insolvency of the Management Company, the investment fund does not become part of the insolvency estate, but is maintained independently.

What costs are incurred?

The person who sells you this product or advises you on it may bill you for additional costs. If this is the case, this person will inform you of these costs and explain how they will affect your investment.

Costs over time

The tables show amounts taken from your investment to cover various types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product performs. The amounts shown here illustrate an investment amount as an example and various possible investment periods.

We have made the following assumption:

- In the first year, you would get back the amount invested (0% annual return). For the other holding periods, we have assumed that the product performs as shown in the medium scenario.

- 10,000 EUR is invested.

	If you exit after 1 year	If you exit after 7 years
Total costs	91 EUR	836 EUR
Annual impact of costs (*)	0.9 %	0.9 % per year

(*) These figures illustrate how costs reduce your return per year over the holding period. For example, if you exit at the end of the recommended holding period, your average return per year is expected to be 9.7 % before costs and 8.8 % after costs.

We may split some of the costs between us and the person who sells you the product to cover the services provided to you. You will be notified of the amount.
