

## PRESS RELEASE

### **Quoniam partners with Oceanside to expand institutional and wholesale coverage across the Benelux region**

- Quoniam has appointed Oceanside as its distribution partner for the Benelux region, marking another milestone in the firm's international growth strategy.
- By combining global quantitative investment expertise with local market access, the collaboration is designed to create new opportunities for institutional and wholesale investors.
- The partnership extends Quoniam's European market coverage and reinforces its commitment to local client engagement.

**Frankfurt / 's-Hertogenbosch, 22 September 2026** – Quoniam Asset Management has entered into a strategic partnership with Oceanside Capital Partners to support the development of its institutional and wholesale client relationships in the Netherlands, Belgium and Luxembourg. The collaboration will provide professional investors across the Benelux region with greater access to Quoniam's systematic investment capabilities. It will combine Quoniam's research- and data-driven investment approach with Oceanside's local market expertise, professional investor network and experience in outsourced distribution services.

Quoniam is widely recognised as a pioneer in systematic investing, with a research- and data-driven approach developed over more than 25 years. Its investment platform spans equities, fixed income, multi-asset and liquid alternatives. Oceanside specialises in outsourced distribution services for asset managers seeking to enter new markets or accelerate their commercial development in Northern Europe. Its approach combines selective market coverage with long-term relationship building and a focus on relevant, high-quality investor engagement.

Marek Siwicki, Head of Client Relations International at Quoniam, emphasises: "The Benelux region is an important market for Quoniam, with a highly sophisticated institutional and wholesale investor base, as well as a strong appreciation of systematic investment approaches. Oceanside's local knowledge, extensive professional network, and commitment to building long-term relationships make the firm an excellent partner for us."

André van den Heuvel, Co-Founder and Managing Director at Oceanside, says: "Quoniam combines a deep systematic investment heritage with a data-driven process and a strong understanding of the needs of European institutional investors. We see considerable potential for its investment capabilities in the Benelux region, where investors are increasingly looking for robust, risk-controlled and customisable solutions. We look forward to introducing Quoniam's expertise to our network and building sustainable relationships in the region."

The partnership with Oceanside complements Quoniam's existing collaborations with distribution partners in the Nordic countries and France. Together, these relationships are intended to enhance the firm's local market coverage and foster closer, long-term relationships with professional investors throughout Europe. "This collaboration is part of a broader international growth strategy. Building on our existing partnerships in the Nordics and France, we are establishing local access points in pivotal European markets while maintaining the consistency of Quoniam's investment philosophy and client proposition," explains Jonathan Clenshaw, Chief Business Development Officer at Quoniam Asset Management.
